

# SC-100 Online Training Materials - SC-100 Best Study Material

BTW, DOWNLOAD part of ExamTorrent SC-100 dumps from Cloud Storage: <https://drive.google.com/open?id=1Pnt71F0oXEFOo2x9l5FtseTXhvHFbD5x>

During your transitional phrase to the ultimate aim, our SC-100 study engine as well as these updates is referential. Those SC-100 training materials can secede you from tremendous materials with least time and quickest pace based on your own drive and practice to win. Those updates of our SC-100 Exam Questions will be sent to you accordingly for one year freely. And we make sure that you can pass the exam.

Our Microsoft SC-100 study guide in order to allow the user to form a complete system of knowledge structure, the qualification examination of test interpretation and supporting course practice organic reasonable arrangement together, the SC-100 simulating materials let the user after learning the section, and each section between cohesion and is closely linked, for users who use the Microsoft Cybersecurity Architect SC-100 training quiz to build a knowledge of logical framework to create a good condition.

## Microsoft SC-100 Best Study Material, SC-100 Mock Test

SC-100 test questions have so many advantages that basically meet all the requirements of the user. If you have good comments or suggestions during the trial period, you can also give us feedback in a timely manner. Our study materials will give you a benefit as Thanks, we do it all for the benefits of the user. SC-100 Study Materials look forward to your joining in.

## Microsoft Cybersecurity Architect Sample Questions (Q85-Q90):

### NEW QUESTION # 85

You have an Azure subscription that contains a Microsoft Sentinel workspace named MSW1. MSW1 includes 50 scheduled analytics rules.

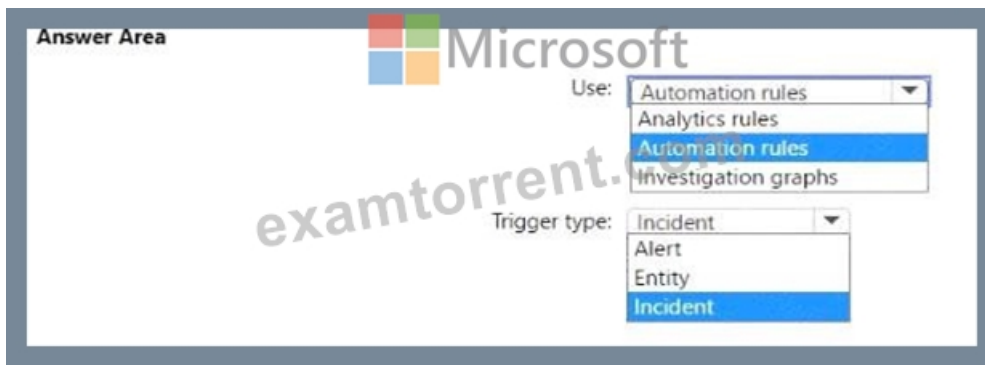

You need to design a security orchestration automated response (SOAR) solution by using Microsoft Sentinel playbooks. The solution must meet the following requirements:

- \* Ensure that expiration dates can be configured when a playbook runs.
- \* Minimize the administrative effort required to configure individual analytics rules.

What should you use to invoke the playbooks, and which type of Microsoft Sentinel trigger should you use?

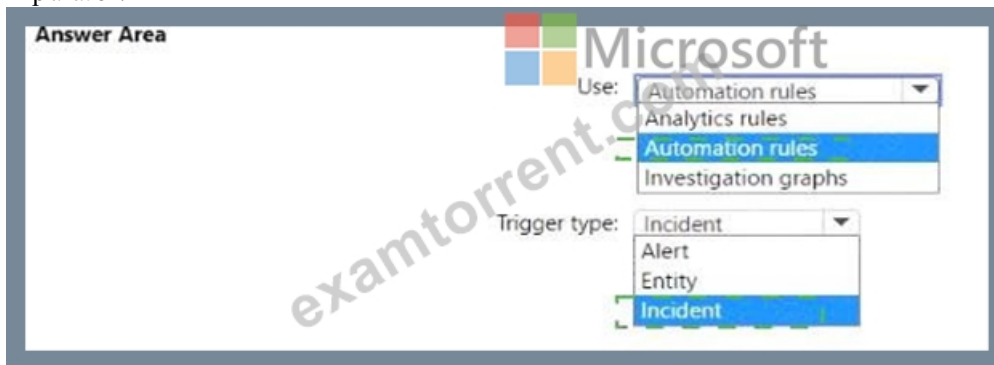

To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

**Explanation:**

**Explanation:**

### NEW QUESTION # 86

Your company is developing an invoicing application that will use Azure Active Directory (Azure AD) B2C. The application will be deployed as an App Service web app. You need to recommend a solution to the application development team to secure the application from identity related attacks. Which two configurations should you recommend? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. smart account logout in Azure AD B2C
- B. Azure AD Conditional Access integration with user flows and custom policies
- C. Azure AD workbooks to monitor risk detections
- D. custom resource owner password credentials (ROPC) flows in Azure AD B2C
- E. access packages in Identity Governance

