SAFe-SPC PDF Demo & SAFe-SPC Quizfragen Und Antworten

Prüfung Frage ist nicht nur zuverlässig, sondern bietet auch erstklassigen Service. Wenn Sie die Prüfung nach dem Kauf der SAFe-SPC -Produkte nicht bestehen, versprechen wir Ihnen 100% eine volle Rückerstattung. Prüfung Frage steht Ihnen auch einen einjährigen kostenlosen Update-Service zur Verfügung.

Scaled Agile SAFe-SPC Prüfungsplan:

Thema	Einzelheiten

Thema 1	• Designing the Implementation: This section of the exam measures skills of the Release Train Engineer and covers the steps for designing a SAFe implementation. It introduces the identification of value streams and Agile Release Trains and describes how to create an implementation plan. Lesson 9 shows how structure and planning support a smooth transformation process.
Thema 2	• Enhancing the Portfolio: This section of the exam measures skills of the Enterprise Architect and addresses the scaling of value delivery. It discusses launching additional ARTs and value streams, strengthening enterprise solution delivery, and improving portfolio operations. It also reviews Lean governance and the ongoing work of LPM implementation. Lesson 12 focuses on expanding organizational capability.
Thema 3	• Becoming a Lean Agile Leader: This section of the exam measures skills of the Team Leader and focuses on the mindset required to lead with Lean Agile values. It explains the Lean Agile mindset, reviews SAFe core values, and presents SAFe principles in simple and practical terms. Lesson 2 helps leaders understand how their actions influence team culture and continuous improvement.
Thema 4	• Coaching ART Execution: This section of the exam measures skills of the Agile Coach and covers coaching the train and the teams during execution. It explains the value of continuous improvement and presents the Inspect and Adapt process in a simplified manner. Lesson 11 reinforces how coaching improves team performance and overall ART outcomes.
Thema 5	• Reaching the SAFe Tipping Point: This section of the exam measures skills of the Transformation Champion and addresses the earliest stages of change. It explains how to establish a clear vision for change and how to build a strong guiding coalition. Lesson 8 highlights the importance of commitment and sponsorship at the start of a transformation journey.
Thema 6	• Thriving in the Digital Age and Business Agility: This section of the exam measures skills of the Agile Team Member and covers the foundations of thriving in a digital environment. It introduces how SAFe functions as an operating system for Business Agility and highlights the essential core competencies needed for modern enterprises. Lesson 1 guides learners on how organizations adapt, innovate, and remain competitive in fast changing markets.
Thema 7	• Launching an Agile Release Train: This section of the exam measures skills of the Scrum Master and focuses on the activities required to launch an Agile Release Train. It explains the preparation work, the training of teams, and the launch activities that bring the ART to life. Lesson 10 emphasizes readiness and alignment between teams.
Thema 8	• Leading the Change: This section of the exam measures skills of the Change Leader and focuses on guiding transformation. It reviews how to lead by example, how to lead organizational change, and how to apply the SAFe implementation roadmap. Lesson 6 provides a simple view of the leadership behaviors needed to support enterprise level change.
Thema 9	• Exploring Lean Portfolio Management: This section of the exam measures skills of the Portfolio Manager and covers the structure of the SAFe portfolio. It explains how to connect the portfolio to enterprise strategy, maintain the portfolio vision, and manage this vision through epics. It also presents Lean budgets and guardrails and introduces the concept of portfolio flow. Lesson 5 shows how strategic alignment supports value delivery.
Thema 10	• Building Solutions with Agile Product Delivery: This section of the exam measures skills of the Product Owner and focuses on delivering customer centric value. It explains design thinking, backlog prioritization, and program increment planning in a clear manner. It also covers developing on cadence and releasing on demand, followed by an overview of the continuous delivery pipeline with DevOps. Lesson 4 guides learners on building solutions that align with user needs.
Thema 11	• Establishing Team and Technical Agility: This section of the exam measures skills of the Agile Practitioner and introduces the characteristics of cross functional Agile teams. It explains the importance of built in quality and describes how Agile Release Trains are organized around the flow of value. Lesson 3 emphasizes the ability of teams to deliver reliable outcomes through technical discipline.

Scaled Agile SAFe Practice Consultant SPC (6.0) SAFe-SPC Prüfungsfragen mit Lösungen (Q24-Q29):

24. Frage

What is one of the primary enablers for Implementing SAFe?

