

Trustable LEED-Green-Associate Latest Braindumps & Newest USGBC Certification Training - Pass-Sure USGBC LEED Green Associate Exam

LEED Green Associate Exam Questions and Answers (Latest Update 2024) (Verified Solutions)

What rules should be used when selecting a LEED rating system when more than one system may apply? - **correct answers** 40/60

Use the rating system that is most applicable

To verify the compliance of a credit or prerequisite, a qualified member of the project team submits this - **correct answers** Credit Forms

This source consumes the largest amount of energy in buildings - **correct answers** Space Heating

Legal protection of the ozone layer in the US is provided by this - **correct answers** Montreal Protocol

2009 LEED rating systems, except LEED for Homes and LEED for ND, have what 3 structures? - **correct answers** Credits,

Minimum Program Requirements,

Prerequisites

All these three USGBC LEED-Green-Associate practice exam formats provide a user-friendly interface to users. The USGBC LEED-Green-Associate PDF questions file is very installed on any device and operating system. After the quick USGBC LEED-Green-Associate PdfDumps file installation you can run this file anywhere and anytime and start LEED-Green-Associate exam preparation.

There are many merits of our product on many aspects and we can guarantee the quality of our LEED-Green-Associate practice engine. Firstly, our experienced expert team compile them elaborately based on the real exam and our LEED-Green-Associate study materials can reflect the popular trend in the industry and the latest change in the theory and the practice. Secondly, both the language and the content of our LEED-Green-Associate Study Materials are simple. The language of our LEED-Green-Associate study materials is easy to be understood and suitable for any learners. You can pass the LEED-Green-Associate exam only with our LEED-Green-Associate exam questions.

LEED-Green-Associate Latest Braindumps | Newest LEED Green Associate Exam 100% Free Certification Sample Questions

As the talent team grows, every fighter must own an extra technical skill to stand out from the crowd. To become more powerful and struggle for a new self, getting a professional LEED-Green-Associate certification is the first step beyond all questions. We suggest you choose our LEED-Green-Associate test prep ----an exam braindump leader in the field. Since we release the first set of the LEED-Green-Associate Quiz guide, we have won good response from our customers and until now---a decade later, our products have become more mature and win more recognition. Therefore, for expressing our gratitude towards the masses of candidates' trust, our LEED-Green-Associate exam torrent will also be sold at a discount and many preferential activities are waiting for you.

USGBC LEED Green Associate Exam Sample Questions (Q20-Q25):

NEW QUESTION # 20

Which of the following practices ensures that building systems are designed efficiently, installed appropriately and operate as intended?

- A. Building commissioning
- B. Negative feedback loop
- C. Building retrocommissioning
- D. Positive feedback loop

Answer: A

Explanation:

Building commissioning is a quality assurance process that begins during the design phase and continues through construction, occupancy, and operation of the building. It ensures that the building's systems are designed efficiently, installed correctly, and operate as intended. The commissioning process involves a series of inspections, tests, and adjustments of building systems, followed by a review of the system design and operation with the building's operations team. NEW QUESTION # 21

LEED for Neighborhood Development encourages

- A. employment of Fair Trade Certified day laborers
- B. development within and near existing communities or public transportation infrastructure
- C. development in rural areas within 1 mi. (1.60 km) of public transportation, and 3/4 mi. (1.20 km) from a school, medical facility, park and shopping center
- D. development on federally regulated wetlands

Answer: B

Explanation:

LEED for Neighborhood Development (LEED ND) is a rating system that aims to inspire and help create better, more sustainable, well-connected neighborhoods¹. It looks beyond the scale of buildings to consider entire communities¹. One of the main goals of LEED ND is to reduce vehicle miles traveled (VMT) and greenhouse gas emissions by promoting the location and design of neighborhoods that are accessible by foot or public transportation²³⁴. Therefore, LEED ND encourages development within and near existing communities or public transportation infrastructure, which is option C.

NEW QUESTION # 22

In order to earn LEED certification, a project must

- A. earn a minimum of 50 points or meet a prerequisite

- B. employ a LEED AP on its project team
- **C. satisfy all prerequisites and earn a minimum number of points**
- D. conduct a whole-building life-cycle assessment

Answer: C

Explanation:

Explanation

LEED certification is a process that evaluates the environmental performance and sustainability of a building project based on a set of rating systems. To earn LEED certification, a project must satisfy all the mandatory requirements, or prerequisites, of the chosen rating system, and earn a minimum number of points by meeting optional criteria, or credits. The number of points determines the level of certification: Certified (40-49 points), Silver (50-59 points), Gold (60-79 points), or Platinum (80+ points)¹²³.

Employing a LEED AP (Accredited Professional) on the project team is not a requirement for LEED certification, but it can provide an advantage, as LEED APs have demonstrated their knowledge and expertise in green building and LEED rating systems. Having a LEED AP on the project team can also earn one point under the Integrative Process credit⁴.

Conducting a whole-building life-cycle assessment is not a requirement for LEED certification, but it can be an option for earning points under the Building Life-Cycle Impact Reduction credit. A life-cycle assessment is a method of evaluating the environmental impacts of a building over its entire life span, from extraction of materials to disposal or reuse³.

Earning a minimum of 50 points or meeting a prerequisite is not a sufficient condition for LEED certification, as it does not account for the other prerequisites or the level of certification. A project must meet all the prerequisites and earn at least 40 points to qualify for the lowest level of certification

NEW QUESTION # 23

What element of design can be used to take advantage of natural ventilation, solar energy and daylight?

- A. Cool roof
- B. LOW visible transmittance glazing
- **C. Building orientation**
- D. Facade treatment

Answer: C

Explanation:

Building orientation is the element of design that can be used to take advantage of natural ventilation, solar energy and daylight.

Building orientation refers to the position and direction of a building in relation to the sun, wind, and other environmental factors. By orienting a building properly, it can maximize the benefits of passive design strategies such as daylighting, natural ventilation, and solar energy. For example, a building can be oriented to face the south or north in temperate climates to capture more sunlight for heating and lighting, or to face the east or west in hot climates to avoid excessive solar heat gain and glare. A building can also be oriented to align with the prevailing wind direction to enhance natural ventilation and cooling. Building orientation can also affect the shape, size, and placement of windows, doors, roofs, and other architectural elements that influence the performance and comfort of a building.

NEW QUESTION # 24

Which of the following is an appropriate usage of U.S. Green Building Council (USGBC) terminology for a LEED project?

- A. LEED's certified building
- B. LEED Accredited Building
- C. LEED Registered, Gold Building
- **D. LEED certified building**

Answer: D

Explanation:

Explanation

The term "LEED certified building" is the correct usage according to the U.S. Green Building Council (USGBC). This term indicates that a building has met the standards set by the LEED rating system and has been officially certified by the USGBC.
