

Exam CMMC-CCA Question - CMMC-CCA Reliable Test Cram

BTW, DOWNLOAD part of TestPassed CMMC-CCA dumps from Cloud Storage: https://drive.google.com/open?id=1IG4sh18nm_JyNU8rpA1c8I3wEkgTUtvD

There is no shortcut to CMMC-CCA exam questions success except hard work. You cannot expect your dream of earning the Cyber AB CERTIFICATION EXAM come true without using updated study material Certified CMMC Assessor (CCA) Exam (CMMC-CCA) exam questions. Success in the CMMC-CCA exam adds more value to your resume and helps you land the best jobs in the industry.

Cyber AB CMMC-CCA Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • CMMC Level 2 Assessment Scoping: This section of the exam measures skills of cybersecurity assessors and revolves around determining the proper scope of a CMMC assessment. It involves analyzing and categorizing Controlled Unclassified Information (CUI) assets, interpreting the Level 2 scoping guidelines, and making accurate judgments in scenario-based exercises to define what assets and systems fall within assessment boundaries.
Topic 2	<ul style="list-style-type: none"> • CMMC Assessment Process (CAP): This section of the exam measures skills of compliance professionals and tests knowledge of the full assessment lifecycle. It covers the steps needed to plan, prepare, conduct, and report on a CMMC Level 2 assessment, including the phases of execution and how to document and follow up on findings in alignment with DoD and CMMC-AB expectations.
Topic 3	<ul style="list-style-type: none"> • Assessing CMMC Level 2 Practices: This section of the exam measures skills of cybersecurity assessors in evaluating whether organizations meet the required practices of CMMC Level 2. It emphasizes applying CMMC model constructs, understanding model levels, domains, and implementation, and using evidence to determine compliance with established cybersecurity practices.
Topic 4	<ul style="list-style-type: none"> • Evaluating Organizations Seeking Certification (OSC) against CMMC Level 2 Requirements: This section of the exam measures skills of cybersecurity assessors and focuses on evaluating the environments of organizations seeking certification at CMMC Level 2. It covers understanding differences between logical and physical settings, recognizing constraints in cloud, hybrid, on-premises, single, and multi-site environments, and knowing what environmental exclusions apply for Level 2 assessments.

CMMC-CCA Reliable Test Cram, Pdf CMMC-CCA Exam Dump

Fantasy can make people to come up with many good ideas, but it can not do anything. So when you thinking how to pass the Cyber AB CMMC-CCA Exam, It's better open your computer, and click the website of TestPassed, then you will see the things you want. TestPassed's products have favorable prices, and have quality assurance, but also to ensure you to 100% pass the exam.

Cyber AB Certified CMMC Assessor (CCA) Exam Sample Questions (Q84-Q89):

NEW QUESTION # 84

In completing the assessment of practices in the Access Control (AC) domain, a CCA scored AC.L2-3.1.15:

Privileged Remote Access as NOT MET. The OSC was notified of this deficiency at the end of day two of the assessment. On day five of the assessment, the OSC's Assessment Official contacted the CCA to provide evidence that the deficiencies have been corrected.

What is the CCA's NEXT step?

- A. This practice is eligible for deficiency correction, should be scored as NOT MET, and evaluated during the Limited Deficiency Correction evaluation.
- B. This practice is not eligible for deficiency correction, should be scored as NOT MET, and reevaluated during a POA&M Close-Out Assessment.
- C. This practice is eligible for deficiency correction and should be scored as MET but must be reevaluated during a POA&M Close-Out Assessment.
- **D. This practice is not eligible for deficiency correction and should be scored as NOT MET.**

Answer: D

Explanation:

The CMMC Assessment Process (CAP) states that deficiency correction is not permitted during the assessment. Practices must be evaluated based on their implementation at the time of assessment. If the OSC corrects deficiencies after assessment activities have begun, the changes cannot be considered in the scoring.

Extract:

"Deficiency correction during the assessment is not permitted. Practices are scored based on evidence available at the time of assessment activities." Thus, the correct next step is to score the practice as NOT MET.

Reference: CMMC Assessment Process (CAP), Phase 2 Rules.

NEW QUESTION # 85

An OSC seeking Level 2 certification is reviewing the physical security of their building. Currently, the building manager unlocks and locks the doors for business operations. The OSC would like the ability to automatically unlock the door for authorized personnel, track access individually, and maintain access history for all personnel. The BEST approach is for the OSC to:

- A. Install a badge system and require each individual to use their badge to gain entry to the building
- B. Maintain a list of authorized personnel and assign them a building key.
- C. Install a keypad system and require the entry code to be changed when an individual leaves the company.
- D. Maintain security cameras to continuously monitor access to the building.

Answer: A

Explanation:

CMMC Level 2 requires the ability to control and monitor physical access to systems and facilities containing CUI. The best practice is a badge-based access control system, which provides individual accountability, access tracking, and historical audit records. Keys and keypads do not provide individual traceability. Cameras alone do not prevent unauthorized entry.

Exact Extracts (official CMMC Assessor/Study documents):

* PE.L2-3.10.1: "Limit physical access to organizational systems, equipment, and the respective operating environments to authorized individuals."

* PE.L2-3.10.3: "Escort visitors and monitor visitor activity."

* PE.L2-3.10.5: "Access records must be maintained."

* CMMC Assessment Guide clarifies that acceptable methods include badging systems with individual accountability for traceability.

