## Microsoft Configuring Windows Server Hybrid Advanced Services Sample

## Questions (Q90-Q95):

### NEW QUESTION # 90

Your on-premises network contains two subnets. The subnets contain servers that run Windows Server as shown in the following table.

Server4 has the following IP configurations:

Ethernet adapter Ethernet:

Connection-specific DNS Suffix . . . :

IPv4 Address . . . . . : 192.168.0.10

Subnet Mask . . . . . : 255.255.255.0

Default Gateway . . . . . : 192.168.0.1

From Server4, you can ping Server1 and Server2 successfully. When you ping Server3, you get a Request timed out response.

From Server2, you can ping Server1 and Server3 successfully.

The misconfiguration of which component on Server3 can cause the Request timed out response?

- A. IP address
- **B. subnet mask**
- C. DNS server
- D. default gateway

**Answer: B**

### NEW QUESTION # 91

You need to meet the technical requirements for User1.

To which group in contoso.com should you add User1?

- A. Backup Operators
- B. Schema Admins
- C. Account Operators
- **D. Domain Admins**

**Answer: D**

### NEW QUESTION # 92

Your network contains an Active Directory Domain Services (AD DS) domain named contoso.com. The functional level of the forest and the domain is Windows Server 2012 R2. The domain contains the domain controllers shown in the following table.

You need to raise the forest functional level to Windows Server 2016. The solution must meet the following requirements:

\* Ensure that there are three domain controllers after you raises the level.

\* Minimize how long the FSMO roles are unavailable.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation:
