Because we never stop improve our AACE-PSP practice guide, and the most important reason is that we want to be responsible for our customers. So we create the most effective and accurate AACE-PSP Exam Brindumps for our customers and always consider carefully for our worthy customer.

### AACE International Planning & Scheduling Professional (PSP) Exam Sample Questions (Q217-Q222):

#### NEW QUESTION # 217

Using the "normal" schedule, and assuming you are billing on the last day of the month for previous month and for appropriate partial months, how many invoices will you have for this project?

- A. 40.
- B. 42.
- C. 36.
- D. 37.

**Answer: C**

#### NEW QUESTION # 218

Which of the following is NOT input data to the construction planning process?

- A. The contract
- B. Input from the owner
- C. Input from the contractor
- D. Bonding capacity of subcontractors

**Answer: D**

Explanation:

\* Input Data for Construction Planning:

Construction planning relies on data from the owner, contractor, and contract terms to establish project parameters.

Bonding capacity is not typically part of the planning inputs but rather a procurement and contractual concern.

\* PSP Study Guide Reference:

Key inputs include project requirements, constraints, and stakeholder inputs as outlined in the PSP guide.

\* Conclusion: The correct answer is C, as bonding capacity is not a direct input to the construction planning process.

#### NEW QUESTION # 219

Who will receive the most benefit from a master schedule of the Spring Highway project?

- A. SDOT
- B. ALPHA
- C. GOUGE. Inc
- D. BILCO

**Answer: A**

Explanation:

\* SDOT, as the project owner or primary stakeholder, benefits most from a master schedule as it provides an overview of progress, resource allocation, and critical path analysis for the entire project.

\* Contractors (e.g., BILCO) may rely on more detailed schedules specific to their scope rather than the overall master schedule.

\* Reference: PSP Study Guide, Section 2.4.8 - Management Summary, which explains how master schedules are valuable to owners and stakeholders for overall project oversight.

### NEW QUESTION # 220

For the late finish for Activity 11001, select the most appropriate response for transitioning from the forward pass.

- A. LS.11001 + 25 days.
- B. EF.11001.
- C. EF.11001 + 1 day.
- D. 02-19-04.

**Answer: D**

### NEW QUESTION # 221

In an earned value-based system, a schedule performance index of less than one for the project indicates the project is:

- A. behind schedule
- B. on schedule
- C. ahead of schedule
- D. complete

**Answer: A**

Explanation:

\* Understanding Schedule Performance Index (SPI):

SPI is calculated as  $SPI = \frac{BCWP}{BCWS}$ , where BCWP is the budgeted cost of work performed, and BCWS is the budgeted cost of work scheduled.

$SPI < 1$  indicates that the project is progressing slower than planned, meaning it is behind schedule.

\* Evaluation of Other Options:

A:  $SPI > 1$  would indicate the project is ahead of schedule.

B:  $SPI = 1$  implies the project is on schedule.

C: Completion is not relevant to SPI.

\* Verification with PSP Guidelines:

PSP emphasizes SPI as a key metric in earned value management (Ref: PSP Study Guide, Chapter 1D: Earned Value Analysis).

### NEW QUESTION # 222

.....

The Planning & Scheduling Professional (PSP) Exam (AACE-PSP) exam questions are real, valid, and verified by AACE International AACE-PSP certification exam trainers.
