

# Experience The Real Environment With The Help Of Zscaler ZDTE Exam Questions

---

## ZSCALER DIGITAL TRANSFORMATION ADMINISTRATOR (ZDTA) CERTIFICATION EXAM QUESTIONS AND ANSWERS 100% CORRECT

Primary use of policies based on file types in Zscaler DLP - ANSWER-To protect data by allowing or blocking specific file types and activities.

Three levels of inspection used by Zscaler DLP for file type enforcement - ANSWER-Magic Bytes, Mime Type, and File Extension.

Reason for multiple levels of inspection for file types in Zscaler - ANSWER-To prevent users from bypassing policies by changing file extensions.

Predefined dictionaries in Zscaler DLP - ANSWER-Classifiers used to identify sensitive data like PCI, PII, and PHI data.

Example of a predefined dictionary used in Zscaler DLP - ANSWER-A credit card number dictionary.

Custom dictionary in Zscaler DLP - ANSWER-A dictionary created by customers using specific phrases, keywords, patterns, and regular expressions.

Use of custom dictionaries in Zscaler DLP - ANSWER-To protect documents with specific headers and footers like 'company-confidential' or 'internal-use only'.

Exact Data Match (EDM) in Zscaler DLP - ANSWER-A feature that matches specific data elements from a customer's structured data to trigger DLP policies.

How sensitive data is fed to Zscaler's EDM engine - ANSWER-By using an on-premises VM that indexes the data and sends hashes to the Zscaler cloud.

What happens to data fed into Zscaler's EDM engine - ANSWER-It is converted into hashes and tokens which are stored in the cloud.

Actions triggered by an EDM in Zscaler DLP - ANSWER-Actions based on exact matches of sensitive data elements, such as blocking or alerting on data exfiltration.

Support options available for troubleshooting in Zscaler - ANSWER-Self Help support, reporting capabilities, and support ticket raising.

Because the busy people seldom have much time to read the books they need. So how should people get their dreaming ZDTE certification by passing the exam? At this time, people should need some good ZDTE study materials. Not only will our ZDTE Exam Questions help you pass exam, but it will also save your valuable time. Now you can free download the demos of our ZDTE exam questions to have an experience the good quality and validity.

It is important to check the exercises and find the problems. Once you use our ZDTE study prep to aid your preparation of the exam, all of your exercises of the study materials will be carefully recorded on the system of the ZDTE exam braindump. Also, you can know your current learning condition clearly. The results will display your final scores on the screen. Also, you will know the numbers of correct and false questions of your exercise. Our ZDTE Certification Materials can help you transfer into a versatile talent. Many job seekers have successfully realized financial freedom with the assistance of our ZDTE test training. All your dreams will be fully realized after you have obtained the ZDTE certificate. Finding a good paying job is available for you.

**Zscaler ZDTE Reliable Test Answers, ZDTE New Braindumps**

If you want to be a leader in some industry, you have to continuously expand your knowledge resource. Our PassLeader always updates the exam dumps and the content of our exam software in order to ensure the ZDTE exam software that you have are the latest and comprehensive version. No matter which process you are preparing for ZDTE Exam, our exam software will be your best helper. As the collection and analysis of our ZDTE exam materials are finished by our experienced and capable IT elite.

## Zscaler Digital Transformation Engineer Sample Questions (Q39-Q44):

### NEW QUESTION # 39

What is one benefit of OneAPI?

- **A. Simplifies API integration by using a single entry point**
- B. Repeated authorization messages required for increasing security
- C. Multiple registration processes
- D. Multiple token requests

**Answer: A**

Explanation:

Zscaler OneAPI is described in the Digital Transformation Engineer and Zero Trust Automation content as a unified API gateway for the entire Zscaler platform. Official OneAPI overview material explains that it provides "a common API endpoint" and "a single programming interface for the entire Zscaler platform," so automation engineers no longer need to manage different endpoints, authentication patterns, or schemas for each product.

