SAP C-CPI-2506 Questions Are Designed By Experts

Maybe you are still having trouble with the SAP C-CPI-2506 exam, maybe you still don't know how to choose the C-CPI-2506 exam materials; maybe you are still hesitant. But now, your search is ended as you have got to the right place where you can catch the finest C-CPI-2506 exam materials. Here you can answer your doubts; you can easily pass the exam on your first attempt. All applicants who are working on the C-CPI-2506 exam are expected to achieve their goals, but there are many ways to prepare for exam. Everyone may have their own way to discover. Some candidates may like to accept the help of their friends or mentors, and some candidates may only rely on some C-CPI-2506 books. But none of these ways are more effective than our C-CPI-2506 exam material. In summary, choose our exam materials will be the best method to defeat the exam.

SAP Certified Associate - Integration Developer Sample Questions (Q53-Q58):

NEW QUESTION # 53

Where can you find more information about APIs, policies, and integrations?

- A. Open Connectors capability within SAP Integration Suite
- B. Cloud Integration capability within SAP Integration Suite
- C. SAP Business Accelerator Hub

Answer: C

Explanation:

You can find more information about APIs, policies, and integrations in the SAP Business Accelerator Hub. The SAP Business Accelerator Hub is a central place where you can discover, explore, and consume pre-built integrations, APIs, and best practices for various business scenarios and industries. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 54

What are some advantages of the cloud integration capability within SAP Integration Suite? Note: There are 2 correct answers to this question.

- A. Customer-to-Customer(C2C) integrations can be developed
- B. Integration processes can be developed offline.
- C. Predefined scenarios can be used out-of-the-box.
- D. A local installation is not required.

Answer: C,D

Explanation:

Some advantages of the cloud integration capability within SAP Integration Suite are:

A local installation is not required. The cloud integration capability is a cloud-based service that runs on SAP Business Technology Platform (BTP). It does not require any installation or maintenance on your local system. You can access it from any web browser and start developing and deploying integration flows using a graphical user interface or an Eclipse-based tooling.

Predefined scenarios can be used out-of-the-box. The cloud integration capability provides a rich set of predefined integration scenarios that cover various use cases and domains, such as SAP-to-SAP integration, SAP-to-non-SAP integration, hybrid integration, process orchestration, and so on. You can browse and discover these scenarios from the Discover page of the cloud integration web UI or from the SAP API Business Hub. You can use these scenarios as they are or customize them according to your needs. Reference: Cloud Integration Capability Overview | SAP Help Portal, Discover Integration Content | SAP Help Portal

NEW QUESTION # 55

Which of the following does SAP Graph provide?

- **A. Unified view of SAP-managed business data**
- B. Unified cache of SAP-managed business data
- C. Abstraction of business data for end users

Answer: A

Explanation:

SAP Graph provides a unified API layer that offers a business-centric, semantically harmonized view of SAP-managed data across multiple SAP solutions (e.g., S/4HANA, SuccessFactors, Ariba).

It does not cache data; instead, it provides real-time access.

It is not only an abstraction for end users, but specifically designed as a unified view for developers and applications.

Thus, the correct answer is Unified view of SAP-managed business data.

NEW QUESTION # 56

How do you configure a SOAP adapter for asynchronous processing?

- A. Message Exchange Pattern: Request-Reply. Process Settings: WS Standard
- B. Message Exchange Pattern: One-Way. Process Settings: WS Standard
- C. Message Exchange Pattern: Request-Reply. Process Settings: Robust
- **D. Message Exchange Pattern: One-Way. Process Settings: Robust**

Answer: D

Explanation:

For asynchronous processing in a SOAP adapter (SAP Cloud Integration):

Use Message Exchange Pattern = One-Way # Indicates no response is expected.

Choose Process Settings = Robust # Ensures message reliability and error handling in async flows.

Other combinations:

Request-Reply # Used for synchronous scenarios, not async.

WS Standard # Not the correct configuration for async reliability in CPI SOAP adapter.

Thus, correct async configuration is: One-Way + Robust.

NEW QUESTION # 57

Which SAP Integration Suite component delivers the Cloud Event to the "emis-s4hana-uc123" message queue?

- **A. Event Mesh**
- B. API Management
- C. Process Integration
- D. Open Connector

Answer: A

Explanation:

In SAP Integration Suite, the component responsible for delivering Cloud Events to message queues is Event Mesh.
