Free PDF Citrix - High-quality 1Y0-205 - Citrix Virtual Apps and Desktops Administration Reliable Braindumps Questions

In order to meet the demands of all customers, our company has a complete set of design, production and service quality guarantee system, the Citrix Virtual Apps and Desktops Administration test guide is perfect. We can promise that quality first, service upmost. If you buy the 1Y0-205 learning dumps from our company, we are glad to provide you with the high quality 1Y0-205 study question and the best service. The philosophy of our company is "quality is life, customer is god." We can promise that our company will provide all customers with the perfect quality guarantee system and sound management system. It is not necessary for you to have any worry about the quality and service of the 1Y0-205 learning dumps from our company. We can make sure that our company will be responsible for all customers. If you decide to buy the 1Y0-205 study question from our company, you will receive a lot beyond your imagination. So hurry to buy our products, it will not let you down.

Citrix Virtual Apps and Desktops Administration Sample Questions (Q23-Q28):

NEW QUESTION # 23
Scenario: A Citrix Administrator maintains a Citrix Virtual Apps and Desktops Site with a large number of Windows users running various locally attached client printers. No network printers are being used. The administrator has enabled the HDX printer mapping policy to 'Auto-create all client printers', which has resulted in a large number of drivers being loaded onto the Virtual Delivery Agent (VDA) machines. New standards are requiring the administrator to limit these Windows drivers on the VDA machines. Which printing feature can the administrator enable to meet the new standards?

- A. The Citrix Universal Print Server
- B. The Auto-create PDF universal printer policy
- C. The Citrix Universal Printer Driver
- D. The Auto-create local (non-network) client printers only policy

Answer: C

Explanation:
Enabling the Citrix Universal Printer Driver allows client printers to be auto-created without requiring individual printer drivers to be installed on the VDA machines. This standardizes printing, reduces driver sprawl, and meets compliance requirements by minimizing the number of Windows drivers on the VDAs.

NEW QUESTION # 24
On which two components must the Secure Ticket Authority (STA) server locations be configured if a Citrix Administrator wants to configure secure external access to a Citrix Virtual Apps and Desktops Site? (Choose two.)

- A. Virtual Delivery Agent (VDA)
- B. Citrix Workspace app
- C. StoreFront
- D. Delivery Controller
- E. NetScaler Gateway

Answer: C,E

Explanation:
The Secure Ticket Authority (STA) server locations must be configured on both the NetScaler Gateway and StoreFront. This ensures that tickets generated by the STA (on the Delivery Controllers) are validated consistently, enabling secure external access to Citrix resources.

NEW QUESTION # 25
Which tool should a Citrix Administrator use to monitor the overall daily performance of a Citrix Virtual Apps and Desktops Site?

- A. CDF Traces
- B. Citrix Director
- C. Citrix Studio
- D. HDX Monitor

Answer: B

Explanation:
Citrix Director is the monitoring and management tool designed for Citrix Virtual Apps and Desktops. It provides administrators with daily performance insights, including logon times, session usage, resource utilization, and alerts, making it the correct tool for overall site performance monitoring.

NEW QUESTION # 26
After creating a new machine catalog using the Machine Creation Services (MCS) wizard in Citrix Studio, a Citrix Administrator determines that Windows activation fails for all new machines in that catalog.

Which two conditions can cause this to happen? (Choose two.)

- A. The base image rearm count has been exceeded.
- B. The version of Windows installed uses Multiple Activation Key (MAK) licensing.
- C. The Microsoft License Server is unreachable.
- D. The version of Windows installed is Windows Server 2012 R2.

Answer: A,B

Explanation:
Rearm count exceeded: If the base image has been sysprepped too many times, the rearm count may be exhausted, preventing Windows activation on cloned machines.
MAK licensing: MCS-provisioned machines are treated as newly deployed instances. MAK licensing is not suitable for this scenario because each clone would require its own activation, leading to failures.

NEW QUESTION # 27
When the Local Host Cache (LHC) is enabled, during a Site database outage _____ will reference _____ to broker new sessions. (Choose the correct option to complete the sentence.)

- A. all Delivery Controllers; their local database
- B. the principal Delivery Controller; its local database
- C. all Delivery Controllers; their local XML file
- D. the principal Delivery Controller; its local XML file

Answer: A

Explanation:
With Local Host Cache (LHC) enabled, each Delivery Controller maintains a synchronized local copy of the Site database. During a database outage, all Delivery Controllers reference their local database to continue brokering new sessions, ensuring high availability.

NEW QUESTION # 28
......

We know that 1Y0-205 exam is very important for you working in the IT industry, so we developed the 1Y0-205 test software that will bring you a great help. All exam materials you you need are provided by our team, and we have carried out the scientific arrangement and analysis only to relieve your pressure and burden in preparation for 1Y0-205 Exam.
