

Plat-Dev-210 Reasonable Exam Price | Reliable Plat-Dev-210 Braindumps Sheet

What's more, part of that TestKingIT Plat-Dev-210 dumps now are free: https://drive.google.com/open?id=1kzeFBgU7D_L4b37a5OOSN5WZGMFDQo0i

This Plat-Dev-210 certification assists you to put your career on the right track and helps you to achieve your career goals in a short time period. There are several personal and professional benefits that you can gain after passing the Salesforce Certified Omnistudio Developer (Plat-Dev-210) certification exam. The prominent Plat-Dev-210 certification benefits include validation of skills and knowledge, more career opportunities, instant rise in salary, quick promotion, etc.

Salesforce Plat-Dev-210 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Omnistudio Data Mappers: This part of the exam measures the skills of a Data Engineer and focuses on the use of Omnistudio Data Mappers for extracting, transforming, and loading data. It includes identifying the appropriate Data Mapper for a given requirement, as well as determining the necessary Extract, Load, Transform, and Turbo Extract functionalities based on specific use cases. This section ensures the candidate can effectively map and manipulate data to support business processes.
Topic 2	<ul style="list-style-type: none">• Omniscritps: This portion of the exam measures the skills of a Business Analyst and focuses on the use of OmniScripts to create dynamic, guided user experiences. It includes comparing and contrasting various OmniScript elements and their configurations to fulfill given use cases. The section also examines the candidate's understanding of the JSON structure that supports OmniScripts, as well as the ability to select appropriate elements and properties to address functional requirements effectively.
Topic 3	<ul style="list-style-type: none">• Expression Sets & Decision Matrices: This section measures the skills of a Logic Designer and covers the configuration and application of Expression Sets and Decision Matrices within Omnistudio tools. It requires demonstrating an understanding of how Expression Sets evaluate conditions and how Decision Matrices use rule-based logic to determine outcomes. This knowledge is essential for automating decisions and streamlining complex business processes.

Topic 4	<ul style="list-style-type: none"> • Integrated Troubleshooting and Deployment: This final section measures the skills of a Support Engineer and focuses on identifying and resolving issues within Omnistudio tools. It involves diagnosing errors based on given scenarios and determining where breakdowns occur in the data flow for specific customer issues. This ensures the candidate can effectively troubleshoot, debug, and maintain solutions to ensure optimal performance and reliability.

Reliable Plat-Dev-210 Braindumps Sheet, Test Plat-Dev-210 Collection

As you see, all of the three versions are helpful for you to get the Plat-Dev-210 certification: the PDF, Software and APP online. So there is another choice for you to purchase the comprehensive version which contains all the three formats, it is the Value Pack. Besides, the price for the Value Pack is quite favorable. And no matter which format of Plat-Dev-210 study engine you choose, we will give you 24/7 online service and one year's free updates on the Plat-Dev-210 practice questions.

Salesforce Certified Omnistudio Developer Sample Questions (Q93-Q98):

NEW QUESTION # 93

A developer needs to create DataRaptor to retrieve the name of an account for a contact. Following best practices, how should a developer configure the extraction steps?

- A. Define extraction steps for the Contact and the Account objects, and set the Extract JSON Path to Contact.Account.Name
- **B. Define an extraction step for the Contact object and set the Extract JSON Path to Contact.Account.Name**
- C. Define an extraction step for the Account object, and set the Extract JSON Path to Account.Contact.Name
- D. Define extraction steps for the Contact and the Account objects, and set the Extract JSON Path to Account.Name

Answer: B

Explanation:

A DataRaptor Extract can retrieve data from multiple objects using extraction steps and JSON paths. However, if the data is from a single object, only one extraction step is needed. The Extract JSON Path can use dot notation to access related fields from that object, such as Contact.Account.Name.

NEW QUESTION # 94

A developer creates an Integration Procedure with a Set values and a DataRaptor Extract Action that requires AccountId as a key. When the developer previews the Integration Procedure, the developer enters the AccountId correctly and executes the preview. The developer sees the data extracted by the DataRaptor in the Debug Log, but the response is empty. What is the likely cause of this issue?

- A. A Response Action was not added to the Integration Procedure.
- B. The AccountId used for the preview is invalid.
- C. The Response cannot be previewed directly.
- **D. The DataRaptor Action did not have the Add Response To Response JSON property set to true.**

Answer: D

Explanation:

The Add Response To Response JSON property on the DataRaptor Action indicates that the output of the DataRaptor should be added to the response JSON of the Integration Procedure. If this property is not set to true, the response will be empty even if the DataRaptor extracts data successfully.

NEW QUESTION # 95

On a FlexCard canvas, several fields display with Salesforce data, but one of the fields shows only the label. What could cause this?

- A. There are No test Data test Parameters configured.
- **B. The field name in the FlexCard state does not match the DataRaptorExtract's Output JSON Path name.**
- C. In the Setup Pabel, {recordId} is misspelled in the Data Source Input Map.
- D. In the FlexCard state, the Field type for the field does not match the type in the Salesforce record.

Answer: B

Explanation:

According to the FlexCard Designer Overview page, one possible cause of a field showing only the label is that "the field name in the FlexCard state does not match the DataRaptor Extract's Output JSON Path name".

NEW QUESTION # 96

A developer configures a Flexcard with a DataRaptor data source that uses the params.id as an. When the developer clicks Views Data on the FlexCard, valid data displays. However, when the developer previews the layout, the FlexCard does not display. What could cause this error?

Choose 2 answers

- **A. There is not Salesforce record for the FlexCard based on the Record Id in the layout's Test Data Source Settings.**
- B. The Record Id in the Test Data Source settings ins for the wrong record type.
- C. The attribute hasn't been configured to pass the data to the fields.
- **D. The Data Node field for the FlexCard is empty.**

Answer: A,D

Explanation:

The Data Node field for the FlexCard is required to specify which data source will be used to populate the FlexCard. If it is empty, the FlexCard will not display any data. The Record Id in the Test Data Source settings is used to preview the layout with a specific record. If there is no Salesforce record for that Record Id, the FlexCard will not display any data either.

NEW QUESTION # 97

A developer creates a DataRaptor Extract to retrieve data to pass to an external service. The external service expects the field value to be an integer. However, the DataRaptor is sending it as a string.

Which action can the developer take to fix this?

- A. In the DataRaptor Extract tab, set the Input Data Type field to Integer.
- B. In the DataRaptor Output tab, select the Output Data Type of that field to Integer.
- C. In the DataRaptor Output tab, enter the default value as 0 on the field.
- **D. In the DataRaptor Formula tab, define a formula using the function TOINTEGER and use the formula as output.**

Answer: D

Explanation:

The DataRaptor Formula tab allows the developer to define formulas using functions and operators to manipulate data. The TOINTEGER function converts a string value to an integer value. The developer can use this function to output the field value as an integer and use the formula as output

NEW QUESTION # 98

.....

The Plat-Dev-210 exam questions given in this desktop Salesforce Certified Omnistudio Developer (Plat-Dev-210) practice exam software are equivalent to the actual Salesforce Certified Omnistudio Developer (Plat-Dev-210) exam.