Why the other options are not correct:

* A (keys): Keys do not provide audit logs or individual accountability.

* B (cameras): Monitoring alone is insufficient; prevention and control are required.

* D (keypads): Shared codes do not provide unique traceability or access history per user.

References:

CMMC Assessment Guide - Level 2, Version 2.13: PE.L2 practices (pp. 153-159).

NIST SP 800-171A, Physical and Environmental Protection (PE) assessment objectives.

NEW QUESTION # 86

AC.L1-3.1.2 requires OSCs to "limit information system access to the types of transactions and functions that authorized users are permitted to execute." Assessment Objective [a] of AC.L1-3.1.2 requires the Assessor to determine whether "the types of transactions and functions that authorized users are permitted to execute are defined." What assessment method would you use to determine whether the OSC has met this assessment objective?

- A. Test the system configuration settings
- B. Examine the list of approved authorizations, including remote access authorizations
- C. Interview system developers
- D. Review the System Security Plan

Answer: B

Explanation:

Comprehensive and Detailed in Depth Explanation:

Per NIST SP 800-171A, AC.L1-3.1.2[a] requires verifying that authorized transactions and functions are defined. Examining the list of approved authorizations (Option D) directly provides this evidence, detailing what each user can do, including remote access permissions, as specified in CMMC guidance. Option A (interviews) supplements but isn't primary. Option B (testing) verifies implementation, not definition. Option C (SSP review) is broader and less specific. Option D is the correct answer per NIST SP 800-171A.

Reference Extract:

* NIST SP 800-171A, AC-3.1.2[a]: "Examine approved authorizations to determine if transactions and functions are defined." Resources: <https://csrc.nist.gov/pubs/sp/800/171/a/final>

NEW QUESTION # 87

In ensuring it meets its mandates to protect CUI under CMMC, a contractor has implemented a robust, dynamic session lock with pattern-hiding displays to prevent access and viewing of data. After every 5 minutes of inactivity, the current session is locked and a blank, black screen with a battery life indicator is displayed. As a CCA, you will potentially use the following assessment methods to examine the contractor's implementation of session lock EXCEPT?

- A. Interview the system administrator
- B. Test the mechanisms implementing the access control policy for session lock
- C. Examine the system design documentation
- **D. Test the strength of the user's password**

Answer: D

Explanation:

Comprehensive and Detailed In-Depth Explanation:

AC.L2-3.1.10 - Session Lock requires "initiating a session lock after inactivity." Interviewing admins (A), examining docs (B), and testing mechanisms (D) assess implementation. Password strength (C) relates to IA.

L2-3.5.7, not session lock, per the CMMC guide's focus on lock-specific methods.

Extract from Official CMMC Documentation:

* CMMC Assessment Guide Level 2 (v2.0), AC.L2-3.1.10: "Interview, examine docs, test lock mechanisms."

* NIST SP 800-171A, 3.1.10: "Exclude password strength from lock assessment." Resources:

* [https://dodcio.defense.gov/Portals/0/Documents/CMMC/AG_Level2_MasterV2.](https://dodcio.defense.gov/Portals/0/Documents/CMMC/AG_Level2_MasterV2.0_FINAL_202112016_508.pdf)

NEW QUESTION # 88

You are a Lead Assessor working with your C3PAO to conduct a CMMC Assessment for an OSC. During the preparation and planning phase, you meet with the OSC's Assessment Official to identify the resources and schedule for the upcoming assessment. Together, you review the OSC's pre-assessment information to estimate the level of effort required. You then collaborate to determine the specific resources needed, including the Assessment Team members, facilities, and any support personnel from the OSC. You also discuss scheduling factors like duration, key activities, and potential constraints. Based on these discussions, you develop a Rough Order of Magnitude (ROM) cost estimate and a proposed daily schedule for the assessment activities. What is your primary responsibility in identifying resources and schedule during Phase 1?

- A. Finalizing the contract agreement between the C3PAO and OSC.
- B. Determining the overall cost estimate for the assessment.
- C. Selecting the assessment team members and their roles.
- **D. Verifying that all planning requirements are met when constructing the ROM estimate.**

Answer: D

Explanation:

Comprehensive and Detailed in Depth Explanation:

The CAP designates the Lead Assessor's primary Phase 1 responsibility as ensuring all planning requirements (e.g., scope, resources, schedule) are met for the ROM, not finalizing contracts (Option A), selecting team members (Option B, a C3PAO task), or just cost estimation (Option C). Option D encompasses the full scope.

Extract from Official Document (CAP v1.0):

* Section 1.5 - Assessment Planning (pg. 16): "The Lead Assessor is responsible for verifying that all planning requirements are met when constructing the ROM estimate." References:

CMMC Assessment Process (CAP) v1.0, Section 1.5.

NEW QUESTION # 89

.....

What is the selling point of a product? It is the core competitiveness of this product that is ahead of other similar brands. The core competitiveness of the CMMC-CCA study materials, as users can see, we have a strong team of experts, the CMMC-CCA study materials are advancing with the times, updated in real time, so that's why we can with such a large share in the market. Through user feedback recommendations, we've come to the conclusion that the CMMC-CCA Study Materials have a small problem at present, in the rest of the company development plan, we will continue to strengthen our service awareness, let users more satisfied with our CMMC-CCA study materials, we hope to keep long-term with customers, rather than a short high sale.
