### Salesforce Certified Sharing and Visibility Architect Sample Questions (Q33-Q38):

#### NEW QUESTION # 33

Ursa Major Solar is writing test methods.

Which functionality does the system method "runAs()" Verify?

- A. Enforcement of a user's field-level security.
- B. Enforcement of user's permissions.
- **C. Enforcement of a user's record sharing**
- D. Enforcement of a user's public group assignments.

**Answer: C**

Explanation:

Explanation

The runAs() method can be used to verify the enforcement of a user's record sharing, which determines what records they can view and edit. Option A is incorrect, since public group assignments are not enforced by runAs(). Option B and C are incorrect, since field-level security and permissions are not affected by runAs()

#### NEW QUESTION # 34

If a Case requires involvement from one of the Legal team, the Case owner adds one of the corporate lawyers to the Legal SME field on the case.

Since cases are private, how can we grant a lawyer access to a specific case when their assistance is needed?

- A. Create an Criteria Based Sharing Rule that shares to the Corporate Legal Team Role when the "legal assistance needed? Field is checked.
- B. Create a Criteria Based Sharing Rule that shares to the Legal Public Group when the "legal assistance needed?" field is checked.
- **C. Use Apex Managed sharing in a case Trigger that shares the record to the user identified in the Legal SME field.**

**Answer: C**

#### NEW QUESTION # 35

Universal Containers uses Person Accounts to represent retail customers and Business Accounts to represent commercial customers. The retail sales team should not have access to commercial customers but should have access to ALL retail customers. With the organization-wide default on Account set to Private, how should the architect meet these requirements?

- A. Create an owner-based sharing rule on AccountContactRelation to grant a@coess to all account contact roles records owned by retail sales reps.
- B. Update the Retail Sales profile to grant access to Person Account record type.
- **C. Create o criteria-based sharing rule giving the Retail Sales role access to Accounts of type PersonAccount.**

**Answer: C**

#### NEW QUESTION # 36

Universal Containers is designing a new community using the Customer Community license type. They would like to have the users complete survey questions through the community interface and store the responses in a Custom Object that has a lookup to the

account object. Any internal user who has access to the account should be able to see all survey responses. All Customer Community users should be able to see surveys filled in by other users for their company, but not surveys for other companies. What are the correct security settings to achieve this?

- A. Set all Organization-Wide Default security to be "Public Read/Write" for internal users and "Private" for external users.
- **B. Set all Organization-Wide Default security to be "Private" for both internal and external users and use Sharing Rules to grant the desired access**
- C. Set the custom object to be master-detail to the Account and leave the Organization-Wide Default settings as their default values.
- D. Set all Organization-Wide Default settings to be "Public Read/Write" for both internal and external users.

**Answer: B**

#### NEW QUESTION # 37

Universal Containers (UC) service reps are assigned to a profile which has View All on the Case object. The organization-wide default (OWD) for the Account and Case objects is Private.

To make sure service reps have access to all relevant information (Accounts and Contacts) to attend to customer requests, which detail should an architect consider?

- A. Service reps will NOT be able to access the relevant Contacts if their OWD is Controlled by Parent.
- **B. Service reps will be able to access the relevant Contacts if their OWD is Controlled by Parent.**
- C. Service reps will NOT be able to access the relevant Accounts if their OWD is Private.

**Answer: B**

Explanation:

\* OWD Settings and Access Control:

\* When the OWD for Contacts is "Controlled by Parent," access to the Contact is determined by access to the related Account.

\* Why Option C is Correct:

\* Service reps have "View All" permission on Cases, granting them access to related Accounts.

Since Contacts are controlled by the parent Account, service reps also gain access to relevant Contacts.

\* Why Others Are Incorrect:

\* Option A: Service reps can access Accounts related to Cases they can view, even if the OWD is Private.

\* Option B: Contacts controlled by the parent are accessible as long as the parent Account is accessible.

For detailed guidance, see Salesforce documentation on OWD and Controlled by Parent: <https://help.salesforce.com/>

#### NEW QUESTION # 38

.....
