Download the Apple Deployment and Management Exam (DEP-2025) exam questions right away for immediate and thorough exam preparation.

Apple Deployment and Management Exam Sample Questions (Q204-Q209):

NEW QUESTION # 204

Where is content cached when you simultaneously provision tethered iPad devices using Apple Configurator?

- A. On the iCloud server
- B. On the Mac that the iPad devices are tethered to
- C. On the MDM server that the iPad devices are tethered to
- D. On the MDM content caching server

Answer: B

Explanation:

Content is cached on the tethered Mac. The Apple Configurator User Guide states, "When provisioning tethered iPad devices using Apple Configurator, content is cached on the Mac they are connected to, speeding up the process." Reference: Apple Configurator User Guide, "Provisioning Devices" section.

Apple Platform Deployment Guide, "Apple Configurator" section.

NEW QUESTION # 205

Which feature or technology locks a supervised iPad until the feature is turned off?

- A. Managed Device Attestation
- B. Return to Service
- C. Activation Lock
- **D. Managed Lost Mode**

Answer: D

Explanation:

Managed Lost Mode locks supervised iPads. The iOS Deployment Reference states, "Managed Lost Mode locks a supervised iPad until disabled via MDM, displaying a custom message and restricting access." Option C requires credentials, not MDM, to unlock.

References:

iOS Deployment Reference, "Managed Lost Mode" section.

Mobile Device Management Protocol Reference, "Lost Mode" section.

NEW QUESTION # 206

What happens if your Automated Device Enrollment profile is configured to skip the creation of a local macOS account?

- A. The user's Managed Apple Account is used as a local account
- **B. The user logs in using a network account or another account created outside of Setup Assistant**
- C. The user is notified their Mac is partially set up, and they must erase and start again
- D. The setup process fails

Answer: B

Explanation:

Skipping local account creation requires alternative login. The macOS Deployment Reference states, "If ADE skips local account creation, users must log in with a network account or another pre-existing account created outside Setup Assistant." Option C is incorrect as Managed Apple IDs don't become local accounts.

Reference:

macOS Deployment Reference, "ADE Configuration" section.

Apple Platform Deployment Guide, "Account Setup" section.

NEW QUESTION # 207

Which technology can you use to streamline authentication flows for users enrolling devices using account-driven enrollment into MDM?

- **A. Enrollment single sign-on (SSO) for iPhone and iPad**
- B. Sign in with Apple
- C. Biometric authentication
- D. Sign in with Apple at Work & School

Answer: A

Explanation:

Enrollment SSO streamlines account-driven enrollment. The iOS Deployment Reference states, "Enrollment SSO simplifies authentication during account-driven enrollment by allowing users to authenticate once with their Managed Apple ID across the process." Option B is incorrect as it's not a distinct technology here.

Reference:

iOS Deployment Reference, "Enrollment SSO" section.

Apple Platform Deployment Guide, "Account-driven Enrollment" section.

NEW QUESTION # 208

Which statement is true when you buy content in Apple Business Manager?

- A. Content is automatically assigned to user accounts.
- **B. Licenses for purchased apps can be transferred to another location.**
- C. Organizations are restricted to only free content available in the store.
- D. Only IT administrators can make purchases on behalf of the organization.

Answer: B

Explanation:

Apple's Apps and Books program within Apple Business Manager (ABM) allows organizations to purchase apps and books in volume. A critical benefit is the ability to transfer licenses between locations within the same ABM account. Apple Learning specifies that this feature enables schools, campuses, or departments to redistribute app licenses as organizational needs evolve, without changing the overall license count. Content is not automatically assigned to user accounts; admins choose device- or user-based assignment. Both free and paid apps are available, so there is no restriction to free content. Additionally, purchasing can be delegated to roles such as Content Managers, not just administrators. The ability to move licenses across locations makes management flexible and cost-efficient, while maintaining organizational ownership of the content.

References: Apple Business Manager User Guide - "Apps and Books purchases and license transfers."

NEW QUESTION # 209

.....

Everybody knows that in every area, timing counts importantly. With the advantage of high efficiency, our DEP-2025 learning quiz helps you avoid wasting time on selecting the important and precise content from the broad information.
