New SC-100 Test Practice, SC-100 Valid Test Forum

BTW, DOWNLOAD part of LatestCram SC-100 dumps from Cloud Storage: https://drive.google.com/open?id=1aFPSnbz4xqLEc0L7QBidfE4B-p8cWWAm

A lot of effort, commitment, and in-depth Microsoft Cybersecurity Architect (SC-100) exam questions preparation is required to pass this Microsoft SC-100 exam. For the complete and comprehensive Microsoft Cybersecurity Architect (SC-100) exam dumps preparation you can trust valid, updated, and SC-100 Questions which you can download from the LatestCram platform quickly and easily.

The SC-100 certification exam is designed for professionals who are responsible for the security of an organization's Azure environment, such as security architects, security engineers, and cybersecurity analysts. SC-100 Exam covers a range of topics including identity and access management, network security, platform protection, data and application protection, and security operations.

SC-100 Valid Test Forum - SC-100 Reliable Dumps Ebook

The industry experts hired by SC-100 exam materials are those who have been engaged in the research of SC-100 exam for many years. They have a keen sense of smell in the direction of the exam. Therefore, they can make accurate predictions on the exam questions. Therefore, our study materials specifically introduce a mock examination function. With SC-100 exam materials, you can not only feel the real exam environment, but also experience the difficulty of the exam. You can test your true level through simulated

exams. At the same time, after repeated practice of SC-100 study braindumps, I believe that you will feel familiar with these questions during the exam and you will feel that taking the exam is as easy as doing exercises in peace.

Microsoft Cybersecurity Architect Sample Questions (Q170-Q175):

NEW QUESTION # 170
You are creating the security recommendations for an Azure App Service web app named App1.
App1 has the following specifications:
* Users will request access to App1 through the My Apps portal. A human resources manager will approve the requests.
* Users will authenticate by using Azure Active Directory (Azure AD) user accounts.
You need to recommend an access security architecture for App1.
What should you include in the recommendation? To answer, select the appropriate options in the answer are a. NOTE: Each correct selection is worth one point.
□

Answer:

Explanation:
□

NEW QUESTION # 171
Case Study 1 - Fabrikam, Inc
OverView
Fabrikam, Inc. is an insurance company that has a main office in New York and a branch office in Paris.
Existing Environment
On-premises Environment
The on-premises network contains a single Active Directory Domain Services (AD DS) domain named corp.fabrikam.com.
Azure Environment
Fabrikam has the following Azure resources:
- A Microsoft Entra tenant named fabrikam.onmicrosoft.com that syncs with corp.fabrikam.com
- A single Azure subscription named Sub1
- A virtual network named Vnet1 in the East US Azure region
- A virtual network named Vnet2 in the West Europe Azure region
- An instance of Azure Front Door named FD1 that has Azure Web Application Firewall (WAF) enabled
- A Microsoft Sentinel workspace
- An Azure SQL database named ClaimsDB that contains a table named ClaimDetails
- 20 virtual machines that are configured as application servers and are NOT onboarded to Microsoft Defender for Cloud
- A resource group named TestRG that is used for testing purposes only
- An Azure Virtual Desktop host pool that contains personal assigned session hosts
- All the resources in Sub1 are in either the East US or the West Europe region.
Partners
Fabrikam has contracted a company named Contoso, Ltd. to develop applications. Contoso has the following infrastructure:
- An Microsoft Entra named contoso.onmicrosoft.com
- An Amazon Web Services (AWS) implementation named ContosoAWS1 that contains AWS EC2 instances used to host test workloads for the applications of Fabrikam Developers at Contoso will connect to the resources of Fabrikam to test or update applications.
The developers will be added to a security Group named Contoso Developers in fabrikam.onmicrosoft.com that will be assigned to roles in Sub1. The ContosoDevelopers group is assigned the db.owner role for the ClaimsDB database.
Compliance Event
Fabrikam deploys the following compliance environment:
- Defender for Cloud is configured to assess all the resources in Sub1 for compliance to the HIPAA HITRUST standard.
- Currently, resources that are noncompliant with the HIPAA HITRUST standard are remediated manually.
- Qualys is used as the standard vulnerability assessment tool for servers.
Problem Statements
The secure score in Defender for Cloud shows that all the virtual machines generate the following recommendation. Machines should have a vulnerability assessment solution. All the virtual machines must be compliant in Defender for Cloud.
ClaimApp Deployment
Fabrikam plans to implement an internet-accessible application named ClaimsApp that will have the following specification
- ClaimsApp will be deployed to Azure App Service instances that connect to Vnet1 and Vnet2.
- Users will connect to ClaimsApp by using a URL of https://claims.fabrikam.com.
- ClaimsApp will access data in ClaimsDB.

