Region and Regionalism

The region is a large area with boundaries set by various cultural and natural criteria. It widely divided by physical geography, human geography, and environmental aspects like the interaction between the environment and humanity.

Regionalism is occurred because of the monotonous building of the International Style in all over the world. Apart from the vernacular architecture, regionalism has a conscious in design.

Karakaş Mosque, Antalya, Turkey, 2003

Salesforce Certified B2B Solution Architect合格問題

我々はArch-301問題集の英語版と日本語版を開発しています。英語版と日本語版の内容が同じですが、言葉だけ違います。Arch-301問題集に英語試験と日本語試験を準備する受験者たちは気楽に試験に合格することができます。それに、我々のSalesforceのArch-301日本語版問題集を購入するなら、英語版をおまけにさし上げます。

Salesforce Certified B2B Solution Architect 認定 Arch-301 試験問題 (Q79-Q84):

質問 # 79

Northern Trail Outfitters (WTO) has around 500,000 active customers stored in the Account object. NTO gets an average of two orders per customer each month from both internal and online sales channels. NTO is expecting growth of 15% year-over-year (YoY). Various NTO users have recently started complaining about slower performances while accessing order information or running reports. NTO customers are also seeing slower responses while accessing their order history on B2B Commerce. Which two options should a Solution Architect consider to improve performance? Choose 2 answers

- A. Develop an archiving strategy around order records from Salesforce based on a criteria that works with customer.
- B. Create a custom component to display all order information.
- C. Enable reporting snapshots to store summarised information.
- D. Use external objects instead of standard B2B Commerce Order object.

正解: A、D

解説:

To address performance issues at Northern Trail Outfitters, developing an archiving strategy for older order records can significantly improve system responsiveness by reducing the volume of data actively queried and processed. Additionally, leveraging external objects to manage order data, especially for historical or less frequently accessed records, can further alleviate the load on Salesforce's core databases, improving performance for both internal users and B2B Commerce customers.

質問 # 80

Universal Containers (UC) is using Service Cloud and B2B Commerce to allow resellers the ability to purchase and support farming equipment UC maintains. UC has invested in smart devices which allows that equipment to inform UC when a part becomes faulty. The data from these devices goes to a public cloud solution where every row of sensor data is received every second from every device. There are 100,000 devices on various farms being actively used. The CIO would like this data to be connected to Salesforce in some manner.

What kind of integration method should a Solution Architect suggest to accommodate this need?

- A. Utilize Apex Callouts based on the devices' state change.
- B. Embed the devices' sensor data in a view on the Asset record.
- C. Load the public cloud solution directly to Salesforce using MuleSoft.
- D. Utilize Platform Events based on the devices' state change.

正解: D

解説:

Platform Events are a Salesforce-native feature that enable apps to communicate inside and outside of Salesforce using an event-driven messaging architecture. An event producer creates an event and adds it onto the event bus, which operates as a queue with a strict chronological order. An event consumer subscribes to an event and gets notified when the event is put onto the event bus. According to 3, Platform Events can be used to define and manage custom notifications within the Salesforce platform and in external apps. They can also be used to integrate Salesforce with external systems and devices in near real-time.

Therefore, a Solution Architect should suggest utilizing Platform Events based on the devices' state change.

This way, UC can connect the data from the smart devices to Salesforce in a scalable and reliable manner, without having to poll or query for changes constantly. UC can also use Platform Events to trigger workflows or actions based on the device status, such as creating a case, sending an email, or ordering a replacement part.

質問 # 81

Universal Containers (UC) wants to add and integrate Marketing Cloud Account Engagement after a recent acquisition. The integration into the global architecture will be as follows:

* Marketing Cloud Account Engagement will be used for lead nurturing with Engagement Studio.

* Marketing Cloud Account Engagement forms will be set up in a website.

* SalesCloud will manage leads created by Marketing Cloud Account Engagement.

UC wants to facilitate adoption by giving sales representatives and marketers enough time to learn about new features on a training platform.

Which approach should a Solution Architect recommend in order to set up an environment in which users can test the functionalities from end to end?

- A. Create a new Marketing Cloud Account Engagement business unit, recreate the configuration, and link it to the production Sales Cloud org.
- B. Create a new Marketing Cloud Account Engagement business unit, synchronize the production unit and the training unit, and link it to a full copy Sales Cloud sandbox.
- **C. Create a new Marketing Cloud Account Engagement business unit, recreate the configuration, and link it to a full copy Sales Cloud sandbox.**
- D. Create Marketing Cloud Account Engagement training environments, synchronize the environments, and link it to a full copy Sales Cloud sandbox.

正解: C

解説:

To provide an end-to-end training environment for users to test functionalities, a new Marketing Cloud Account Engagement business unit should be created. Recreating the configuration in this unit and linking it to a full copy Sales Cloud sandbox allows for a comprehensive and isolated environment that mirrors production. This enables users to explore and learn new features without impacting live data or processes.

Salesforce recommends the use of sandboxes for training and testing purposes to ensure that users are adequately prepared for using new functionalities.

質問 # 82

Universal Containers (UC) is about to complete an initial planning of a complex solution involving multiple customer personas. UC wants to ensure it has a comprehensive understanding of what kinds of business outcomes the customers want to achieve before presenting them a solution.

Which method of discovery should a Solution Architect suggest to UC?

- **A. Jobs To Be Done Framework**
- B. Comprehensive Surveys to End Customers
- C. Third-party research from well-known organizations
- D. User Stories Creation with End Customers

正解: A

解説:

The "Jobs To Be Done Framework" is a method that focuses on understanding customer needs in specific contexts and situations. This approach is ideal for UC to gain comprehensive insights into what kinds of business outcomes the customers want to achieve. It goes beyond mere feature requests and digs into the underlying goals and challenges customers face, which can be more enlightening for solution design than surveys or user story creation alone. The framework is recognized for its effectiveness in uncovering the real jobs customers are hiring products and services to do.

質問 # 83

AW Computing (AWC) has just completed a multi-cloud implementation for Salesforce and is facing major user adoption challenges. Users are complaining that the system is complicated and hard to navigate.

What can the Center of Excellence (CoE) for Salesforce do to help increase user adoption?

- A. Ensure each team has a Salesforce champion that can provide one-on-one training.
- **B. Break down training materials into quick reference guides for job-specific functions.**
- C. Place all training materials on the home page so users can find them easily.
- D. Record hour-long pieces of training for each job role so users can review on their own time.

正解: B

解説:

To increase user adoption when users find the system complicated, breaking down training materials into quick reference guides for specific job functions can be very effective. This makes the learning process more manageable and relevant to users' daily tasks. Salesforce's own training approach often includes such job-specific materials, recognizing that targeted, role-based guidance can improve user competence and confidence.
