ECCouncil Certified Threat Intelligence Analyst Sample Questions (Q50-Q55):

NEW QUESTION # 50

Henry, a threat intelligence analyst at ABC Inc., is working on a threat intelligence program. He was assigned to work on establishing criteria for prioritization of intelligence needs and requirements.

Which of the following considerations must be employed by Henry to prioritize intelligence requirements?

- A. Produce actionable data
- B. Understand data reliability
- **C. Understand frequency and impact of a threat**
- D. Develop a collection plan

Answer: C

NEW QUESTION # 51

During the process of threat intelligence analysis, John, a threat analyst, successfully extracted an indication of adversary's information, such as Modus operandi, tools, communication channels, and forensics evasion strategies used by adversaries. Identify the type of threat intelligence analysis is performed by John.

- **A. Tactical threat intelligence analysis**
- B. Operational threat intelligence analysis
- C. Strategic threat intelligence analysis
- D. Technical threat intelligence analysis

Answer: A

NEW QUESTION # 52

Andrews and Sons Corp. has decided to share threat information among sharing partners. Garry, a threat analyst, working in Andrews and Sons Corp., has asked to follow a trust model necessary to establish trust between sharing partners. In the trust model used by him, the first organization makes use of a body of evidence in a second organization, and the level of trust between two organizations depends on the degree and quality of evidence provided by the first organization.

Which of the following types of trust model is used by Garry to establish the trust?

- A. Mandated trust
- **B. Validated trust**
- C. Mediated trust
- D. Direct historical trust

Answer: B

Explanation:

In the trust model described, where trust between two organizations depends on the degree and quality of evidence provided by the first organization, the model in use is 'Validated Trust.' This model relies on the validation of evidence or credentials presented by one party to another to establish trust. The validation process assesses the credibility, reliability, and relevance of the information shared, forming the basis of the trust relationship between the sharing partners. This approach is common in threat intelligence sharing where the accuracy and reliability of shared information are critical. References:

NEW QUESTION # 53

Tyrion, a professional hacker, is targeting an organization to steal confidential information. He wants to perform website footprinting to obtain the following information, which is hidden in the web page header.

Connection status and content type

Accept-ranges and last-modified information

X-powered-by information

Web server in use and its version

Which of the following tools should the Tyrion use to view header content?

- A. AutoShun
- B. Hydra
- C. Vanguard enforcer
- **D. Burp suite**

Answer: D

NEW QUESTION # 54

What is the correct sequence of steps involved in scheduling a threat intelligence program?

1. Review the project charter
2. Identify all deliverables
3. Identify the sequence of activities
4. Identify task dependencies
5. Develop the final schedule
6. Estimate duration of each activity
7. Identify and estimate resources for all activities
8. Define all activities
9. Build a work breakdown structure (WBS)

- A. 3-->4-->5-->2-->1-->9-->8-->7-->6
- **B. 1-->9-->2-->8-->3-->7-->4-->6-->5**
- C. 1-->2-->3-->4-->5-->6-->9-->8-->7
- D. 1-->2-->3-->4-->5-->6-->7-->8-->9

Answer: B

Explanation:

The correct sequence for scheduling a threat intelligence program involves starting with the foundational steps of defining the project scope and objectives, followed by detailed planning and scheduling of tasks. The sequence starts with reviewing the project charter (1) to understand the project's scope, objectives, and constraints. Next, building a Work Breakdown Structure (WBS) (9) helps in organizing the team's work into manageable sections. Identifying all deliverables (2) clarifies the project's outcomes. Defining all activities (8) involves listing the tasks required to produce the deliverables. Identifying the sequence of activities (3) and estimating resources (7) and task dependencies (4) sets the groundwork for scheduling. Estimating the duration of each activity (6) is critical before developing the final schedule (5), which combines all these elements into a comprehensive plan. This approach ensures a structured and methodical progression from project initiation to execution.
