

Quiz 2026 Newest Microsoft AZ-700 Popular Exams

Top 5 Facts to Rely on Microsoft AZ-700 Practice Tests

1. You get the actual Microsoft AZ-700 exam experience.

2. Time management becomes easy during the actual exam.

3. Valuable insights offer more improvement scope.

4. Rigorous Practice Makes you perfect about the Microsoft AZ-700 syllabus domains.

5. Self-assessment provides self-satisfaction regarding the AZ-700 exam preparation.

The format name of Channel Partner Program AZ-700 practice test questions is Microsoft PDF Questions file, desktop practice test software, and web-based practice test software. Choose the nay type of Channel Partner Program Designing and Implementing Microsoft Azure Networking Solutions AZ-700 Practice Exam Questions that fit your Microsoft AZ-700 exam preparation requirement and budget and start preparation without wasting further time.

The Need for Microsoft AZ-700 Exam

A person can be certified for this role by passing Microsoft AZ-700 certification exam. The main reason that people pursue this certification is to gain access to specific skills and knowledge required in the IT industry. Dr. Gebrehiwot is also pursuing his Level-2 certification in Microsoft AZ-700 certification exam. Analytics Gebrehiwot has his Level-3 certification in Microsoft Volume Activation. Microsoft Azure Automation and Desired State Configuration (DSC) is one of the key areas that will be tested on the AZ-700 exam. Clients and partners can benefit from a person who is certified for this certification. Providing the ability to meet the needs of an individual is effective for customers and partners to discover new opportunities. Deploy of Windows, Microsoft Office, and Microsoft Azure services to manage these products can be achieved by someone who has this certification. The 7 skills listed include programmatic creation, automation, Configuration Management (CM), software deployment, creation of test environments, configuration change management (CCM), and configuration monitoring.

Finest AZ-700 Course AZ-700 becoming the key point to success in the IT industry. It is fully based on Microsoft Specialist Exam AZ-700 Study books, which is the best material for AZ-700 exam preparation. Fret less AZ-700 Certification Training online is the best training on AZ-700 exam for individuals who are seeking AZ-700 certification. With best Microsoft AZ-700 preparation material, candidates are guaranteed to pass the AZ-700 Exam with good scores. Frontend and usability engineers who are looking to streamline their development process and deliver more complex websites and apps. Premises of frontend and usability engineers can broaden their scope of work by using a developers perspective to improve the design of a website. **Microsoft AZ-700 Dumps** is a successful study guide for individuals seeking a certification. The material in a Microsoft Certification Practice Exam software is very limited, but the self-paced test software is able to replicate what will be require for this certification. Getting certified for this Microsoft AZ-700 certification is also a great way to find new careers or opportunities. OpenVPN for Windows Server administrators, who are looking to streamline their operations process and deliver more automated deployment of applications, infrastructure, and services. Premises can extend their scope of work by using a developers perspective to improve the design of an application.

Microsoft AZ-700 exam is designed for professionals who want to demonstrate their expertise in designing and implementing Microsoft Azure networking solutions. AZ-700 exam focuses on various aspects of Azure networking, including virtual networks, load balancing, security, and connectivity between on-premises and cloud environments. Passing AZ-700 exam validates the skills required to design and implement secure and scalable Azure networking solutions.

Learning Material In 3 Different Formats for Microsoft AZ-700 Exam Success

Some candidates may wonder that if the payment is quite complex and hard, in fact it is quite easy and simple. Once you have selected the AZ-700 study materials, please add them to your cart. Then when you finish browsing our web pages, you can directly come to the shopping cart page and submit your orders of the AZ-700 learning quiz. Our payment system will soon start to work. Then certain money will soon be deducted from your credit card to pay for the AZ-700 preparation questions. And we will send them to you in 5 to 10 minutes after your purchase.

Microsoft Designing and Implementing Microsoft Azure Networking Solutions Sample Questions (Q227-Q232):

NEW QUESTION # 227

You have an Azure subscription that contains the resources shown in the following table.

Name	Type	Description
VWAN1	Azure Virtual WAN	Standard Virtual WAN
Hub1	Azure Virtual WAN hub	Hub for VWAN1
VNet1	Virtual network	Connected to Hub1
VNet2	Virtual network	Connected to Hub1
VNet3	Virtual network	Peered with VNet2
NVA1	Virtual machine	Hosts a routing appliance deployed to VNet2

You establish BGP peering between NVA1 and Hub1.