The Zero Trust Automation at-a-glance guide further emphasizes that OneAPI "uses a single API to enable automation as an administrator," which accelerates deployment and reduces human error. Study resources summarizing OneAPI reinforce that it "simplifies integration by providing a single-entry point for accessing multiple APIs," reducing complexity and making it easier to build consistent automation across ZIA, ZPA, ZDX, and ZCC.

The other options contradict this design. OneAPI is specifically intended to avoid multiple registration processes and repeated token or authorization workflows; OAuth 2.0 is centralized via ZIdentity so that API clients authenticate once and then use scoped access across services. Therefore, the clearly documented benefit that matches the Zscaler Digital Transformation Engineer description is that OneAPI simplifies API integration by using a single entry point, making C the correct answer.

### NEW QUESTION # 40

Which of the following capabilities is not included in the OneAPI Framework for ZIA?

- A. Administrator Role Based Access
- B. Malware Settings
- **C. SCIM Enable/Disable**
- D. Web Insights Log Retrieval

**Answer: C**

Explanation:

The Zscaler OneAPI framework is presented in the Engineer curriculum as the unified automation layer for ZIA, ZPA, ZDX, Client Connector, and other services. For ZIA specifically, OneAPI introduces OAuth-based authentication, fine-grained administrator role-based access control for API clients, configuration and policy management endpoints, activation controls, and access to Insights and log retrieval APIs. The course material highlights examples such as using OneAPI to manage admin roles, automate malware and advanced-threat settings, and programmatically retrieve Web Insights logs for reporting and SIEM workflows.

In contrast, SCIM (System for Cross-domain Identity Management) is described separately as an identity- provisioning standard used to synchronize users and groups from identity providers like Azure AD or Okta.

Enabling or disabling SCIM and configuring SCIM endpoints is handled through dedicated SCIM configuration, not through the OneAPI framework. While both OneAPI and SCIM are automation-related, they are distinct interfaces in the Zscaler platform. Therefore, among the options provided, SCIM Enable

/Disable is the capability that is not part of the OneAPI Framework for ZIA, whereas administrator RBAC, Web Insights log retrieval, and malware policy settings are all explicitly included.

### NEW QUESTION # 41

What is one key benefit of deploying a Private Service Edge (PSE) in a customer's data center or office locations?

- A. It provides Zero Trust Network Access policies locally, improving user experience and reducing latency.
- B. It replaces the need for a Zscaler App Connector in the environment and simplifies the network.
- C. It eliminates the need to use Zero Trust Network Access (ZTNA) policies for internal applications.
- D. It allows users to access private applications without encryption overhead for increased performance.

**Answer: A**

Explanation:

The ZDTE study content groups Private Service Edge under Advanced Platform Services, explaining that PSEs host the same Zero Trust Exchange policy and inspection engines, but run as customer-managed service edges inside data centers or large offices. They are designed to give on-premises users a "local on-ramp" to ZIA and ZPA services while still enforcing full zero-trust policy. The documentation emphasizes that PSEs do not replace App Connectors for ZPA; connectors are still required to establish inside-out application connectivity. Nor do PSEs remove the need for ZTNA policies- those policies remain central and are simply enforced closer to the user. Encryption is also preserved end-to-end; there is no "unencrypted fast path" described in the reference architecture.

Instead, the primary benefit highlighted is performance and user experience: by enforcing ZIA/ZPA policies at a local PSE rather than a distant public service edge, organizations reduce round-trip latency and keep traffic on optimal paths while maintaining identical security and access controls.

#### NEW QUESTION # 42

What is a digital entity that would be identified by Zscaler External Attack Surface Management?

- A. Certificates installed on clients to enable SSL inspection.
- B. Lists of known compromised usernames and passwords.
- C. The IP address of a properly deployed Zscaler App Connector.
- D. A service hostname that contains revealing information.

