API-580考題套裝， API-580認證考試解析

PDFExamDumps API的API-580考試培訓資料是個性價很高的培訓資料，與眾多培訓資料相比，PDFExamDumps API的API-580考試培訓資料是最好的，如果你需要IT認證培訓資料，不選擇PDFExamDumps API的API-580考試培訓資料，你將後悔一輩子，選擇了PDFExamDumps API的API-580考試培訓資料，你將終身受益。

最新的 ICP Programs API-580 免費考試真題 (Q56-Q61):

問題 #56

Outcome of an event

- A. Consequence

- B. Event
- C. Risk

答案： A

問題 #57

Thing or activity with a potential for consequence

- A. Hazard
- B. Source
- C. Toxic

答案： B

問題 #58

The objective of RBI is to:

- A. determine what loss of containment incident could occur, and how likely the incident could occur.
- B. identify the worst possible consequences of a major leak or equipment failure, including safety, environmental, and/or economic consequences.
- C. determine the likelihood that a major leak could result in a fire, an explosion, or another major consequence.
- D. determine the damage mechanisms that could occur and cause equipment failure that could lead to loss of containment.

答案： A

解題說明：

According to Section 5.2 of API 580:

"One objective of RBI is to determine what incident could occur (consequence) in the event of an equipment failure and how likely (probability) it is that the incident could happen." This is the foundational purpose of RBI: to determine both the likelihood and the consequence of a potential failure event, with specific emphasis on loss of containment.

While B, C, and D are partially true and are part of the broader RBI process, option A captures the exact phrasing and complete intent as outlined in the standard.

Reference: API 580, 2nd Edition (2016), Section 5.2

問題 #59

Termination of the ability of a system, structure, or component to perform its required function of containment of fluid (leakage of fluid)

- A. Outcome
- B. Failure
- C. Risk

答案： B

問題 #60

If multiple inspections have been performed, which inspection may best reflect current operating conditions?

- A. Corrosion survey
- B. Most recent inspection
- C. Process conditions
- D. Base line inspection survey

答案： B

問題 #61
