The web-based format gives results at the end of every Juniper JN0-452 practice test attempt and points the mistakes so you can get rid of them before the final attempt. This online format of the Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) (JN0-452) practice exam works well with Android, Mac, Windows, iOS, and Linux operating systems.

If you are ready for the exam for a long time, but lack of a set of suitable JN0-452 learning materials, I will tell you that you are so lucky to enter this page. We are such JN0-452 exam questions that you can use our products to prepare the exam and obtain your dreamed JN0-452 certificates. We all know that if you desire a better job post, you have to be equipped with appropriate professional quality and an attitude of keeping forging ahead. Our JN0-452 exam questions will be your best ally to get what you wanted.

Juniper JN0-452 Valid Test Braindumps & JN0-452 Hot Questions

Preparing for the JN0-452 test can be challenging, especially when you are busy with other responsibilities. Candidates who don't use JN0-452 dumps fail in the JN0-452 examination and waste their resources. Using updated and valid JN0-452 questions; can

help you develop skills essential to achieve success in the JN0-452 Certification Exam. That's why it's indispensable to use Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) (JN0-452) real exam dumps. DumpExam understands the significance of Updated Juniper JN0-452 Questions, and we're committed to helping candidates clear tests in one go.

Juniper Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) Sample Questions (Q22-Q27):

NEW QUESTION # 22
Your organization has recently purchased new VoIP handsets. All of the VoIP handsets fail to connect to the corporate WLAN. However, all other devices connect successfully. You expect that there might be a bug with the new handsets. The vendor asks you to provide a pcap file of the handsets' connection attempts.
Which Juniper Mist feature will provide this file?

- A. Service Level Expectations
- B. Dynamic Packet Capture
- C. Clients Insights
- D. Alerts dashboard

Answer: D

Explanation:
According to the Cisco Catalyst 9800 Series Wireless Controller Software Configuration Guide2, Dynamic Packet Capture is a feature that enables capturing packets from a client device and downloading them as a pcap file. This file can be used for troubleshooting purposes or sent to a vendor for analysis.

NEW QUESTION # 23
A university is setting up a wireless network in a new dormitory. They are using dual-band APs in every room. To maximize 5 GHz capacity and minimize 2.4 GHz interference, they want to convert some of the APs so that both of their radios operate in the 5 GHz band. This needs to be done automatically by the Mist system based on the RF environment.
Which AP models support this feature, and what is it called in the RF Template? (Choose 2.)

- A. All Mist APs support this feature.
- B. The AP43 is a supported model for this feature.
- C. The AP12 is a supported model for this feature.
- D. This feature can only be configured manually on each AP.
- E. The feature is called "Dual Band Radio Settings" and can be set to "5 GHz".
- F. The feature is called "Band Steering".

Answer: B,E

NEW QUESTION # 24
Which two authentication methods would be used with a guest portal? (Choose two.)

- A. Kerberos
- B. RSA
- C. social login
- D. external portal

Answer: C,D

NEW QUESTION # 25
What is the AP's role in the IEEE 802.1X authentication process?

- A. It acts as a RADIUS proxy server.
- B. It acts as a supplicant.

- C. It acts as an authenticator.
- D. It acts as an authentication server.

Answer: C

Explanation:
In the IEEE 802.1X authentication process, the AP acts as an authenticator.
According to the Lecture 5 - Security - Part 1 document, the AP's role in the IEEE 802.1X authentication process is to act as an authenticator. This means that the AP acts as a gatekeeper between the client device (supplicant) and the RADIUS server (authentication server). The AP forwards authentication messages between the supplicant and the server and grants or denies network access based on the server's response.

NEW QUESTION # 26
You are building your floor plan for a recent Juniper Mist deployment and you must ensure that when you are finished, you can track user movements and locations throughout the floor plan. In this scenario, which statement is correct regarding AP orientation in the Mist UI?

- A. In the UI, the orientation of the APs will not affect Mist's location services.
- B. In the UI, the APs must be oriented on the floor plan in the same direction as the physical APs.
- C. In the UI, the APs must all be oriented on the floor plan to face true north.
- D. In the UI, the APs must all be oriented on the floor plan to face geographical north.

Answer: B

Explanation:
In a Juniper Mist AI deployment, achieving high-fidelity location accuracy is entirely dependent on the digital twin (the floor plan in the Mist UI) accurately reflecting the physical environment. While scaling the map is the foundation, AP orientation is the most critical variable for the vBLE (virtual Bluetooth Low Energy) engine to correctly calculate a client's position.
Mist Access Points, such as the AP43 or AP45, feature a patented 16-element directional vBLE antenna array. This array does not broadcast in a simple omnidirectional circle; instead, it uses eight distinct directional beams to blanket an area. The Mist Cloud uses "probability surfaces" to determine a user's location by examining the RF fingerprints from these specific beams. If an AP is physically mounted with its LED pointing toward a specific hallway, but is oriented in the Mist UI facing a different direction, the location engine will receive signal data that does not match its internal map of the beams. This results in "flipped" locations or "teleporting," where a user appears on the opposite side of the AP from where they actually are.
To ensure accuracy, administrators must use the small green dot on the outer ring of the AP icon in the Mist Live View. This green dot represents the physical LED on the AP hardware. The orientation in the UI must be rotated so that the green dot points in the exact same direction as the physical LED relative to the floor plan's perspective. It is a common misconception that APs must face true north (A) or geographical north (D); the map and APs can be oriented in any way that is convenient for the facility layout, provided the relative alignment between the virtual icon and the physical device is identical.

NEW QUESTION # 27
......

DumpExam has launched the JN0-452 exam dumps with the collaboration of world-renowned professionals. DumpExam JN0-452 exam study material has three formats: JN0-452 PDF Questions, desktop JN0-452 practice test software, and a JN0-452 web-based practice exam. You can easily download these formats of Juniper JN0-452 actual dumps and use them to prepare for the Juniper JN0-452 certification test.
