

DevOps-Foundation Popular Exams & DevOps-Foundation Training Courses

BTW, DOWNLOAD part of Prep4SureReview DevOps-Foundation dumps from Cloud Storage: <https://drive.google.com/open?id=1bq7uLcUrG3CpJhbwQheCOhh7zjcIMv4R>

In the matter of quality, our DevOps-Foundation practice engine is unsustainable with reasonable prices. Despite costs are constantly on the rise these years from all lines of industry, our DevOps-Foundation learning materials remain low level. That is because our company beholds customer-oriented tenets that guide our everyday work. The achievements of wealth or prestige is no important than your exciting feedback about efficiency and profession of our DevOps-Foundation Practice Engine. So our DevOps-Foundation practice materials are great materials you should be proud of and we are!

Prep4SureReview's DevOps-Foundation certification is a dispensable part in IT area. So how can we achieve it in a short time? Prep4SureReview will be your choice. DevOps-Foundation test training materials of Prep4SureReview are organized by experienced IT experts. If you still worry, you can download DevOps-Foundation free demo before purchase.

DevOps-Foundation Training Courses - DevOps-Foundation Free Braindumps

Peoplecert DevOps-Foundation Exam candidates all know the Peoplecert DevOps-Foundation exam is not easy to pass. But it is also the only way to success, so they have to choose it. In order to improve the value of your career, you must pass this certification exam. The exam questions and answers designed by Prep4SureReview contain different targeted, and have wide coverage. There is no any other books or other information can transcend it. The question bprovided by Prep4SureReview definitely ace exam questions and answers that help you pass the exam. The results many people used prove that Prep4SureReview success rate of up to 100%. Prep4SureReview is the only way that suits you to pass the exam, choose it equal to create a better future.

Peoplecert DevOps-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Key DevOps Practices: This section of the exam measures the skills of DevOps engineers and covers core DevOps practices including Continuous Integration, Continuous Testing, Continuous Delivery, and Continuous Deployment. It explores concepts such as Site Reliability Engineering, DevSecOps, Value Stream Management, Platform Engineering, and modern practices like ChatOps and observability.
Topic 2	<ul style="list-style-type: none">• Measurement, Metrics, and Reporting: This section of the exam measures the skills of DevOps engineers and covers metrics that help monitor and evaluate the performance of DevOps practices. Topics include speed, quality, culture, change lead time, cycle time, and the use of dashboards, value-driven metrics, and AIOps in reporting and decision-making.

Topic 3	<ul style="list-style-type: none"> Automation, Architecting DevOps Toolchains: This section of the exam measures the skills of IT operations specialists and covers key automation principles within the DevOps toolchain. It focuses on CI CD pipelines, Infrastructure as Code, containerisation, cloud-native architecture, platform engineering, and emerging technologies like Machine Learning and Generative AI in DevOps contexts.
Topic 4	<ul style="list-style-type: none"> Culture, Behaviours, Operating Models: This section of the exam measures the skills of DevOps engineers and covers how to assess and evolve organisational culture in relation to DevOps transformation. It includes concepts such as Cultural Debt, Behavioural Models, and Organisational Maturity, helping professionals understand team dynamics and readiness for change.

Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q80-Q85):

NEW QUESTION # 80

In the context of DevOps, which is an effective approach when selecting tools?

- A. Standardize on a single vendor's platform
- **B. Establish a toolchain**
- C. Encourage both Dev and Ops individually select the best tools for their own needs
- D. Focus on testing first

Answer: B

Explanation:

The most effective approach to tool selection in DevOps is to establish a toolchain-a set of integrated tools that support the end-to-end lifecycle (planning, coding, building, testing, releasing, deploying, operating, and monitoring).

This encourages consistency, automation, and traceability, while still allowing flexibility for teams.

Why not standardize on one vendor?

This reduces flexibility, can cause vendor lock-in, and doesn't support the varied needs of Dev and Ops teams.

Encouraging independent selection (C) increases fragmentation.

Focusing solely on testing (D) ignores the broader lifecycle.

Extract-style reference:

"Establishing an integrated toolchain provides end-to-end visibility and automation across the software delivery pipeline, aligning tools with process and cultural change."

- State of DevOps Report; DevOps Handbook

PeopleCert DevOps Foundation v3.6: Recommends a toolchain approach for supporting collaborative DevOps practices.

NEW QUESTION # 81

What is NOT a feature of Safety Culture?

- **A. Creating Single Points of Failures (SPOFs)**
- B. Valuing incidents
- C. Giving thanks for learning opportunities
- D. Blameless post-mortems

Answer: A

Explanation:

Creating Single Points of Failure (SPOFs) is not a feature of Safety Culture-in fact, it's the opposite.

