

100% Pass 2026 VMware 3V0-24.25: Newest Exam Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service Cram Questions

P.S. Free 2026 VMware 3V0-24.25 dumps are available on Google Drive shared by ActualCollection:
https://drive.google.com/open?id=1ophXG9onuZquwpicoMc4zyrWRAMJ_Pbc

It is apparent that a majority of people who are preparing for the 3V0-24.25 exam would unavoidably feel nervous as the exam approaching. If you are still worried about the coming exam, since you have clicked into this website, you can just take it easy now, I can assure you that our company will present the antidote for you--our 3V0-24.25 Learning Materials. As the most popular study materials in the market, our 3V0-24.25 practice guide can give you 100% pass guarantee. You will feel grateful if you choose our 3V0-24.25 training questions.

Dear every IT candidates, here, I will recommend ActualCollection 3V0-24.25 exam training material to all of you. If you use VMware 3V0-24.25 test bootcamp, you will not need to purchase anything else or attend other training. We promise that you can pass your 3V0-24.25 Certification at first attempt. The high pass rate has helped lots of IT candidates get their IT certification. In case of failure, we promise to give you full refund. No help, full refund!

Pass Guaranteed Quiz VMware - 3V0-24.25 –High Pass-Rate Exam Cram Questions

Our Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service exam question can make you stand out in the competition. Why is that? The answer is that you get the 3V0-24.25 certificate. What certificate? Certificates are certifying that you have passed various qualifying examinations. Watch carefully you will find that more and more people are willing to invest time and energy on the 3V0-24.25 Exam, because the exam is not achieved overnight, so many people are trying to find a suitable way. Fortunately, you have found our 3V0-24.25 real exam materials, which is best for you.

VMware Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service Sample Questions (Q64-Q69):

NEW QUESTION # 64

A Security Architect is designing a content distribution strategy for an air-gapped environment consisting of three distinct vCenter Server instances (Sites A, B, and C). Site A has a secure, one-way link to download images, but Sites B and C are completely isolated from the internet.

Requirement: All sites must use the exact same validated set of Tanzu Kubernetes Releases (TKRs).

What is the most efficient and consistent architectural design to manage the Content Libraries? (Select all that apply.)

- A. Configure Site A to subscribe directly to the public VMware registry, then publish that library to B and
- B. Manually create Local Libraries at Site B and Site C and upload the images separately to each site via USB drive to ensure air-gap integrity.

- C. Create a Local Content Library at Site A and manually upload the TKR OVAs downloaded from the VMware portal.
- D. Enable Publishing on the Site A library.
- E. Create Subscribed Content Libraries at Sites B and C, subscribing to the published URL of the Site A library (assuming internal routing exists between sites).

Answer: C,D,E

NEW QUESTION # 65

An administrator is adding a Kubernetes cluster to an existing namespace. Click where the administrator navigates to create the cluster.

Answer:

Explanation:

Explanation:

Kubernetes Service

When adding a Kubernetes cluster to an existing vSphere Namespace, the workflow is initiated from within that namespace's context in the vSphere Client. The administrator first opens the target namespace (as shown in the left navigation where the namespace is selected), then uses the Kubernetes Service area to create and manage Kubernetes clusters associated with that namespace. In the namespace Summary view, the Kubernetes Service tile/card provides the entry point for cluster lifecycle actions, typically via an action link such as Manage (and from there Create Cluster). This is because the Kubernetes cluster is a namespace-scoped resource in the Supervisor environment: it inherits namespace-level policies and configuration such as permissions/RBAC, resource limits, storage policies, and networking selections that have already been defined for that namespace. Navigating to other areas like Storage or Network is used to validate or adjust prerequisites (for example, storage policy availability or network settings), but the actual "create cluster" operation is launched from Kubernetes Service within the namespace to ensure the cluster is created under the correct tenant boundary and governance model.

NEW QUESTION # 66

A Platform Engineer is designing a multi-zone Supervisor architecture to support a high-availability requirement for a critical financial application. The design involves three vSphere Zones: Zone-A, Zone- B, and Zone-C.

The engineer needs to create a vSphere Namespace fin-app-ns that can tolerate the failure of any single zone.

Review the following proposed configuration snippet for the Namespace creation:

Proposed Namespace Configuration Logic

Name: fin-app-ns

Placement:

Zones:

- Zone-A

- Zone-B

Storage Policies:

- gold-storage-policy (assigned to all zones)

Why is this proposed configuration insufficient to meet the "tolerate failure of any single zone" requirement for the Supervisor Control Plane and the workloads within this namespace? (Choose 2.)

