Do you eager to find the ideal job? Do you eager to pass the CT-UT exam easily? If you want to, then you have arrived right place now. We provide authentic exam materials for CT-UT exam, and we can make your exam preparation easy with our study material various quality features. With the guidance of no less than seasoned professionals, we have formulated updated actual questions for exams, over the years. By practicing our CT-UT study materials, you are reducing your chances for failure exam. What’s more, we will give all candidates who purchased our material a guarantee that they will pass the CT-UT Exam on their very first try. If we fail to deliver our promise, we will give candidates full refund. There are thousands of candidates choose to trusted us and got paid. So, if you really eager to pass the exam, our CT-UT study materials must be your best choice.

ISTQB CT-UT Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Usability and Accessibility Standards: This part addresses the knowledge required by Compliance Officers regarding standards and guidelines that govern usability and accessibility. It introduces ISO standards like ISO 9241-110 and ISO 9241-171, manufacturer guidelines from major platforms, and web accessibility guidelines such as WCAG. It also touches on legislation relevant to accessibility requirements, such as the UK Equality Act and the Americans with Disabilities Act.
Topic 2	<ul style="list-style-type: none"> • Selecting Appropriate Methods: This domain helps Test Managers make decisions on which usability evaluation methods to apply depending on project context, resources, and maturity. It discusses criteria for selecting usability, user experience, and accessibility evaluation methods suited to different stages of development and organizational needs, including agile development scenarios.
Topic 3	<ul style="list-style-type: none"> • Risks in Usability, User Experience and Accessibility: This domain assesses the ability of Risk Analysts to identify and analyze common risks that can affect usability, user experience, and accessibility. It differentiates between product risks—such as users being unable to use a product effectively—and project risks, including lack of expertise or insufficient usability evaluation processes. Understanding these risks helps in planning effective usability testing and evaluation.
Topic 4	<ul style="list-style-type: none"> • User Surveys: This part assesses the ability of Usability Test Analysts to design and use surveys to gather user feedback on software usability. It describes how to prepare user surveys, select appropriate questionnaires, and analyze survey responses to measure user satisfaction and other quality attributes from the user’s perspective.

Topic 5	<ul style="list-style-type: none"> • Usability Reviews: This domain evaluates the skills of Usability Testers in conducting reviews of software interfaces without user involvement. It differentiates informal reviews from expert reviews and introduces heuristic evaluation as a structured method. The section describes step-by-step approaches to preparing for and conducting reviews, emphasizing the importance of consensus and clear communication of findings.

CT-UT Exams Torrent | Latest CT-UT Exam Experience

If you are preparing for an exam, it may spend lots of time, but don't worry, if you are preparing for the CT-UT exam, the product of our company will help you save your time. The product of our company will list the major key points of the CT-UT exam, and you can grasp the knowledge points as quickly as possible, therefore the time is saving. Besides, the product for CT-UT Exam also provide specific training materials for the exam. And the PDF version is convenient to read, and support printing, while the software version stimulate the real environment of the CT-UT exam. The APP online version is slao available of the product, you can learn at any time and at any place. Choosing our product, it will help you.

ISTQB Certified Tester Usability Tester Sample Questions (Q35-Q40):

NEW QUESTION # 35

A "usability requirement" is:

- A. A requirement needed to define the size of a mobile phone used in a usability test
- **B. A requirement on the usability of a component or system**
- C. A requirement how to conduct a usability test
- D. A requirement needed for a usability tester

Answer: B

Explanation:

A usability requirement specifies how usable a product or component must be, often in terms of effectiveness, efficiency, and user satisfaction, as defined in ISO 9241-11. These requirements ensure that the product meets specific human-centered design goals, such as allowing users to complete tasks accurately and quickly.

Options A and C describe procedural or test setup elements, not actual usability requirements. Option B refers to personnel qualifications, which are not the same as usability requirements related to system behavior or performance.

#####

NEW QUESTION # 36

A large customer complained that a business application developed by your company sometimes transfers the wrong amount of money to clients, although there are no complaints of the actual users. The expected amount differs from the actually transferred amount by a factor of 10 or 100. After analyzing the log files, you found out that the application itself works fine. The problem seems to be caused by confusing text fields and labels for the decimal place, leading to user errors.

Which usability risk should be reasonably addressed for the next release?

- A. Users resist using a software product which is essential for their daily work because it lacks usability
- B. Users buy the software product but repeatedly need to call support because they don't understand how to use it
- C. Users won't buy or use the software product because it lacks effectiveness, efficiency or satisfaction
- **D. Increased liability through risk to financial loss caused by a poorly designed or deceptive user interface**

Answer: D

Explanation:

The scenario describes a situation where the interface misleads users into making serious financial mistakes due to poor design, such as confusing decimal separators. Even though the system functions correctly, it facilitates critical user errors. This constitutes a major

usability risk with potential legal and financial consequences. Therefore, the correct risk to address is increased liability due to financial loss caused by a poorly designed or deceptive interface (option D). The other options focus on usability-related dissatisfaction, resistance, or lack of adoption, which are not the key concern in this scenario.

#####

NEW QUESTION # 37

Which of the following is the highest WCAG conformance level, promising the most accessible content?

- A. Single A (A)
- B. Quadruple A (AAAA)
- C. Triple A (AAA)
- D. Double A (AA)

Answer: C

Explanation:

The Web Content Accessibility Guidelines (WCAG) define three levels of conformance for web content accessibility:

Level A (Single A) is the minimum level of compliance.

Level AA (Double A) is the standard recommended for most websites, balancing accessibility and design.

Level AAA (Triple A) is the highest and most comprehensive level of accessibility, covering the widest range of needs.

There is no such level as "Quadruple A (AAAA)," making option D invalid.

Thus, WCAG Triple A (AAA) promises the most accessible content, even though it may not always be practically achievable for all types of content.

#####

NEW QUESTION # 38

Which of the following are advantages of using a usability lab?

- i. The context is natural
- ii. Test sessions are easy to observe
- iii. Inexpensive setup
- iv. Similar conditions for all sessions
- v. Easy recording of sessions

- A. ii & iv are true, i, iii & v are false
- B. iii, iv & v are true, i & ii are false
- C. i, ii & v are true, iii & iv are false
- D. ii, iv & v are true, i & iii are false

Answer: D

Explanation:

Usability labs provide a controlled environment that offers several advantages for observing and recording usability test sessions. Specifically, they allow for easy observation of participants (ii), standardized conditions for each session (iv), and facilitate audio and video recording for detailed analysis (v). However, the context is not natural (i), because the lab is an artificial setting rather than the user's actual environment.

Also, setting up a professional usability lab is not inexpensive (iii); it typically involves significant costs for equipment, space, and staffing. Therefore, options ii, iv, and v are true, while i and iii are false.

#####

NEW QUESTION # 39

Usability reviews aim to identify potential usability problems based on certain criteria. Which of the following is a reasonable criterion for a usability review?

- A. Functional requirements
- **B. Usability standards**
- C. Statutory Code of Practice
- D. Opinion of the management

Answer: B

Explanation:

Usability reviews evaluate a system or interface against established usability principles or standards to identify potential issues before user testing. A recognized criterion for such reviews includes adherence to usability standards such as ISO 9241 or the Web Content Accessibility Guidelines (WCAG). These standards are derived from years of research and user-centered design principles. Options A and C do not directly relate to usability. Functional requirements (option B) refer to what the system should do, not how usable it is.

Hence, option D is correct as usability standards provide a consistent, objective basis for evaluating usability.
