Reliable COF-C03 Learning Materials - 100% Pass Quiz 2026 COF-C03: SnowPro® Core Certification (COF-C03) First-grade Valid Test Tutorial

We are committed to helping you pass the exam and get the certificate as soon as possible. COF-C03 exam bootcamp of us have the questions and answers, and it not only have quality but also contain certain quantity, it will be enough for you to deal with your exam. With the pass rate more than 98.65%, we can ensure you pass your exam. COF-C03 Exam Dumps also have most of knowledge points of the exam, and they may help you a lot. We offer you free update for 365 days after you purchase the COF-C03 exam bootcamp.

Snowflake SnowPro® Core Certification (COF-C03) Sample Questions (Q47-Q52):

NEW QUESTION # 47

When enabling access to unstructured data, which URL permits temporary access to a staged file without the need to grant privileges to the stage or to issue access tokens?

- A. Pre-Signed URL
- **B. Scoped URL**
- C. Relative URL
- D. File URL

Answer: B

Explanation:

A Scoped URL permits temporary access to a staged file without the need to grant privileges to the stage or to issue access tokens. It provides a secure way to share access to files stored in Snowflake.

NEW QUESTION # 48

Which function should be used to insert JSON format string data into a VARIANT field?

- A. TO_VARIANT
- **B. PARSE_JSON**
- C. CHECK_JSON
- D. FLATTEN

Answer: B

Explanation:

To insert JSON formatted string data into a VARIANT field in Snowflake, the correct function to use is PARSE_JSON. The PARSE_JSON function is specifically designed to interpret a JSON formatted string and convert it into a VARIANT type, which is Snowflake's flexible format for handling semi-structured data like JSON, XML, and Avro. This function is essential for loading and querying JSON data within Snowflake, allowing users to store and manage JSON data efficiently while preserving its structure for querying purposes. This function's usage and capabilities are detailed in the Snowflake documentation, providing users with guidance on how to handle semi-structured data effectively within their Snowflake environments.

References:

Snowflake Documentation: PARSE_JSON

NEW QUESTION # 49

When should a stored procedure be created with caller's rights?

- A. When the caller needs to be prevented from viewing the source code of the stored procedure
- B. When the caller needs to run a statement that could not execute outside of the stored procedure
- **C. When the stored procedure needs to run with the privileges of the role that called the stored procedure**
- D. When the stored procedure needs to operate on objects that the caller does not have privileges on

Answer: C

Explanation:

Stored procedures in Snowflake can be created with either 'owner's rights' or 'caller's rights'. A stored procedure created with caller's rights executes with the privileges of the role that calls the procedure, not the privileges of the role that owns the procedure. This is particularly useful in scenarios where the procedure needs to perform operations that depend on the caller's access permissions, ensuring that the procedure can only access objects that the caller is authorized to access.

NEW QUESTION # 50

A tabular User-Defined Function (UDF) is defined by specifying a return clause that contains which keyword?

- A. TABLE
- B. VALUES
- C. ROW_NUMBER
- D. TABULAR

Answer: A

Explanation:

In Snowflake, a tabular User-Defined Function (UDF) is defined with a return clause that includes the keyword "TABLE." This indicates that the UDF will return a set of rows, which can be used in the FROM clause of a query. References: Based on my internal knowledge as of 2021.

NEW QUESTION # 51

What will prevent unauthorized access to a Snowflake account from an unknown source?

- A. Multi-Factor Authentication (MFA)
- B. Network policy
- C. End-to-end encryption
- D. Role-Based Access Control (RBAC)

Answer: B

Explanation:

A network policy in Snowflake is used to restrict access to the Snowflake account from unauthorized or unknown sources. It allows administrators to specify allowed IP address ranges, thus preventing access from any IP addresses not listed in the policy.

NEW QUESTION # 52

.....

In today's competitive industry, only the brightest and most qualified candidates are hired for high-paying positions. Obtaining Snowflake SnowPro® Core Certification (COF-C03) is a wonderful approach to be successful because it can draw in prospects and convince companies that you are the finest in your field.
