ExamsTorrent provide you the product with high quality and reliability. You can free download online part of ExamsTorrent's providing practice questions and answers about the Microsoft Certification DP-420 Exam as a try. After your trail I believe you will be very satisfied with our product. Such a good product which can help you pass the exam successfully, what are you waiting for? Please add it to your shopping cart.

Microsoft's DP-420 certification exam is aimed at professionals who are interested in designing and implementing cloud-native applications using the Azure Cosmos DB platform. DP-420 exam is ideal for developers, architects, and engineers who want to validate their skills and knowledge in cloud-native application development.

## A section outlining the topics of a Microsoft DP-420 Certification Exam

**DP-420 Dumps** cover the following topics of the Microsoft DP-420 Certification Exam:

- Integrate an Azure Cosmos DB solution: 10%
- Maintain an Azure Cosmos DB solution: 20%

- Design and implement data distribution: 10%
- Optimize an Azure Cosmos DB solution: 20%
- Design and execute information models: 40%

Wrong topic tend to be complex and no regularity, and the DP-420 torrent prep can help the users to form a good logical structure of the wrong question, this database to each user in the simulation in the practice of all kinds of wrong topic all induction and collation, and the DP-420 study question then to the next step in-depth analysis of the wrong topic, allowing users in which exist in the knowledge module, tell users of our DP-420 Exam Question how to make up for their own knowledge loophole, summarizes the method to deal with such questions for, to prevent such mistakes from happening again.

Earning the Microsoft DP-420 Certification can help developers demonstrate their expertise in designing and implementing cloud-native applications using Azure Cosmos DB. It can also help them stand out in the job market and advance their careers.

## Microsoft Designing and Implementing Cloud-Native Applications Using Microsoft Azure Cosmos DB Sample Questions (Q64-Q69):

### NEW QUESTION # 64

You have an Azure subscription.

You need to deploy the following resources to an Azure Cosmos DB for NoSQL account:

\* A container

\* A user-defined function (UDF)

The solution must minimize the possibility of the deployment failing.

How should you complete the template? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

**Answer:**

Explanation:

☐

Explanation:

☐

### NEW QUESTION # 65

You have a container in an Azure Cosmos DB Core (SQL) API account.

You need to use the Azure Cosmos DB SDK to replace a document by using optimistic concurrency.

What should you include in the code? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

**Answer:**

Explanation:

☐

Explanation:

☐

Box 1: ConsistencyLevel

The ItemRequestOptions Class ConsistencyLevel property gets or sets the consistency level required for the request in the Azure Cosmos DB service.

Azure Cosmos DB offers 5 different consistency levels. Strong, Bounded Staleness, Session, Consistent Prefix and Eventual - in order of strongest to weakest consistency.

Box 2: \_etag

The ItemRequestOptions class helped us implement optimistic concurrency by specifying that we wanted the SDK to use the If-Match header to allow the server to decide whether a resource should be updated. The If-Match value is the ETag value to be checked against. If the ETag value matches the server ETag value, the resource is updated.

### NEW QUESTION # 66

You have an Azure Cosmos DB Core (SQL) account that has a single write region in West Europe. database named db

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

Explanation:

Box 1: Yes

The Automatic failover option allows Azure Cosmos DB to failover to the region with the highest failover priority with no user action should a region become unavailable.

Box 2: No

West Europe is used for failover. Only North Europe is writable.

To Configure multi-region set UseMultipleWriteLocations to true.

Box 3: Yes

Provisioned throughput with single write region costs \$0.008/hour per 100 RU/s and provisioned throughput with multiple writable regions costs \$0.016/per hour per 100 RU/s.

### NEW QUESTION # 67

You are creating a database in an Azure Cosmos DB Core (SQL) API account. The database will be used by an application that will provide users with the ability to share online posts. Users will also be able to submit comments on other users' posts.

You need to store the data shown in the following table.

The application has the following characteristics:

Users can submit an unlimited number of posts.

The average number of posts submitted by a user will be more than 1,000.

Posts can have an unlimited number of comments from different users.

The average number of comments per post will be 100, but many posts will exceed 1,000 comments.

Users will be limited to having a maximum of 20 interests.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

### NEW QUESTION # 68

You have an Azure Cosmos DB for NoSQL account named account that has the disablekeyBasedletadatwriteAccess property enabled.

You are developing an app named App1 that will be used by a user named DevUser1 to create containers in account1. DevUser1 has a non-privileged user account in the Azure AD tenant.

You need to ensure that DevUser1 can use App1 to create containers in account1.

What should you do? To answer, select the appropriate options in the answer area.

NOTE Each correct selection is worth one point.