- A. Coach ART execution
- B. Prepare for ART Launch
- C. Create a Lean-Agile Center of Excellence (LACE)
- D. Enhance the Portfolio

Antwort: C

Begründung:

A Lean-Agile Center of Excellence (LACE) is called out by SAFe as one of the primary enablers of a successful SAFe implementation. The LACE is a cross-functional team that drives and sustains the Lean- Agile transformation by providing guidance, training, and support throughout the journey.

References:

SAFe 6.0, "Create the Implementation Plan" and "Establish a LACE"

SPC 6.0 Guide, "Leading the Change" and "Implementing SAFe"

25. Frage

Multiple ARTs in a Value Stream typically require coordination at the Value Stream Level.

- A. False
- B. True

Antwort: B

Begründung:

In SAFe, when a solution requires more capacity than a single ART (Agile Release Train) can provide, multiple ARTs are grouped into a Solution Train. These ARTs work together within a Value Stream. The Value Stream level provides coordination, additional roles, and artifacts to align the multiple ARTs toward delivering larger, complex solutions.

"When multiple ARTs collaborate to build a solution, coordination at the Value Stream level is required. The Solution Train roles and events support alignment and integration of the work across ARTs and Suppliers." References:

26. Frage

(Select 3) You are invited to help a program where, even though not mandated by the external environment, management requires teams to make big, up-front, and detailed scope commitments for every release.

What would you do to best coach the decision-makers?

- A. Explain that too much up-front detail demotivates Product Owners as they have almost nothing to do thereafter.
- B. Explain why development doesn't need to commit to anything in Agile.
- C. Illustrate the power of feedback in content decision-making.
- D. Explain the "understand and exploit variability" principle of product development flow.
- E. Emphasize the value of "Responding to change" from the Agile Manifesto.

Antwort: C,D,E

Begründung:

Coaching leaders away from big, up-front commitments is best achieved by:

A). Illustrating the power of feedback for adaptive planning and better outcomes.

B). Emphasizing "Responding to change"-a core Agile value.

D). Explaining the principle of "understand and exploit variability" from Lean Product Development, which underpins Agile's adaptive nature.

The other options are not effective or do not align with SAFe or Agile principles.

"Agile development values responding to change and making use of feedback and variability. Big, up-front scope commitments limit adaptability and learning." (Source: SAFe 6.0 Framework: Principles, Agile Manifesto, Product Development Flow)

27. Frage

During PI Planning, which statement is true about the activities of team breakouts?

- A. In team breakout #1, teams finalize ART PI Risks, impediments, and dependencies
- B. In team breakout #2, teams establish a draft of their business objectives
- **C. In team breakout #2, teams work to create their final plans**
- D. In team breakout #1, teams meet with Business Owners to assign business value

Antwort: C

Begründung:

During PI Planning, there are two main team breakout sessions. In team breakout #2, teams address issues identified in the management review, rework their plans as needed, and finalize their PI Objectives and plans.

This second breakout is specifically dedicated to refining and finalizing the team plans before the confidence vote.

SAFe 6.0, "PI Planning" (Team Breakout Sessions)

SPC 6.0 Guide, "Launching an Agile Release Train"

28. Frage

What description best represents Capabilities as defined in SAFe?

- A. Capability is a different name for Features, one that is preferred by some organizations.
- **B. Capabilities are simply a level of abstraction above Features, exhibiting largely the same characteristics and practices.**
- C. Capabilities are simply a different kind of Epic, exhibiting largely the same characteristics and practices.
- D. Capabilities are simply a level of abstraction above Epics, exhibiting largely the same characteristics and practices.

Antwort: B

Begründung:

In SAFe 6.0, Capabilities are defined as "higher-level solution behaviors that typically span multiple ARTs." They are maintained in the Solution Train Backlog and are sized and split into Features for implementation by individual ARTs. The SAFe 6.0 guidance specifically states:

"Capabilities are larger solution behaviors that often span multiple Agile Release Trains. They are typically sized to be delivered in a Planning Interval (PI) and are broken down into Features to facilitate implementation." This distinguishes Capabilities from Epics and Features. Unlike Epics, which require Lean Business Cases and approval through Portfolio Kanban, Capabilities follow a breakdown path to Features for execution.

Therefore, they are a level above Features, not a synonym for Epics or Features.
