## 2026 Pass-Sure AZ-800: Administering Windows Server Hybrid Core Infrastructure Valid Test Review

As is known to us, people who want to take the AZ-800 exam include different ages, different fields and so on. It is very important for company to design the AZ-800 exam prep suitable for all people. However, our company has achieved the goal. We can promise that the AZ-800 test questions from our company will be suitable all people. There are many functions about our study materials beyond your imagination. You can purchase our AZ-800 reference guide according to your own tastes. We believe that the understanding of our study materials will be very easy for you. We hope that you can choose the AZ-800 test questions from our company, because our products know you better.

## Microsoft Administering Windows Server Hybrid Core Infrastructure Sample Questions (Q214-Q219):

### NEW QUESTION # 214

You need to ensure that VM3 meets the technical requirements.  
What should you install first?

- A. Windows Standards-Based Storage Management
- B. the iSNS Server service
- C. Enhanced Storage
- D. File Server Resource Manager (FSRM)

**Answer: D**

Explanation:

To meet the requirement that VM3 be configured for per-folder quotas, the Windows Server file services module directs you to install File Server Resource Manager (FSRM). The course content explains: "FSRM provides quota management, file screening, and storage reporting. Quotas can be applied to volumes and to specific folders, enabling administrators to control the space consumed." None of the other features listed deliver folder-level quota capability: Enhanced Storage and Windows Standards-Based Storage Management relate to storage management/SMI-S, and iSNS Server concerns iSCSI discovery services. Therefore, the first step is to install FSRM on VM3; after installation, you can create per-folder quota templates and assignments to enforce the desired limits.

#### NEW QUESTION # 215

You have a server that runs Windows Server and contains a shared folder named UserData.

You need to limit the amount of storage space that each user can consume in UserData.

What should you use?

- A. Storage Spaces
- B. Work Folders
- **C. File Server Resource Manager (FSRM)**
- D. Distributed File System (DFS) Namespaces

**Answer: C**

Explanation:

File Server Resource Manager includes the following features:

Quota management allows you to limit the space that is allowed for a volume or folder, and they can be automatically applied to new folders that are created on a volume. You can also define quota templates that can be applied to new volumes or folders.

#### NEW QUESTION # 216

You need to implement a name resolution solution that meets the networking requirements. Which two actions should you perform?

Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point

- A. Configure a conditional forwarder on DC3.
- B. Create an Azure DNS zone named corp.fabrikam.com
- **C. Configure the DNS Servers settings for Vnet1.**
- D. Create an Azure private DNS zone named corp.fabnkam.com
- E. Enable autoregistration in the corp.fabnkam.com Azure private DNS zone.
- F. Create a virtual network link in the coip.fabnkam.com Azure private DNS zone.
- **G. On DC3, install the DNS Server role.**

**Answer: C,G**

Explanation:

Virtual machines in an Azure virtual network receive their DNS configuration from the DNS settings configured on the virtual network. You need to configure the Azure virtual network to use DC3 as the DNS server. Then all virtual machines in the virtual network will use DC3 and their DNS server.

#### NEW QUESTION # 217

You have four testing devices that are configured with static IP addresses as shown in the following table.

The test devices are turned on once a month.

You need to prevent Server1 from assigning the IP addresses allocated to the test devices to other devices when the test devices are offline. The solution must minimize administrative effort.

What should you do?

- **A. Create reservations.**
- B. Configure the Scope options.
- C. Create a policy.

- D. Create an exclusion range.

**Answer: A**

### NEW QUESTION # 218

You plan to deploy an Azure virtual machine that will run Windows Server. The virtual machine will host an Active Directory Domain Services (AD DS) domain controller and a drive named f: on a new virtual disk.

You need to configure storage for the virtual machine. The solution must meet the following requirements

- \* Maximize resiliency for AD DS.
- \* Prevent accidental data loss.

How should you configure the storage? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation

### NEW QUESTION # 219

.....
