Snowflake ADA-C02 Exam | ADA-C02 Reliable Dumps - Full Refund if Failing ADA-C02: SnowPro Advanced Administrator ADA-C02 Exam

After successful competition of the ADA-C02 certification, the certified candidates can put their career on the right track and achieve their professional career objectives in a short time period. However, to pass the ADA-C02 Exam you have to prepare well. For the quick ADA-C02 exam preparation the ADA-C02 Questions are the right choice.

Snowflake SnowPro Advanced Administrator ADA-C02 Sample Questions (Q37-Q42):

NEW QUESTION # 37

When does auto-suspend occur for a multi-cluster virtual warehouse?

- A. When there has been no activity on any cluster for the specified period of time.
- B. After a specified period of time when an additional cluster has started on the maximum number of clusters specified for a warehouse.
- C. Auto-suspend does not apply for multi-cluster warehouses.
- **D. When the minimum number of clusters is running and there is no activity for the specified period of time.**

Answer: D

Explanation:

For a multi-cluster virtual warehouse, auto-suspend only triggers when the minimum number of clusters is running and there has been no activity for the specified period. Additional clusters above the minimum scale back down automatically, but suspension of the entire warehouse occurs only when the base minimum is idle.

NEW QUESTION # 38

An organization's sales team leverages this Snowflake query a few times a day:

```
SELECT CUSTOMER_ID, CUSTOMER_NAME, ADDRESS, PHONE_NO  
FROM CUSTOMERS  
WHERE LAST_UPDATED BETWEEN TO_DATE(CURRENT_TIMESTAMP) AND  
(TO_DATE(CURRENT_TIMESTAMP)-7);
```

What can the Snowflake Administrator do to optimize the use of persisted query results whenever possible?

- A. Leverage the **CURRENT_DATE** function for date calculations.
- B. Assign everyone on the sales team to the same security role.
- C. Assign everyone on the sales team to the same virtual warehouse.
- D. Wrap the query in a User-Defined Function (UDF) to match syntax execution.

Answer: A

Explanation:

Query result caching in Snowflake requires queries to be textually identical. Using **CURRENT_TIMESTAMP** causes queries to differ on each execution. By switching to **CURRENT_DATE**, the query becomes stable within a day, allowing Snowflake to reuse persisted results and improve performance.

NEW QUESTION # 39

A team of developers created a new schema for a new project. The developers are assigned the role **DEV_TEAM** which was set up using the following statements:

```
USE ROLE SECURITYADMIN;  
CREATE ROLE DEV_TEAM;  
GRANT USAGE, CREATE SCHEMA ON DATABASE DEV_DB01 TO ROLE DEV_TEAM;  
GRANT USAGE ON WAREHOUSE DEV_WH TO ROLE DEV_TEAM;
```

Each team member's access is set up using the following statements:

```
USE ROLE SECURITYADMIN;  
CREATE ROLE JDOE_PROFILE;  
CREATE USER JDOE LOGIN_NAME = 'JDOE' DEFAULT ROLE='JDOE_PROFILE';  
GRANT ROLE JDOE_PROFILE TO USER JDOE;  
GRANT ROLE DEV_TEAM TO ROLE JDOE_PROFILE;
```

New tables created by any of the developers are not accessible by the team as a whole.

How can an Administrator address this problem?

- A. Assign ownership privilege to **DEV_TEAM** on the newly-created schema.
- B. Set up future grants on the newly-created schemas.
- C. Set up the new schema as a managed-access schema.
- D. Assign usage privilege on the virtual warehouse **DEV_WH** to the role **JDOE_PROFILE**.

Answer: B

Explanation:

Future grants allow privileges to be automatically granted on objects created in the future within a schema. By configuring future grants on the schema, privileges such as **SELECT** can automatically be granted to the **DEV_TEAM** role whenever new tables are created. This ensures that all developers using the **DEV_TEAM** role can access newly created tables without requiring manual privilege grants after each table creation.

NEW QUESTION # 40

Which statement allows a Snowflake Administrator to retrieve the network policy applied to their Snowflake account?

- A. **DESC NETWORK POLICY <policy_name>;**
- B. **SHOW NETWORK POLICIES IN ACCOUNT;**
- C. **SHOW NETWORK POLICIES;**
- D. **SHOW PARAMETERS LIKE 'NETWORK POLICY' IN ACCOUNT;**

Answer: D

Explanation:

The network policy applied at the account level is stored as an account parameter. Using a SHOW PARAMETERS command with the filter for NETWORK POLICY at the account scope returns the currently configured value, which identifies the network policy associated with the account.

NEW QUESTION # 41

Which type of listing in the Snowflake Marketplace can be added and queried immediately?

- A. Standard listing
- B. Monetized listing
- C. Regional listing
- D. Personalized listing

Answer: A

Explanation:

A standard listing in the Snowflake Marketplace can be immediately added to an account and queried without requiring provider approval or additional setup.

NEW QUESTION # 42

.....

You can absolutely assure about the high quality of our products, because the contents of ADA-C02 training materials have not only been recognized by hundreds of industry experts, but also provides you with high-quality after-sales service. Before purchasing ADA-C02 exam torrent, you can log in to our website for free download. Whatever where you are, whatever what time it is, just an electronic device, you can practice. With SnowPro Advanced Administrator ADA-C02 study questions, you no longer have to put down the important tasks at hand in order to get to class; with ADA-C02 Exam Guide, you don't have to give up an appointment for study. Our study materials can help you to solve all the problems encountered in the learning process, so that you can easily pass the exam.
