Persistence and proficiency made our experts dedicated in this line over so many years. Their passing rates are over 98 and more, which is quite riveting outcomes. After using our C-TS422-2023 practice materials, you will have instinctive intuition to conquer all problems and difficulties in your review. We are sure you can seep great deal of knowledge from our C-TS422-2023 practice materials in preference to other materials obviously. These C-TS422-2023 practice materials have variant kinds including PDF, app and software versions.

SAP C-TS422-2023 Exam Syllabus Topics:

| Topic | Details |
|---------|--|
| Topic 1 | <ul style="list-style-type: none">• Production Orders in SAP S• 4HANA: This section covers BOM item categorization, order status management, availability checks, routing selection, order type setup, and material handling processes. |
| | |

| | |
|---------|---|
| Topic 2 | <ul style="list-style-type: none"> • Master Data in SAP S • 4HANA: This section covers the exploration of crucial production-related master data elements, with emphasis on bill of material, routing, and production version. |
| Topic 3 | <ul style="list-style-type: none"> • Material Requirements Planning in SAP S • 4HANA: This part of the exam covers an examination of planning strategies, tools, and long-term planning concepts. Overview of MRP fundamentals and lot size procedures. |
| Topic 4 | <ul style="list-style-type: none"> • Introduction to SAP S • 4HANA Production Planning: This section covers an overview of production planning components, functions, and planning approaches. Exploration of emerging trends. |
| Topic 5 | <ul style="list-style-type: none"> • Introduction to SAP S • 4HANA Supply Chain Planning: This part covers the background and motivation for SAP S • 4HANA, its main components, business applications, and user experience strategy. |
| Topic 6 | <ul style="list-style-type: none"> • Managing Clean Core: This section covers the application of clean core principles to enhance business process agility, reduce adaptation efforts, and drive innovation in ERP systems. |

Reliable C-TS422-2023 Study Notes, Accurate C-TS422-2023 Study Material

If you want to get satisfying result in SAP C-TS422-2023 practice test, our online training materials will be the best way to success, which apply to any level of candidates. We guarantee the best deal considering the quality and price of C-TS422-2023 Braindumps Pdf that you won't find any better available. Our learning materials also contain detailed explanations expert for correct C-TS422-2023 test answers.

SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Sample Questions (Q48-Q53):

NEW QUESTION # 48

What determines whether the planned independent requirements in demand management are consumed by other requirements?

Note: There are 2 correct answers to this question.

- A. Order type
- **B. Planning strategy**
- **C. Requirements type**
- D. Requirements profile

Answer: B,C

Explanation:

In SAP S/4HANA Demand Management, planned independent requirements (PIRs) represent forecasted demand for finished products. Their consumption by other requirements (e.g., sales orders) depends on settings in the material master:

* Requirements type (C): This is determined by the planning strategy and specifies the type of PIR (e.g., VSF for forecast-based planning). It is maintained in the material master (MRP 3 view) or derived from the planning strategy. The requirements type dictates how PIRs are consumed (e.g., by sales orders) and is visible in demand management (transaction MD61). For example, requirements type "LSF" (from strategy 40) allows consumption by sales orders.

* Planning strategy (D): Defined in the material master (MRP 3 view, field: Strategy Group), the planning strategy (e.g., 40 - Planning with Final Assembly) controls whether and how PIRs are consumed. For instance, strategy 10 (Make-to-Stock) does not allow consumption, while strategy 40 reduces PIRs based on incoming sales orders within the consumption period.

Order type (A) relates to production or sales order processing, not PIR consumption logic. Requirements profile (B) is not a standard SAP term in this context and does not directly influence consumption (it may refer to custom settings, but it's not part of SAP's standard demand management). This is detailed in SAP's official Demand Management documentation.

NEW QUESTION # 49

Which of the following elements does MRP take into account during net requirement calculation?

Note: There are 2 correct answers to this question.

- A. Planned orders (unfirmed)
- **B. Planned orders (firmed)**
- C. ATP quantities
- **D. Production orders**

Answer: B,D

NEW QUESTION # 50

How can you achieve a feasible production plan in case of capacity constraints? Note: There are 3 correct answers to this question.

- A. Reduce the planning time interval.
- **B. Determine a time period with available capacity on the planning board.**
- **C. Form optimum sequences to reduce setup times.**
- **D. Increase the capacity supply in a timephased interval.**
- E. Execute an infinite production planning run for the critical resources.

Answer: B,C,D

NEW QUESTION # 51

You want to set up a make-to-order planning scenario for a finished material. The bill of material contains two components: one should be procured for each sales order individually, and the other should be procured jointly for all independent requirements. Forecasting for the finished product is NOT possible. Which settings do you make to achieve this?

- **A. Choose planning strategy 20 (Make-to-Order) and select the corresponding Individual/Collective indicator.**
- B. Choose planning strategy 50 (Planning without final assembly) and select the - corresponding Individual/Collective indicator.
- C. Choose planning strategy 50 (Planning without final assembly) and select the corresponding Mixed MRP indicator.
- D. Choose planning strategy 20 (Make-to-Order) and select the corresponding Mixed MRP indicator.

Answer: A

Explanation:

To set up a make-to-order planning scenario for a finished material, you need to choose planning strategy 20 (Make-to-Order) and select the corresponding Individual/Collective indicator for the components in the bill of material. This way, you can control whether the components are procured individually or collectively for the sales orders. The following steps explain how to achieve this: In the material master record of the finished material, you need to select the MRP type PD (MRP) and the strategy group 20 (Make-to-Order) in the MRP 1 view. This means that the finished material is planned based on the sales order requirements and not on the forecast¹².

In the bill of material of the finished material, you need to select the Individual/Collective indicator for each component. This indicator determines whether the component is procured individually for each sales order or collectively for all independent requirements. For the component that should be procured for each sales order individually, you need to select the indicator 2 (Individual requirements only). For the component that should be procured jointly for all independent requirements, you need to select the indicator 1 (Collective requirements only)³.

When you create a sales order for the finished material, the system generates a sales order item and a planned independent requirement for the finished material. The planned independent requirement is used as a planning element in MRP and triggers the procurement of the components according to the Individual/Collective indicator. For the component with indicator 2, the system creates a dependent requirement that is linked to the sales order item. For the component with indicator 1, the system creates an independent requirement that is not linked to the sales order item.

NEW QUESTION # 52

What are the options if the Dispatched operation status is set for a production order operation? Note: There are 2 correct answers to this question.

- A. You can reschedule the operation using finite scheduling in a planning table.
- B. You can reschedule the operation using lead time scheduling.
- C. You can reschedule the operation in the Manage Work Center Capacity app.
- D. You can reschedule the operation using infinite scheduling in a planning table.

Answer: A,C

NEW QUESTION # 53
