## SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q13-Q18):

### NEW QUESTION # 13

Which of the following actions does the lead configuration expert carry out during content deployment in the SAP S/4HANA Cloud starter system? Note: There are 3 correct answers to this question.

- A. Confirm primary logistics settings
- B. Create one workspace
- C. Create two workspaces
- D. Define the scope
- E. Confirm primary finance settings

**Answer: C,D,E**

### NEW QUESTION # 14

You are recording actions for a custom process step in a test automate

When do you press the "Read" button on the recording panel? Note: There are 2 correct answers to this question.

- A. To capture a value in a text field that should be stored as a variable.
- B. To capture text in a message screen that can be used for data binding later.
- C. To capture a static label on the screen that should be checked during test execution.
- D. To capture an error message on the screen that can be used later.

**Answer: A,B**

Explanation:

When you are recording actions for a custom process step in a test automate, you press the "Read" button on the recording panel in the following situations:

\* To capture a value in a text field that should be stored as a variable. This allows you to reuse the value in other steps or test cases,

or to compare it with an expected value<sup>1</sup>.

\* To capture text in a message screen that can be used for data binding later. This allows you to extract data from the message screen and use it as an input for another step or test case<sup>2</sup>.

You do not press the "Read" button to capture an error message or a static label on the screen, as these are not values that need to be stored or used later. Instead, you can use the "Check" button to verify that the error message or the label is displayed as expected<sup>3</sup>.

#### NEW QUESTION # 15

In which type of extensibility is the SAP Business Technology Platform used to host a custom extension?

- A. Side-by-side extensibility
- B. Developer extensibility
- C. Classic extensibility
- D. Key user extensibility

**Answer: A**

#### NEW QUESTION # 16

Which of the following is SAP's recommended Human Capital Management system (HCCM)?

- A. SAP Concur
- B. SAP Fieldglass
- C. SAP SuccessFactors
- D. SAP Ariba

**Answer: C**

#### NEW QUESTION # 17

How can you migrate data to SAP S/4HANA Cloud Public Edition? Note: There are 2 correct answers to this question.

- A. With the zero downtime service
- B. With a separate SAP HANA database
- C. With Core Data Services
- D. With XML or CSV templates

**Answer: B,D**

Explanation:

You can migrate data to SAP S/4HANA Cloud Public Edition using the SAP S/4HANA Migration Cockpit, a tool that provides multiple methods of migrating data from legacy systems, SAP or non-SAP, to the target system<sup>1</sup>. The SAP S/4HANA Migration Cockpit supports the following migration methods<sup>2</sup>:

\* With XML or CSV templates: You can use predefined templates in XML or CSV format to fill in your source data and upload them to the staging tables in the SAP S/4HANA Cloud system. The templates are based on the predefined migration objects that cover the most common business data, such as master data, transaction data, and configuration data. You can download the templates from the SAP S

/4HANA Migration Cockpit or from the SAP Best Practices Explorer.

\* With a separate SAP HANA database: You can use a separate SAP HANA database as a staging area to store your source data and transfer it to the SAP S/4HANA Cloud system. You can use any tool or method to extract your source data from your legacy system and load it to the SAP HANA database.

You can also use the predefined migration objects or create your own custom objects using the migration object modeler.

\* Directly from an SAP ERP system: You can connect your SAP ERP system to the SAP S/4HANA Cloud system and transfer your source data directly without using a staging area. You can use the predefined migration objects or create your own custom objects using the migration object modeler.

This method requires the installation of the SAP S/4HANA Migration Cockpit add-on in your SAP ERP system.

The other two options, with the zero downtime service and with Core Data Services, are not valid methods of migrating data to SAP S/4HANA Cloud Public Edition. The zero downtime service is a tool that enables you to upgrade your SAP S/4HANA system with

minimal downtime, but it is not used for data migration<sup>3</sup>. Core Data Services (CDS) are a set of domain-specific languages and services for defining and consuming semantically rich data models, but they are not used for data migration<sup>4</sup>. References = Migrating Data to SAP S/4HANA Cloud, Public Edition, Migrating Data with the SAP S/4HANA Migration Cockpit, Zero Downtime Service for SAP S/4HANA, Core Data Services (CDS)

## NEW QUESTION # 18

.....

To be the best global supplier of electronic C-S4CPB-2508 study materials for our customers through innovation and enhancement of our customers' satisfaction has always been our common pursuit. The advantages of our C-S4CPB-2508 guide dumps are too many to count. And the most important point is that the pass rate of our C-S4CPB-2508 learning quiz is pretty high as 98% to 99%. I guess this is also the candidates care most as well. You can totally trust in our C-S4CPB-2508 exam questions!
