Our SCP-NPM study guide is known as instant download, once you finish your payment, we will send the downloading link and password to you, and you can get SCP-NPM study guide within ten minutes. If you don't receive them, please contact our service staff, they will solve the problem for you. Furthermore, SCP-NPM Study Guide includes the questions and answers, and you can get enough practice through them.

The training tools of Exam4Free contains exam experience and materials which are come up with by our IT team of experts. Also we provide exam practice questions and answers about the SolarWinds SCP-NPM exam certification. Our Exam4Free's high degree of credibility in the IT industry can provide 100% protection to you. In order to let you choose to buy our products more peace of mind, you can try to free download part of the exam practice questions and answers about SolarWinds Certification SCP-NPM Exam online.

SCP-NPM Get Certified Get Ahead SCP-NPM

Our exam questions just need students to spend 20 to 30 hours practicing on the platform which provides simulation problems, can

let them have the confidence to pass the SCP-NPM exam, so little time great convenience for some workers. It must be your best tool to pass your exam and achieve your target. We provide free download and tryout before your purchase and if you fail in the exam we will refund you in full immediately at one time. Purchasing our SCP-NPM Guide Torrent can help you pass the exam and it costs little time and energy.

SolarWinds Network Performance Monitor (NPM) Exam Sample Questions (Q10-Q15):

NEW QUESTION # 10

You need to add a new subnet of 500 devices for monitoring. What is the first step to incorporate these devices into NPM?

- A. Add the nodes using the Add Node feature in Manage Nodes
- **B. Perform a Network Discovery**
- C. Measure network-wide bandwidth consumption
- D. Collect NetFlow from a core router

Answer: B

Explanation:

To add a new subnet of 500 devices for monitoring, the first step is to perform a network discovery using the Network Sonar Wizard in NPM. This wizard allows you to scan your network by IP address range, subnet, or seed device and automatically discover and add nodes and interfaces to NPM for monitoring. You can also specify credentials, polling settings, and custom properties for the discovered devices. Performing a network discovery can help you quickly and efficiently incorporate new devices into NPM without manually adding them one by one. References: Discover your network devices, Specify subnets, Discover devices by subnets

NEW QUESTION # 11

NPM polls static properties, and calculates bandwidth consumption based on the total amount of _____ coming through the firewall.

- A. Kilobytes
- B. Nibbles
- C. Megabytes
- **D. Bytes**

Answer: D

NEW QUESTION # 12

Which is not true for Device Studio Poller?

- A. Polled values are displayed in existing resources
- B. Can perform logical operations or transformations on the polled data
- **C. Collects data from Orion Failover Engine or Hot Standby Engines**
- D. Can poll multiple OIDs for a given technology

Answer: C

Explanation:

Device Studio Poller is a feature that allows users to create custom pollers for devices or technologies that are not supported by default in NPM. It can poll multiple OIDs for a given technology, perform logical operations or transformations on the polled data, and display the polled values in existing resources. However, it does not collect data from Orion Failover Engine or Hot Standby Engines, which are features of Orion High Availability that ensure continuous monitoring in case of primary server failure¹².

Reference: 1: Create pollers in Device Studio for NPM3, 2: When Good OIDs Go Bad: Customizing Device Pollers, 3: Manage Pollers (AKA Device Studio) question

https://documentation.solarwinds.com/en/success_center/orionplatform/content/core-monitoring-mibs-with-universal-device-pollers-sw548.htm

NEW QUESTION # 13

You need to change the polling method from ICMP to SNMP on 200 nodes you monitor with Orion. How would you best accomplish this?

- **A. Bulk select nodes in Manage Nodes and change the polling method**
- B. Unmanage all the nodes and remanage them choosing SNMP as the polling method
- C. Edit each individual node and change the polling method
- D. Use the Orion Polling Configuration tool to change polling methods

Answer: A

Explanation:

The easiest and fastest way to change the polling method for multiple nodes is to use the Manage Nodes feature in the web console. You can select up to 1000 nodes at a time and edit their properties in bulk. You can choose the polling method from the available options, such as ICMP, SNMP, WMI, or Agent, and provide the required credentials or settings. This will apply the changes to all the selected nodes without affecting their existing data or alerts. References: Choose the polling method to use in the SolarWinds Platform; Polling Intervals - Best Practices; SOLARWINDS NETWORK PERFORMANCE MONITOR

NEW QUESTION # 14

How do you prevent alerts when an interface is down, without influencing the status of the parent node?

- A. Select Unmanage Now in the parent node's Maintenance Mode drop-down
- B. Add a dependency with the node as the parent object, and the interface as the child
- **C. Select Display Interface as Unplugged Rather Than Down in the Node Management view**
- D. Add a dependency with the interface as the parent object, and the interface as the child

Answer: C

Explanation:

If you do not want to be notified when an interface is down, you can specify that the interface is unpluggable. The interface status is not reflected in the status of the parent node and in alerts. On the Node Management view, select the interface, and click Edit Properties. Select Display Interface as Unplugged Rather Than Down, and click Submit. The interface status does not influence the status of the parent node. Reference:

Suspend collecting data for interfaces in NPM - SolarWinds (see the Set the interface status as Unpluggable section)

NEW QUESTION # 15

.....

SolarWinds SCP-NPM Exam candidates all know the SolarWinds SCP-NPM exam is not easy to pass. But it is also the only way to success, so they have to choose it. In order to improve the value of your career, you must pass this certification exam. The exam questions and answers designed by Exam4Free contain different targeted, and have wide coverage. There is no any other books or other information can transcend it. The question bprovided by Exam4Free definitely ace exam questions and answers that help you pass the exam. The results many people used prove that Exam4Free success rate of up to 100%. Exam4Free is the only way that suits you to pass the exam, choose it equal to create a better future.
