

# 100% CCAAK Accuracy | CCAAK Exam Simulator Free

P.S. Free & New CCAAK dumps are available on Google Drive shared by ExamcollectionPass: <https://drive.google.com/open?id=110jtLDaOrBT-02XCKDqsvrVWUBmUNfE>

The CCAAK training prep you see on our website are definitely the highest quality learning products on the market. Of course, the correctness of our CCAAK learning materials is also very important, after all, you are going to take the test after studying. And a lot of our worthy customers praised our accuracy for that sometimes they couldn't find the CCAAK Exam Braindumps on the other websites or they couldn't find the updated questions and answers. Just buy our CCAAK study guide and you won't regret!

## Confluent CCAAK Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Kafka Connect: This section of the exam measures skills of a Site Reliability Engineer and addresses the use and management of Kafka Connect for data integration. It includes setting up connectors, managing configurations, and ensuring efficient movement of data between Kafka and external systems.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Apache Kafka® Cluster Configuration: This section of the exam measures skills of a Kafka Administrator and includes configuring broker properties, tuning for performance, managing topic-level settings, and applying best practices for production-grade environments.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Apache Kafka® Fundamentals: This section of the exam measures skills of a Kafka Administrator and covers core concepts such as Kafka architecture, components, and data flow. It assesses the candidate's understanding of topics like topics and partitions, brokers, producers, consumers, and message retention.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• Deployment Architecture: This section of the exam measures skills of a Kafka Administrator and covers different Kafka deployment topologies. It evaluates understanding of high availability, disaster recovery, multi-data center replication, and the roles of Zookeeper or KRaft in the cluster architecture.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>• Observability: This section of the exam measures skills of a Site Reliability Engineer and focuses on monitoring Kafka clusters. It assesses knowledge of metrics, logging, and alerting tools, including how to use them to maintain cluster health and performance visibility.</li></ul>

## CCAAK Exam Simulator Free & Latest CCAAK Exam Dumps

It is browser-based; therefore no need to install it, and you can start practicing for the Confluent Certified Administrator for Apache Kafka (CCAAK) exam by creating the Confluent Certified Administrator for Apache Kafka (CCAAK) practice test. Our Confluent Certified Administrator for Apache Kafka (CCAAK) exam dumps give help to give you an idea about the actual Confluent CCAAK Exam. You can attempt multiple Confluent Certified Administrator for Apache Kafka (CCAAK) exam questions on the

software to improve your performance.

## Confluent Certified Administrator for Apache Kafka Sample Questions (Q45-Q50):

### NEW QUESTION # 45

Why does Kafka use ZooKeeper? (Choose two.)

- A. To prevent replication between clusters
- B. To scale the number of brokers in the cluster
- C. To access information about the leaders and partitions
- D. For controller election

**Answer: C,D**

Explanation:

ZooKeeper stores metadata such as partition leadership and ISR (in-sync replicas), which brokers use to coordinate.

Kafka uses ZooKeeper to perform leader election for the Controller broker, which manages cluster metadata and leadership changes.

### NEW QUESTION # 46

Which property in broker configuration specifies that a broker belongs to a particular rack?

Which property in broker configuration specifies that a broker belongs to a particular rack?

- A. broker.rack
- B. client.rack
- C. kafka.rack
- D. zookeeper.rack

**Answer: A**

Explanation:

The broker.rack property is used in a Kafka broker's configuration to specify the rack or availability zone the broker belongs to. This is important for rack-aware replica placement, allowing Kafka to distribute replicas across different racks for fault tolerance.

### NEW QUESTION # 47

Which tool is used for scalably and reliably streaming data between Kafka and other data systems?

- A. Kafka Schema Registry
- B. Kafka Streams
- C. Kafka Connect
- D. Kafka REST Proxy

**Answer: C**

Explanation:

Kafka Connect is the tool designed for scalable and reliable integration between Kafka and external data systems (e.g., databases, cloud storage, key-value stores). It supports source connectors (to pull data into Kafka) and sink connectors (to push data from Kafka).

### NEW QUESTION # 48

How can authentication for both internal component traffic and external client traffic be accomplished?

- A. Configure LoadBalancer.
- B. Configure multiple listeners on the broker.
- C. Configure multiple brokers.
- D. Configure multiple security protocols on the same listener.

**Answer: B**

Explanation:

Kafka supports multiple listeners, each with its own port, hostname, and security protocol. This allows you to:

- \* Use one listener for internal communication (e.g., brokers, ZooKeeper, Connect, etc.) with one type of authentication (e.g., PLAINTEXT or SASL).
- \* Use a separate listener for external clients (e.g., producers and consumers) with a different protocol (e.g., SSL or SASL\_SSL).

#### NEW QUESTION # 49

When using Kafka ACLs, when is the resource authorization checked?

- A. When the client connection is first established.
- B. Each time the resource is accessed within the configured authorization interval.
- **C. Each time the resource is accessed.**
- D. The initial time the resource is accessed.

**Answer: C**

Explanation:

Kafka ACLs (Access Control Lists) perform authorization checks every time a client attempts to access a resource (e.g., topic, consumer group). This ensures continuous enforcement of permissions, not just at connection time or intervals. This approach provides fine-grained security, preventing unauthorized actions at any time during a session.

#### NEW QUESTION # 50

.....

All kinds of exams are changing with dynamic society because the requirements are changing all the time. To keep up with the newest regulations of the Confluent Certified Administrator for Apache Kafka exam, our experts keep their eyes focusing on it. Expert team not only provides the high quality for the CCAAK Quiz guide consulting, also help users solve problems at the same time, leak fill a vacancy, and finally to deepen the user's impression, to solve the problem of CCAAK test material and no longer make the same mistake.
