Our experts pass onto the exam candidate their know-how of coping with the C-SEC-2405 Exam by our C-SEC-2405 practice questions. Exam candidates are susceptible to the influence of ads, so our experts' know-how is impressive to pass the C-SEC-2405 exam instead of making financial reward solely.

SAP C-SEC-2405 Exam Syllabus Topics:

Topic	Details
Topic 1	• Governance, Compliance, and Cybersecurity: This section of the exam measures the skills of compliance officers and covers the principles of governance, compliance, and cybersecurity of SAP systems. It includes understanding regulatory requirements and best practices for maintaining security. A critical skill evaluated is ensuring organizational compliance with relevant laws and policies.
Topic 2	• Infrastructure Security and Authentication: This section of the exam measures the skills of SAP IT Professionals and covers infrastructure security measures and authentication methods used in SAP environments. It emphasizes protecting systems from unauthorized access and ensuring secure user authentication.

Topic 3	• SAP Fiori Authorizations and SAP S • 4HANA: This section of the exam measures the skills of SAP Developers and covers authorization management specific to SAP Fiori applications within SAP S • 4HANA. It emphasizes configuring authorizations for Fiori apps to ensure appropriate access levels. A key skill assessed is understanding Fiori authorization concepts to enhance user experience.
Topic 4	• User Administration: This section of the exam measures the skills of SAP Administrators and covers user administration tasks within SAP systems. It includes managing user accounts, roles, and profiles efficiently. A critical skill evaluated is maintaining accurate user records to support security and compliance efforts.
Topic 5	• Authorization and Role Maintenance: This section of the exam measures the skills of SAP administrators and covers the management of user authorizations and roles within SAP systems. It emphasizes the processes involved in defining, maintaining, and approving roles to ensure secure access. A key skill assessed is managing role authorizations effectively to mitigate access risks.

SAP Certified Associate - Security Administrator Sample Questions (Q62-Q67):

NEW QUESTION # 62
For which of the following can transformation variables be used?

- A. To save data temporarily
- B. To save data to the output JSON file
- C. To save data permanently

Answer: A

NEW QUESTION # 63
Which SU01 user types are NOT enabled for interaction? Note: There are 2correct answers to this question.

- A. Service
- B. Communications Data
- C. System
- D. Dialog

Answer: A,C

Explanation:
In SAP, certainSU01 user typesare not enabled for interactive use:
* Service Users (A):
* Designed for background jobs or tasks requiring anonymous or shared access.
* Cannot log in interactively.
* System Users (B):
* Used for communication between systems and background processes.
* Does not support interactive login.
Why Others Are Incorrect:
* Dialog Users (C):Designed specifically for interactive logins.
* Communications Data (D):Often refers to communication-specific settings, not user types.
SAP Security References:
* SAP Help Portal: User Type Overview
* SAP Documentation: SU01 User Type Functionalities

NEW QUESTION # 64
What must you do if you want to enforce an additional authorization check when a user starts an SAP transaction?

- A. Assign the authorization object and permissions to the chosen transaction code using transaction SE93.

- B. Assign authorization object S_START to the chosen transaction code with transaction SU24 and specify the Program ID and Object Type.
- C. Assign the authorization object to be checked to the chosen transaction code in the SAP Default authorization data using transaction SU22 and set Check Indicator to "Check".
- D. Assign the authorization object to be checked to the chosen transaction code with transaction SU24 and set Default Status to "Yes".

Answer: A

Explanation:
To enforce an additional authorization check when a user starts an SAP transaction, you must assign the relevant authorization object and its permissions to the transaction code using transaction SE93. This transaction allows you to define or modify the properties of a transaction, including specifying authorization objects that must be checked when the transaction is executed. By linking the authorization object directly to the transaction in SE93, the system enforces the additional check at the point of transaction execution, ensuring that only authorized users can proceed. Transactions SU24 and SU22 are used for maintaining authorization defaults, but they do not directly enforce checks at transaction start, and S_START is specific to Fiori app authorizations, not general transactions.

NEW QUESTION # 65
In SAP S/4HANA Cloud Public Edition, what does the ID of an SAP-predefined Space refer to?

- A. The business roles it is to be assigned to
- B. The software release it was created for
- C. The SAP Fiori applications it was defined for
- D. The business area it was designed for

Answer: D

Explanation:
In SAP S/4HANA Cloud Public Edition, the ID of an SAP-predefined Space refers to the business area it was designed for. Spaces in the SAP Fiori launchpad are organizational units that group Fiori apps and tiles relevant to specific business functions, such as finance, procurement, or human resources. The ID of a predefined Space reflects this business area, providing a clear and intuitive way to organize applications for users based on their functional roles. This design enhances user experience by ensuring that relevant apps are easily accessible within a business context. The ID does not refer to the software release, as Spaces are release-independent, nor to specific Fiori applications or business roles, which are assigned separately via catalogs and roles. By tying the Space ID to the business area, SAP ensures that the Fiori launchpad aligns with organizational processes, supporting efficient navigation and access control while maintaining a user- centric and business-focused interface.

NEW QUESTION # 66
Which of the blowing functions within SAP GRC Access Control support access certification and review? Note: There are 2 correct answers to tM Question.

- A. Review CI User Reaffirm
- B. Role Ream
- C. GO
- D. Role Review

Answer: A,D

NEW QUESTION # 67
.....
