## SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition 認定 C-S4CPB-2508 試験問題 (Q13-Q18):

### 質問 # 13

Which of the following activities are completed in the Realize phase of the SAP Activate Methodology? Note: There are 2 correct answers to this question.

- A. Gather perceived change impact feedback
- **B. Enter configuration values in SAP Central Business Configuration**
- C. Demonstrate where to find business process documentation
- **D. Set up manual test cases in SAP Cloud ALM**

正解: B、D

### 質問 # 14

What provides a foundation for the SAP Cloud ERP where integrations and extensions live?

- A. SAP ABAP Environment
- B. SAP Business Accelerator Hub
- C. SAP Discovery Center
- **D. SAP Business Technology Platform**

正解: D

### 質問 # 15

You have assigned a deployment target in SAP Central Business Configuration, but have not yet completed the Confirm Scoping milestone.

Which of the following tasks can you complete? Note: There are 2 correct answers to this question.

- **A. Assign a different deployment target.**
- B. Create a company code.
- C. Define the group currency.
- **D. Rename the deployment target.**

正解: A、D

解説:

You can rename or assign a different deployment target in SAP Central Business Configuration before completing the Confirm Scoping milestone. This allows you to change the system tenant that will be used for the initial deployment of the content. However, you cannot define the group currency or create a company code before confirming the scoping, as these are configuration activities that require a deployed system. ### 質問 # 16

You are recording actions for a custom process step in a test automate

When do you press the "Read" button on the recording panel? Note: There are 2 correct answers to this question.

- A. To capture an error message on the screen that can be used later.
- **B. To capture a value in a text field that should be stored as a variable.**
- C. To capture a static label on the screen that should be checked during test execution.
- **D. To capture text in a message screen that can be used for data binding later.**

正解: B、D

解説:

When you are recording actions for a custom process step in a test automate, you press the "Read" button on the recording panel in the following situations:

\* To capture a value in a text field that should be stored as a variable. This allows you to reuse the value in other steps or test cases, or to compare it with an expected value1.

\* To capture text in a message screen that can be used for data binding later. This allows you to extract data from the message screen and use it as an input for another step or test case2.

You do not press the "Read" button to capture an error message or a static label on the screen, as these are not values that need to be stored or used later. Instead, you can use the "Check" button to verify that the error message or the label is displayed as expected3. ## 質問 # 17

If you cannot find a prepackaged solution process that addresses integration requirements in SAP Signavio Process Navigator, where do you look next?

- A. SAP Cloud ALM
- **B. SAP Business Accelerator Hub**
- C. SAP Discovery Center
- D. SAP Business Technology Platform

正解: B

解説:

If you cannot find a prepackaged solution process that addresses integration requirements in SAP Signavio Process Navigator, you should look next at the SAP Business Accelerator Hub. The SAP Business Accelerator Hub is a central repository of integration content that can help you to connect SAP S/4HANA Cloud Public Edition with other SAP and non-SAP applications. You can browse, search, and filter the available integration packages, scenarios, and APIs, and access the relevant documentation and configuration guides1. The SAP Business Accelerator Hub also provides links to the SAP Integration Suite tools, such as SAP Cloud Integration, SAP API Management, and SAP Cloud Integration Automation Service, that you can use to implement and manage the integrations2.

The other options are not the correct places to look for integration requirements. SAP Discovery Center is a portal that helps you to discover, try, and buy SAP solutions and services3. SAP Business Technology Platform is a platform that enables you to extend, integrate, and build applications in the cloud4. SAP Cloud ALM is a cloud-based application lifecycle management tool that supports you in implementing, operating, and enhancing your cloud solutions5.