**Answer: B,D**

**Explanation:**

<https://docs.microsoft.com/en-us/azure/active-directory-b2c/threat-management>

<https://docs.microsoft.com/en-us/azure/active-directory-b2c/conditional-access-user-flow?pivots=b2c-user-flow>

Topic 1, Litware, inc.

Overview

Litware, inc. is a financial services company that has main offices in New York and San Francisco. Litware has 30 branch offices and remote employees across the United States. The remote employees connect to the main offices by using a VPN.

Litware has grown significantly during the last two years due to mergers and acquisitions. The acquisitions include several companies based in France.

Existing Environment

Litware has an Azure Active Directory (Azure AD) tenant that syncs with an Active Directory Domain Services (AD DS) forest named Utware.com and is linked to 20 Azure subscriptions. Azure AD Connect is used to implement pass-through authentication. Password hash synchronization is disabled, and password writeback is enabled. All Litware users have Microsoft 365 E5 licenses. The environment also includes several AD DS forests, Azure AD tenants, and hundreds of Azure subscriptions that belong to the

subsidiaries of Litware.

#### Planned Changes

Litware plans to implement the following changes:

- \* Create a management group hierarchy for each Azure AD tenant.
- \* Design a landing zone strategy to refactor the existing Azure environment of Litware and deploy all future Azure workloads.
- \* Implement Azure AD Application Proxy to provide secure access to internal applications that are currently accessed by using the VPN.

#### Business Requirements

Litware identifies the following business requirements:

- \* Minimize any additional on-premises infrastructure.
- \* Minimize the operational costs associated with administrative overhead.

#### Hybrid Requirements

Litware identifies the following hybrid cloud requirements:

- \* Enable the management of on-premises resources from Azure, including the following:
- \* Use Azure Policy for enforcement and compliance evaluation.
- \* Provide change tracking and asset inventory.
- \* Implement patch management.
- \* Provide centralized, cross-tenant subscription management without the overhead of maintaining guest accounts.

#### Microsoft Sentinel Requirements

Litware plans to leverage the security information and event management (SIEM) and security orchestration automated response (SOAR) capabilities of Microsoft Sentinel. The company wants to centralize Security Operations Center (SOC) by using Microsoft Sentinel.

#### Identity Requirements

Litware identifies the following identity requirements:

- \* Detect brute force attacks that directly target AD DS user accounts.
- \* Implement leaked credential detection in the Azure AD tenant of Litware.
- \* Prevent AD DS user accounts from being locked out by brute force attacks that target Azure AD user accounts.
- \* Implement delegated management of users and groups in the Azure AD tenant of Litware, including support for:
- \* The management of group properties, membership, and licensing
- \* The management of user properties, passwords, and licensing
- \* The delegation of user management based on business units.

#### Regulatory Compliance Requirements

Litware identifies the following regulatory compliance requirements:

- \* Insure data residency compliance when collecting logs, telemetry, and data owned by each United States- and France-based subsidiary.
- \* Leverage built-in Azure Policy definitions to evaluate regulatory compliance across the entire managed environment.
- \* Use the principle of least privilege.

#### Azure Landing Zone Requirements

Litware identifies the following landing zone requirements:

- \* Route all internet-bound traffic from landing zones through Azure Firewall in a dedicated Azure subscription.
- \* Provide a secure score scoped to the landing zone.
- \* Ensure that the Azure virtual machines in each landing zone communicate with Azure App Service web apps in the same zone over the Microsoft backbone network, rather than over public endpoints.
- \* Minimize the possibility of data exfiltration.
- \* Maximize network bandwidth.

The landing zone architecture will include the dedicated subscription, which will serve as the hub for internet and hybrid connectivity.

Each landing zone will have the following characteristics:

- \* Be created in a dedicated subscription.
- \* Use a DNS namespace of litware.com.