**Answer: D**

Explanation:

Zscaler External Attack Surface Management (EASM) is focused on discovering and monitoring an organization's internet-facing digital assets. In the Engineer curriculum, EASM is described as continuously identifying domains, subdomains, hostnames, IP addresses, TLS certificates, and cloud services that are exposed to the public internet. A key example used in the training is hostnames that "leak" internal context, such as environment names, projects, technologies, or business units. These hostnames are treated as digital entities because they represent externally reachable services and can give valuable clues to an attacker during reconnaissance.

By contrast, SSL inspection certificates installed on endpoints are internal controls and not part of the external attack surface. A Zscaler App Connector is designed to initiate only outbound connections and is intentionally not directly reachable from the internet, so its IP address is not an EASM discovery target. Likewise, lists of compromised usernames and passwords relate to threat intelligence and identity protection, not the mapping of exposed assets. Therefore, the only option that correctly matches the type of digital entity EASM is meant to identify is a service hostname that contains revealing information.

#### NEW QUESTION # 43

In a typical authentication configuration, Zscaler fulfills which of the following roles?

- A. Identity provider
- B. Service provider
- C. SaaS gateway
- D. Identity proxy

**Answer: B**

Explanation:

In a typical enterprise authentication setup, Zscaler functions as the Service Provider (SP) within the SAML authentication framework. This aligns with Zscaler's architectural principle that identity verification is delegated to an external authoritative Identity Provider (IdP) such as Azure AD, Okta, Ping, or ADFS. Zscaler does not authenticate user credentials directly. Instead, it relies on the IdP to validate the user and then deliver a signed SAML assertion back to Zscaler.

When a user attempts to access the Zscaler service, the authentication request is redirected to the enterprise IdP. The IdP performs credential verification and returns a SAML assertion containing the authenticated user identity and associated attributes. Zscaler, acting as the SP, consumes and validates this assertion, then maps the identity to its internal user records or SCIM-synchronized directory objects. This identity becomes the basis for all ZIA/ZPA policy evaluation, including URL filtering, CASB controls, DLP policies, firewall rules, and access-control enforcement.

Since Zscaler depends on the IdP for primary identity verification and only consumes assertions, Zscaler's role is clearly defined as the Service Provider in a standard authentication configuration.

## NEW QUESTION # 44

.....

If you want to learn the ZDTE practice guide anytime, anywhere, then we can tell you that you can use our products on a variety of devices. As you can see on our website, we have three different versions of the ZDTE exam questions: the PDF, Software and APP online. Though the content of them are the same. But the displays are totally different. And you can use them to study on different time and conditions. If you want to know them clearly, you can just free download the demos of the ZDTE Training Materials!

**ZDTE Reliable Test Answers:** <https://www.passleader.top/Zscaler/ZDTE-exam-braindumps.html>

You can know the quality of our ZDTE guide question earlier, Our Digital Transformation Engineer ZDTE practice questions and answers highlight and heal your weaknesses, improve your time management skills, and develop the confidence to pass the real exam, Our Zscaler ZDTE valid vce is 100% based on real questions of the test and are compiled by expert team, So you have no need to trouble about our ZDTE study guide, if you have any questions, we will instantly response to you.

Modern websites have long since been able to play videos without using Flash, It will be easier for them to be persuaded by the message, You can know the quality of our ZDTE Guide question earlier.

## 2026 ZDTE Discount Code | High Hit-Rate Zscaler Digital Transformation Engineer 100% Free Reliable Test Answers

Our Digital Transformation Engineer ZDTE practice questions and answers highlight and heal your weaknesses, improve your time management skills, and develop the confidence to pass the real exam.

Our Zscaler ZDTE valid vce is 100% based on real questions of the test and are compiled by expert team, So you have no need to trouble about our ZDTE study guide, if you have any questions, we will instantly response to you.

The Zscaler ZDTE PDF is the collection of real, valid, and updated Zscaler ZDTE practice questions.