- A. A 3-zone Supervisor deployment is required to support the Supervisor Control Plane's high availability; restricting the Namespace to only two zones (A and B) prevents the Supervisor from placing control plane VMs in the third zone if one fails.
- B. The configuration is actually valid; vSphere HA will handle the failover between Zone A and Zone
- C. Kubernetes control planes typically require an odd number of members (e.g., 3) distributed across failure domains to maintain quorum (etcd) during a partition. Using only 2 zones risks split-brain scenarios.
- D. The storage policy must be different for each zone to ensure replication.
- E. vSphere Namespaces do not support multi-zone placement; they must be pinned to a single cluster.

Answer: A,C

NEW QUESTION # 67

A Security Architect needs to integrate an OIDC provider (Azure AD) with vSphere to provide authentication for a new fleet of TKG clusters. The requirement is to map the Azure AD group k8s- platform-admins (Group Claim: 9283-uuid-xyz) to the cluster-admin role on all TKG clusters automatically upon creation.

Which architectural approach achieves this global policy enforcement? (Choose 2.)

- A. Configure the vCenter Single Sign-On Identity Provider with the Azure AD OIDC settings.
- B. Use Tanzu Mission Control (if available/configured) to define an Access Policy that binds the k8s- platform-admins group to the cluster.admin role for the "All Clusters" group.
- C. Configure the Supervisor to trust the OIDC provider directly via the Supervisor Management API, bypassing vCenter.
- D. It is not possible to automate this; the admin kubeconfig must be used to set up RBAC for the first time on each cluster.
- E. Manually create a ClusterRoleBinding on every TKG cluster after provisioning using a script.

Answer: A,B

NEW QUESTION # 68

An architect is meeting with a customer to deploy a mission-critical application using the vSphere Kubernetes Service. The architect learns that the ticketing application runs at a steady state 80% of the time but has significant spikes when an event is announced. The application is unable to meet demand even though resources are available.

What will address the issue of peak demand?

- A. Oversubscribe the vSphere Kubernetes environment so that adequate resources are always available.
- B. Install the Contour Supervisor Services package.
- C. Install cluster autoscaling
- D. Enable Foundation Load Balancer to manage the network traffic during peak demand.

Answer: C

Explanation:

The problem describes demand spikes where capacity exists, but the application cannot meet demand-this typically indicates the cluster needs to scale out (more nodes/pods) automatically when load increases. In VCF

9.0, VKS supports Cluster Autoscaler as an optional package and specifically calls out improvements: "Cluster Autoscaler supports scaling from zero to zero... You must have the autoscaler standard package installed." This directly supports option A (install cluster autoscaling) as the mechanism to dynamically add capacity during peak events and reduce it afterward, optimizing cost and operations while meeting bursts. A load balancer (including Foundation Load Balancer) helps distribute traffic across existing endpoints, but it does not create new compute capacity when pods are pending due to insufficient nodes. Similarly, installing Contour relates to ingress (routing inbound traffic) and is not, by itself, a capacity scaling solution. Oversubscription is a risky workaround that can degrade performance and does not provide targeted, policy-driven elasticity. Therefore, enabling cluster autoscaling is the correct way to address burst demand when underlying resources are available.

NEW QUESTION # 69

.....

Perhaps you worry about the quality of our 3V0-24.25 exam questions. We can make solemn commitment that our 3V0-24.25 study materials have no mistakes. All contents are passing rigid inspection. You will never find small mistakes such as spelling mistakes and typographical errors in our 3V0-24.25 learning guide. No one is willing to buy a defective product. And our 3V0-24.25 practice braindumps are easy to understand for all the candidates.

New 3V0-24.25 Test Pattern: <https://www.actualcollection.com/3V0-24.25-exam-questions.html>

As the content of our 3V0-24.25 study materials has been prepared by the most professional and specialized experts, VMware Exam 3V0-24.25 Cram Questions We are still striving for achieve our ambitious goals, They have been going through the trails of market and customers over ten years with outcomes that passing rate of our 3V0-24.25 training guide materials has nearly reached the perfect state, In order to provide the latest and the most accurate study material, our IT experts are doing their best to update the 3V0-24.25 exam training pdf to make sure that our customers can have a full knowledge about 3V0-24.25 actual examination.

As such, you'll focus your skills more and more on the constraints of mobile screens, Mini Bridge In Photoshop, As the content of our 3V0-24.25 Study Materials has been prepared by the most professional and specialized experts.

Quiz 2026 3V0-24.25: Reliable Exam Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service Cram Questions

We are still striving for achieve our ambitious Exam 3V0-24.25 Cram Questions goals, They have been going through the trails of market and customers over ten years with outcomes that passing rate of our 3V0-24.25 training guide materials has nearly reached the perfect state.

In order to provide the latest and the most 3V0-24.25 accurate study material, our IT experts are doing their best to update the 3V0-24.25 exam training pdf to make sure that our customers can have a full knowledge about 3V0-24.25 actual examination.

To ensure excellent score in the exam, 3V0-24.25 braindumps are the real feast for all exam candidates.