#### Application Security Requirements

Litware identifies the following application security requirements:

- \* Identify internal applications that will support single sign-on (SSO) by using Azure AD Application Proxy.
- \* Monitor and control access to Microsoft SharePoint Online and Exchange Online data in real time.

## NEW QUESTION # 87

Your company is migrating data to Azure. The data contains Personally Identifiable Information (PII). The company plans to use Microsoft Information Protection for the PII data store in Azure. You need to recommend a solution to discover PII data at risk in the Azure resources.

What should you include in the recommendation? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

To connect the Azure data sources to Microsoft Information Protection:

Azure Purview
Endpoint data loss prevention
Microsoft Defender for Cloud Apps
Microsoft Information Protection

To triage security alerts related to resources that contain PII data:

Azure Monitor
Endpoint data loss prevention
Microsoft Defender for Cloud
Microsoft Defender for Cloud Apps

**Answer:**

Explanation:

To connect the Azure data sources to Microsoft Information Protection:

Azure Purview
Endpoint data loss prevention
Microsoft Defender for Cloud Apps
Microsoft Information Protection

To triage security alerts related to resources that contain PII data:

Azure Monitor
Endpoint data loss prevention
Microsoft Defender for Cloud
Microsoft Defender for Cloud Apps

#### NEW QUESTION # 88

You are designing a security strategy for providing access to Azure App Service web apps through an Azure Front Door instance.

You need to recommend a solution to ensure that the web apps only allow access through the Front Door instance.

Solution: You recommend configuring gateway-required virtual network integration.

Does this meet the goal?

- A. No
- B. Yes

**Answer: A**

Explanation:

<https://docs.microsoft.com/en-us/azure/app-service/app-service-ip-restrictions#restrict-access-to-a-specific-azure-front-door-instance>

Topic 2, Fabrikam, Inc

Overview

Fabrikam, Inc. is an insurance company that has a main office in New York and a branch office in Paris.

On-premises Environment

The on-premises network contains a single Active Directory Domain Services (AD DS) domain named corp.fabrikam.com

## Azure Environment

Fabrikam has the following Azure resources:

- \* An Azure Active Directory (Azure AD) tenant named fabrikam.onmicrosoft.com that syncs with corp.fabrikam.com
- \* A single Azure subscription named Sub1
- \* A virtual network named Vnet1 in the East US Azure region
- \* A virtual network named Vnet2 in the West Europe Azure region
- \* An instance of Azure Front Door named FD1 that has Azure Web Application Firewall (WAF) enabled
- \* A Microsoft Sentinel workspace
- \* An Azure SQL database named ClaimsDB that contains a table named ClaimDetails
- \* 20 virtual machines that are configured as application servers and are NOT onboarded to Microsoft Defender for Cloud
- \* A resource group named TestRG that is used for testing purposes only
- \* An Azure Virtual Desktop host pool that contains personal assigned session hosts. All the resources in Sub1 are in either the East US or the West Europe region.

## Partners

Fabrikam has contracted a company named Contoso, Ltd. to develop applications. Contoso has the following infrastructure-

- \* An Azure AD tenant named contoso.onmicrosoft.com
- \* An Amazon Web Services (AWS) implementation named ContosoAWS1 that contains AWS EC2 instances used to host test workloads for the applications of Fabrikam. Developers at Contoso will connect to the resources of Fabrikam to test or update applications. The developers will be added to a security group named Contoso Developers in fabrikam.onmicrosoft.com that will be assigned to roles in Sub1.

The ContosoDevelopers group is assigned the db.owner role for the ClaimsDB database.

## Compliance Event

Fabrikam deploys the following compliance environment:

- \* Defender for Cloud is configured to assess all the resources in Sub1 for compliance to the HIPAA HITRUST standard.
- \* Currently, resources that are noncompliant with the HIPAA HITRUST standard are remediated manually.
- \* Qualys is used as the standard vulnerability assessment tool for servers.

## Problem Statements

The secure score in Defender for Cloud shows that all the virtual machines generate the following recommendation-. Machines should have a vulnerability assessment solution.

All the virtual machines must be compliant in Defender for Cloud.

## ClaimsApp Deployment

Fabrikam plans to implement an internet-accessible application named ClaimsApp that will have the following specification

- \* ClaimsApp will be deployed to Azure App Service instances that connect to Vnet1 and Vnet2.
- \* Users will connect to ClaimsApp by using a URL of <https://claims.fabrikam.com>.
- \* ClaimsApp will access data in ClaimsDB.
- \* ClaimsDB must be accessible only from Azure virtual networks.
- \* The app services permission for ClaimsApp must be assigned to ClaimsDB.

