Using the Project Scenario, select the appropriate response to each of the following 5 questions which have been raised by the Project Board.

The project is now at the end of the initiation stage. The PlO includes the Business Case, a product checklist and several Product Descriptions, Including the Project Product Description. Short sections are also included for each of the strategies and the controls to be applied. The Project Manager has elected to use the Daily Log to record all risks, issues, lessons and quality results.

After the initiation stage there will be two further stages during which a small number of Work Packages will be authorized. While these are being managed, the Project Manager will hold regular checkpoints, which will support the production of weekly Highlight Reports to the Project Board.

This question provides a number of changes which may or may not be required to the Extract from the Communication Management Strategy provided in the additional information.
