- B. Crimper
- C. Wire cutter
- D. Cable tester

- A. Cache clearing
- B. Accessibility options
- C. Private browsing
- D. Pop-up blocker

Answer: D

Explanation:
Pop-up blockers prevent new windows or tabs from opening, which can block reports that open in pop-up windows:

The requirement to change passwords every 60 days is a policy known as password expiration. It is part of enforcing secure authentication by limiting the amount of time a password is valid.
"Password expiration is a security measure that requires users to change their passwords after a specific period, such as every 60 or 90 days, to reduce the risk of compromised credentials being used over time." - CompTIA ITF+ Official Guide Password complexity refers to rules about what characters are required.
Password management refers to overall policies and tools for handling passwords.