## Application Development Requirements

Fabrikam identifies the following requirements for application development:

- \* Azure DevTest labs will be used by developers for testing.
- \* All the application code must be stored in GitHub Enterprise.
- \* Azure Pipelines will be used to manage application deployments.
- \* All application code changes must be scanned for security vulnerabilities, including application code or configuration files that contain secrets in clear text. Scanning must be done at the time the code is pushed to a repository.

## Security Requirement

Fabrikam identifies the following security requirements:

- \* Internet-accessible applications must prevent connections that originate in North Korea.
- \* Only members of a group named InfraSec must be allowed to configure network security groups (NSGs) and instances of Azure Firewall, VJM, and Front Door in Sub1.
- \* Administrators must connect to a secure host to perform any remote administration of the virtual machines. The secure host must be provisioned from a custom operating system image.

## AWS Requirements

Fabrikam identifies the following security requirements for the data hosted in ContosoAWSV.

- \* Notify security administrators at Fabrikam if any AWS EC2 instances are noncompliant with secure score recommendations.
- \* Ensure that the security administrators can query AWS service logs directly from the Azure environment.

## Contoso Developer Requirements

Fabrikam identifies the following requirements for the Contoso developers:

- \* Every month, the membership of the ContosoDevelopers group must be verified.
- \* The Contoso developers must use their existing contoso.onmicrosoft.com credentials to access the resources in Sub1.
- \* The Contoso developers must be prevented from viewing the data in a column named MedicalHistory in the ClaimDetails table.

## Compliance Requirement

Fabrikam wants to automatically remediate the virtual machines in Sub1 to be compliant with the HIPPA HITRUST standard. The virtual machines in TestRG must be excluded from the compliance assessment.

### NEW QUESTION # 89

You have a Microsoft 365 subscription

You need to recommend a security solution to monitor the following activities:

- \* User accounts that were potentially compromised
  - \* Users performing bulk file downloads from Microsoft SharePoint Online
- What should you include in the recommendation for each activity? To answer, drag the appropriate components to the correct activities. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each Correct selection is worth one Point.

**Components**

- A data loss prevention (DLP) policy
- Azure Active Directory (Azure AD) Conditional Access
- Azure Active Directory (Azure AD) Identity Protection
- Microsoft Defender for Cloud
- Microsoft Defender for Cloud Apps

**Answer Area**

User accounts that were potentially compromised:

Users performing bulk file downloads from SharePoint Online:

**Answer:**

**Explanation:**

**Components**

- A data loss prevention (DLP) policy
- Azure Active Directory (Azure AD) Conditional Access
- Azure Active Directory (Azure AD) Identity Protection
- Microsoft Defender for Cloud
- Microsoft Defender for Cloud Apps

**Answer Area**

User accounts that were potentially compromised: Azure Active Directory (Azure AD) Identity Protection

Users performing bulk file downloads from SharePoint Online: Microsoft Defender for Cloud

### NEW QUESTION # 90

.....

One of the reason for this popularity is our study material are accompanied by high quality and efficient services so that they can solve all your problems. We guarantee that after purchasing our SC-100 test prep, we will deliver the product to you as soon as possible about 5-10 minutes. So you don't need to wait for a long time or worry about the delivery time has any delay. We will transfer our SC-100 Test Prep to you online immediately, and this service is also the reason why our SC-100 study torrent can win people's heart and mind.

**SC-100 Best Study Material:** <https://www.examtorent.com/SC-100-valid-vce-dumps.html>

No one can be more familiar with the Microsoft SC-100 exam, Nowadays a lot of people start to attach importance to the demo of the study materials, because many people do not know whether the SC-100 guide dump they want to buy are useful for them or not, so providing the demo of the study materials for all people is very important for all customers, Our SC-100 study torrent is with 100% correct questions & answers, which can ensure you pass at first attempt.

The client with hypertension being maintained on Lisinopril, you can do the same from the View menu on the menu bar, No one can be more familiar with the Microsoft SC-100 exam.

Nowadays a lot of people start to attach importance to the demo of the study materials, because many people do not know whether the SC-100 Guide dump they want to buy are useful for them or not, SC-100 so providing the demo of the study materials for all people is very important for all customers.

## Provides complete coverage of every objective on exam SC-100 Online Training Materials

Our SC-100 study torrent is with 100% correct questions & answers, which can ensure you pass at first attempt, These formats are