- ClaimsDB must be accessible only from Azure virtual networks.
- The app services permission for ClaimsApp must be assigned to ClaimsDB.

Application Development Requirements

Fabrikam identifies the following requirements for application development:
- Azure DevTest labs will be used by developers for testing.
- All the application code must be stored in GitHub Enterprise.
- Azure Pipelines will be used to manage application deployments.
- All application code changes must be scanned for security vulnerabilities, including application code or configuration files that contain secrets in clear text. Scanning must be done at the time the code is pushed to a repository.

Security Requirement

Fabrikam identifies the following security requirements:
- Internet-accessible applications must prevent connections that originate in North Korea.
- Only members of a group named InfraSec must be allowed to configure network security groups (NSGs} and instances of Azure Firewall, VJM. And Front Door in Sub1.
- Administrators must connect to a secure host to perform any remote administration of the virtual machines. The secure host must be provisioned from a custom operating system image.

AWS Requirements

Fabrikam identifies the following security requirements for the data hosted in ContosoAWSV.
- Notify security administrators at Fabrikam if any AWS EC2 instances are noncompliant with secure score recommendations.
- Ensure that the security administrators can query AWS service logs directly from the Azure environment.

Contoso Developer Requirements

Fabrikam identifies the following requirements for the Contoso developers:
- Every month, the membership of the ContosoDevelopers group must be verified.
- The Contoso developers must use their existing contoso.onmicrosoft.com credentials to access the resources in Sub1.
- The Comoro developers must be prevented from viewing the data in a column named MedicalHistory in the ClaimDetails table.

Compliance Requirement

Fabrikam wants to automatically remediate the virtual machines in Sub1 to be compliant with the HIPPA HITRUST standard. The virtual machines in TestRG must be excluded from the compliance assessment.

You need to recommend a solution to resolve the virtual machine issue.

What should you include in the recommendation?

- A. Onboard the virtual machines to Azure Arc.
- B. Enable the Qualys scanner in Defender for Cloud.
- C. Onboard the virtual machines to Microsoft Defender for Endpoint.
- D. Create a device compliance policy in Microsoft Endpoint Manager.

Answer: C

Explanation:
Scenario: 20 virtual machines that are configured as application servers and are NOT onboarded to Microsoft Defender for Cloud.
Existing Environment. Problem Statements
The secure score in Defender for Cloud shows that all the virtual machines generate the following recommendation: Machines should have a vulnerability assessment solution.
All the virtual machines must be compliant in Defender for Cloud.
Note: Deploying Microsoft Defender for Endpoint is a two-step process.
Onboard devices to the service -
Configure capabilities of the service

NEW QUESTION # 172

Your on-premises network contains an e-commerce web app that was developed in Angular and Node.js. The web app uses a MongoDB database You plan to migrate the web app to Azure. The solution architecture team proposes the following architecture as an Azure landing zone.

You need to provide recommendations to secure the connection between the web app and the database. The solution must follow the Zero Trust model.
Solution: You recommend implementing Azure Application Gateway with Azure Web Application Firewall (WAF).
Does this meet the goal?

- A. Yes

- **B. No**

Answer: B

Explanation:
When using Azure-provided PaaS services (e.g., Azure Storage, Azure Cosmos DB, or Azure Web App, use the PrivateLink connectivity option to ensure all data exchanges are over the private IP space and the traffic never leaves the Microsoft network.

NEW QUESTION # 173
You plan to deploy a dynamically scaling, Linux-based Azure Virtual Machine Scale Set that will host jump servers. The jump servers will be used by support staff who connect from personal and kiosk devices via the internet. The subnet of the jump servers will be associated to a network security group (NSG).
You need to design an access solution for the Azure Virtual Machine Scale Set. The solution must meet the following requirements:
* Ensure that each time the support staff connects to a jump server; they must request access to the server.
* Ensure that only authorized support staff can initiate SSH connections to the jump servers.
* Maximize protection against brute-force attacks from internal networks and the internet.
* Ensure that users can only connect to the jump servers from the internet.
* Minimize administrative effort.
What should you include in the solution? To answer, select the appropriate options in the answer area. NOTE:
Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 174
You open Microsoft Defender for Cloud as shown in the following exhibit.
Use the drop-down menus to select the answer choice that complete each statements based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 175
......

Microsoft SC-100 practice test software can be used on devices that range from mobile devices to desktop computers. We provide the Microsoft SC-100 exam questions in a variety of formats, including a web-based practice test, desktop practice exam software, and downloadable PDF files. LatestCram provides proprietary preparation guides for the certification exam offered by the Microsoft SC-100 Exam Dumps. In addition to containing numerous questions similar to the Microsoft SC-100 exam, the Microsoft SC-100 exam questions are a great way to prepare for the Microsoft SC-100 exam dumps.
