

Practice NS0-528 Test Engine - NS0-528 Exam Questions Pdf

P.S. Free & New NS0-528 dumps are available on Google Drive shared by PrepAwayExam: https://drive.google.com/open?id=1zegsZ5OjBmNW48O-wp7ew_OjWAG7Xkiy

To pass the certification exam, you need to select right NS0-528 study guide and grasp the overall knowledge points of the real exam. The test questions from our NS0-528 dumps collection cover almost content of the exam requirement and the real exam. Trying to download the free demo in our website and check the accuracy of NS0-528 Test Answers and questions. Getting certification will be easy for you with our materials.

Network Appliance NS0-528 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Data Protection Solutions: This section of the exam measures the skills of Storage Architects and covers the foundational principles of designing data protection solutions. It focuses on creating comprehensive design documentation, understanding the various components involved, and identifying all critical solution dependencies to ensure a robust and reliable data protection strategy.
Topic 2	<ul style="list-style-type: none">NetApp Data Protection Software: This section of the exam measures the skills of DevOps Engineers and focuses on the deployment and administration of NetApp's proprietary data protection software. A key part of this domain involves applying these solutions to protect modern containerized applications running in Kubernetes environments.
Topic 3	<ul style="list-style-type: none">NetApp ONTAP Core Data Protection Features: This section of the exam measures the skills of Systems Administrators and validates core knowledge of data protection and redundancy within the ONTAP environment. It encompasses understanding how data efficiencies impact protection strategies and the practical knowledge required to deploy these data protection solutions effectively in a hybrid cloud infrastructure.
Topic 4	<ul style="list-style-type: none">Troubleshooting and Testing: This section of the exam measures the skills of Support Engineers and focuses on the practical skills needed to maintain data integrity. It involves troubleshooting common data protection configuration issues, executing well-defined Disaster Recovery (DR) procedures, and performing data restore operations to recover from data loss.
Topic 5	<ul style="list-style-type: none">NetApp ONTAP Business Continuity Solutions: This section of the exam measures the skills of Disaster Recovery Specialists and covers advanced business continuity technologies. This includes the configuration and operation of SnapMirror active sync for continuous data replication and the execution of SVM-DR (Storage Virtual Machine Disaster Recovery) operations to ensure high availability.

Professional Practice NS0-528 Test Engine Help You to Get Acquainted with Real NS0-528 Exam Simulation

Before the clients decide to buy our NS0-528 test guide they can firstly be familiar with our products. The clients can understand the detailed information about our products by visiting the pages of our products on our company's website. Firstly you could know the price and the version of our Implementation Engineer - Data Protection Exam study question, the quantity of the questions and the answers, the merits to use the products, the discounts, the sale guarantee and the clients' feedback after the sale. Secondly you could look at the free demos to see if the questions and the answers are valuable. You only need to fill in your mail address and you could download the demos immediately. So you could understand the quality of our NS0-528 Certification file.

Network Appliance Implementation Engineer - Data Protection Exam Sample Questions (Q33-Q38):

NEW QUESTION # 33

You have a large 2PiB flexgroup that will need to be failed over to a DR site for a weekend due to maintenance work at the original site. To speed up time to return to normal operations the Storage Administrator will use the -quick-resync true option when reversing the SnapMirror relationship.

What needs to be taken into consideration when it comes to using quick resync?

- A. All storage efficiencies are done in line with the SnapMirror
- B. All storage efficiencies will be preserved
- C. All storage efficiencies will be ignored
- D. All storage efficiencies will be lost on the source

Answer: D

Explanation:

When using the -quick-resync true option in SnapMirror, storage efficiencies such as deduplication and compression are not preserved on the original source during resync. This means that efficiencies will be lost on the source volume, and data will be rehydrated to its full form during transfer.

NEW QUESTION # 34

You have set up a SnapMirror relationship between two SVMs for data protection. The data in the source volume is unavailable due to an event related to a virus infection leading to data corruption.

In this scenario, which three actions are required to activate the SnapMirror destination volume and provide data access to the users? (Choose three.)

- A. Disable the source volume by taking it offline.
- B. Verify the status of the source and destination volumes.
- C. Configure the destination volume for data access.
- D. Perform a SnapMirror quiesce operation.
- E. Perform a SnapMirror break operation.

Answer: B,C,E

NEW QUESTION # 35

A customer is running NetApp ONTAP 9.14.1 software and asks you to protect some data in a way that even disk zeroing cannot delete.

Which command enforces the requirement?

- A. aggregate create -snaplock-type compliance
- B. volume create -snaplock-type enterprise
- C. aggregate create -snaplock-type enterprise
- D. volume create -snaplock-type compliance

Answer: D

Explanation:

The SnapLock Compliance mode provides WORM (Write Once, Read Many) protection that is irrevocable, even by administrators, and not removable by disk zeroing or reinitialization. This satisfies stringent regulatory and tamper-proof data protection requirements.

NEW QUESTION # 36

You are asked to implement a DR solution to protect employee home directories on the primary cluster. The solution should provide an RPO of one hour, disaster recovery and archiving configured on the same destination volume of the DR cluster. Your solution should also reduce the amount of secondary storage requirements and use lower network traffic on the WAN links. In this scenario, which NetApp replication technology satisfies these requirements?

- **A. SnapMirror**
- B. MetroCluster
- C. SnapMirror-Sync
- D. SyncMirror

Answer: A

NEW QUESTION # 37

A volume has been filled completely by active data and Snapshot copies. What must you do to make the volume writable again?

- A. Modify the Snapshot reserve.
- **B. Delete enough Snapshot copies until space is available.**
- C. Delete any SnapMirror relationships.
- D. Delete files in the active file system.

Answer: B

NEW QUESTION # 38

.....

There are Implementation Engineer - Data Protection Exam (NS0-528) exam questions provided in Implementation Engineer - Data Protection Exam (NS0-528) PDF questions format which can be viewed on smartphones, laptops, and tablets. So, you can easily study and prepare for your Implementation Engineer - Data Protection Exam (NS0-528) exam anywhere and anytime. You can also take a printout of these Network Appliance PDF Questions for off-screen study. To improve the Implementation Engineer - Data Protection Exam (NS0-528) exam questions, PrepAwayExam always upgrades and updates its NS0-528 dumps PDF format and it also makes changes according to the syllabus of the Implementation Engineer - Data Protection Exam (NS0-528) exam.