You need to implement transit connectivity between VNet1 and VNet3 via Hub1 by using BGP peering. The solution must minimize costs.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area Microsoft

On Hub1, propagate routes from connections to VNet1 and VNet2 to:

- A custom route table and associate the routes with the same custom route table
- A custom route table and associate the routes with the defaultRouteTable
- A custom route table and associate the routes with the same custom route table
- The defaultRouteTable and associate the routes with the defaultRouteTable

On VNet3, implement:

- User-defined routes
- Azure Route Server on a dedicated subnet
- Azure VPN Gateway on a dedicated subnet
- User-defined routes

Answer:

Explanation:

Answer Area

On Hub1, propagate routes from connections to VNet1 and VNet2 to:

- A custom route table and associate the routes with the same custom route table
- A custom route table and associate the routes with the defaultRouteTable
- A custom route table and associate the routes with the same custom route table
- The defaultRouteTable and associate the routes with the defaultRouteTable

On VNet3, implement:

- User-defined routes
- Azure Route Server on a dedicated subnet
- Azure VPN Gateway on a dedicated subnet
- User-defined routes

Explanation:

Answer Area

On Hub1, propagate routes from connections to VNet1 and VNet2 to: A custom route table and associate the routes with the same custom route table

On VNet3, implement: User-defined routes

NEW QUESTION # 228

Your company has an on-premises network and three Azure subscriptions named Subscription1, Subscription2, and Subscription3. The departments at the company use the Azure subscriptions as shown in the following table.

Department	Subscription
IT	Subscription1
Research	Subscription1
Development	Subscription2
Testing	Subscription2
Distribution	Subscription3

All the resources in the subscriptions are in either the West US Azure region or the West US 2 Azure region. You plan to connect all the subscriptions to the on-premises network by using ExpressRoute. What is the minimum number of ExpressRoute circuits required?

- A. 0
- **B. 1**
- C. 2
- D. 3
- E. 4

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/expressroute/expressroute-introduction>

NEW QUESTION # 229

You create an ExpressRoute circuit named ERC1 that is enabled by your connectivity provider.

You need to ensure that the routes for Azure Backup and Azure Cosmos DB are advertised to the on-premises network via ERC1. The solution must minimize administrative effort.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Answer Area

NEW QUESTION # 230

You have an Azure subscription that contains the resources shown in the following table.

Name	Type	Description
VNet1	Virtual network	Contains a subnet named Subnet1
Subnet1	Virtual subnet	Part of VNet1
NSG1	Network security group (NSG)	Linked to Subnet1
ASG1	Application security group	Not linked

Subshell contains Three virtual machines that host an app named App1. App1 is accessed by using the SFTP protocol. From NSG1, you configure an inbound security rule named Rule2 that allows inbound SFTP connections to ASG1. You need to ensure that the inbound SFTP connections are managed by using ASG1. The solution must minimize administrative effort.

What should you do?

- A. From Subnet1 create a subnet delegation.
- B. From NSG1, modify the priority of Rule2.
- **C. From each virtual machine, associate the network interface to ASG1**
- D. From ASG1, modify the role assignments.

Answer: C

NEW QUESTION # 231

SIMULATION

Username and password

Use the following login credentials as needed:

- To enter your username, place your cursor in the Sign in box and click on the username below.
- To enter your password, place your cursor in the Enter password box and click on the password below.
- Azure Username: User-12345678@cloudslice.onmicrosoft.com
- Azure Password: xxxxxxxxx
- If the Azure portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

- Lab Instance: 12345678

You plan to deploy a firewall to subnet1-2. The firewall will have an IP address of 10.1.2.4.

You need to ensure that traffic from subnet1-1 to the IP address range of 192.168.10.0/24 is routed through the firewall that will be deployed to subnet 1-2. The solution must be achieved without using dynamic routing protocol.

To complete this task, sign in to the Azure portal.

Answer:

Explanation:

Custom routes, User-defined

You can create custom, or user-defined(static), routes in Azure to override Azure's default system routes, or to add more routes to a subnet's route table. In Azure, you create a route table, then associate the route table to zero or more virtual network subnets. Each subnet can have zero or one route table associated to it.

Create a route table (Skip Step 1 to Step 4 if route table already present=

Step 1: From the Azure portal menu, select + Create a resource > Networking > Route table, or search for Route table in the portal search box.

Step 2: Select Create.

Step 3: On the Basics tab of Create route table, enter or select information:

Home > New > Route table >

Create Route table

Basics Tags Review + create

Project details

Select the subscription to manage deployed resources and costs. Use resource groups like folders to organize and manage all your resources.

Subscription *

Resource group * [Create new](#)

Instance details

Region *

Name *

Propagate gateway routes * Yes No

[Review + create](#) < Previous Next : Tags >

Step 4: Select the Review + create tab, or select the blue Review + create button at the bottom of the page.

Create a route

In this section, you'll create a route in the route table that you created in the previous steps.

Step 5: Select Go to resource or Search for myRouteTablePublic (The route table you created earlier) in the portal search box.

Step 6: In the myRouteTablePublic page, select Routes from the Settings section.

Step 7: In the Routes page, select the + Add button.

Step 8: In Add route, enter or select this information:

Route name: SomeName

Address prefix destination: Select IP Addresses.

Destination IP addresses/CIDR ranges: Enter 192.168.10.0/24 - The address range of to be routed from.

Next hop type: Select Virtual appliance.

Next hop address: Enter 10.1.2.4 (The address of the firewall in the sbunet1-2 subnet).