* Safety Culture in DevOps promotes blameless post-mortems, valuing incidents as learning opportunities, and thanking contributors for uncovering weaknesses.

* SPOFs increase risk and discourage experimentation.

Extract-style reference:

"Safety Culture is built on blamelessness, psychological safety, and learning from failure, not punishment.

SPOFs are an anti-pattern that increases fragility."

-The DevOps Handbook

PeopleCert DevOps Foundation v3.6: Stresses the importance of a safe, collaborative environment for innovation.

NEW QUESTION # 82

The last release of a critical application contained an error that significantly impacted the business. While the error was detected immediately after release, the situation was not resolved in a timely manner. During the retrospective, it was identified that many of the delays were the result of poor communication and collaboration between development and operational teams.

What steps could the IT organization take to improve its response and resolution in the future?

- A. Implement chat platforms for faster access and collaboration
- B. Increase the number of people that are alerted when an error occurs
- C. Use social media to communicate between teams
- D. Introduce self-help tools to empower users to solve their own problems

Answer: A

Explanation:

Poor communication and collaboration slow incident resolution. DevOps emphasizes fast, transparent communication channels between Dev, Ops, and other stakeholders. Implementing chat platforms (e.g., Slack, Microsoft Teams) that integrate with monitoring, alerting, and deployment tools enables:

- * Real-time collaboration across geographically distributed teams
- * Immediate sharing of incident context and system data
- * Faster decision-making and coordinated action

A (alerting more people) risks causing noise without improving targeted response. B (social media) is not secure or appropriate for enterprise incident management. C (self-help tools) benefits end-users but does not address Dev-Ops collaboration.

Thus, D provides the most direct and effective improvement in communication for faster incident resolution.

NEW QUESTION # 83

Which of The Three Ways increases the flow of work from left to right?

- A. All of the above
- B. The Third Way
- C. The First Way
- D. The Second Way

Answer: C

Explanation:

The "Three Ways" are foundational principles in DevOps:

- * The First Way focuses on increasing the flow of work from left (development) to right (operations). It is about optimizing the entire system for fast delivery, limiting bottlenecks, and enabling a rapid flow of features and fixes to customers.
- * The Second Way is about amplifying feedback loops so corrections can be made early.
- * The Third Way emphasizes continual learning and experimentation.

Extract-style reference:

"The First Way emphasizes the performance of the entire system, as opposed to the performance of a specific silo of work or department. The goal is to maximize the flow of work (value) from Development to Operations to the customer."

-Gene Kim, The Phoenix Project / DevOps Handbook

PeopleCert DevOps Foundation v3.6 highlights this in the section on "Principles and Practices," emphasizing The First Way as critical to accelerating flow.

NEW QUESTION # 84

What are the CORRECT set of DevOps values?

- A. Culture, Automation, Lean, Measurement, Sharing
- B. Culture, Collaboration, Communication, Commitment
- C. Culture, Automation, Lean, Metrics, Sharing
- D. Culture, Accountability, Lean, Metrics, Sharing

Answer: A

Explanation:

According to PeopleCert DevOps Foundation v3.6, the five primary values that guide successful DevOps adoption are summarized in the CALMS framework: Culture, Automation, Lean, Measurement, and Sharing.

* Culture focuses on breaking down silos, encouraging trust, and promoting collaboration between development, operations, security, QA, and business teams.

* Automation is essential for speeding up delivery, reducing manual errors, and ensuring repeatability across the software delivery lifecycle.

* Lean emphasizes the elimination of waste, limiting work in progress (WIP), and improving flow.

* Measurement means using metrics and data to inform decisions, identify bottlenecks, and drive continuous improvement.

* Sharing fosters transparency, knowledge transfer, and a unified approach to goals and problem-solving.

Option A replaces automation and lean principles with softer collaboration aspects, which are important but not recognized as the formal value set. Option C replaces "Measurement" with "Metrics," which is only a part of measurement. Option D substitutes "Accountability" for "Automation," which is not part of the CALMS model.

Therefore, the official correct set of values per the DevOps Foundation syllabus is B.

NEW QUESTION # 85

.....

Prep4SureReview is a website that provides the counseling courses for IT professionals to participate in PeopleCert certification DevOps-Foundation exam and help them get the PeopleCert DevOps-Foundation certification. The courses of Prep4SureReview are developed by experienced experts' extensive experience and expertise and the quality is very good and have a very fast update rate. Besides, exercises we provide are very close to the real exam questions, almost the same. When you select Prep4SureReview, you are sure to 100% pass your first time to participate in the difficult and critical PeopleCert Certification DevOps-Foundation Exam.
