

# Exam F5CAB4 Answers & F5CAB4 Latest Exam Guide

# SPOTO

P.S. Free & New F5CAB4 dumps are available on Google Drive shared by DumpsValid: <https://drive.google.com/open?id=1CWS8wfmtOfQ5rZlu5vO5Ds0pp821hGZd>

If you want to improve your own IT techniques and want to pass F5CAB4 certification exam, our DumpsValid website may provide the most accurate F5's F5CAB4 exam training materials for you, and help you Pass F5CAB4 Exam to get F5CAB4 certification. If you are still hesitated, you can download F5CAB4 free demo and answers on probation on DumpsValid websites. We believe that we won't let you down.

## F5 F5CAB4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Given a scenario, determine device upgrade eligibility: This domain covers determining appropriate timing for software and platform upgrades and strategies to minimize downtime during upgrades.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Explain authentication methods: This section focuses on user management including creating</li><li>modifying users, configuring remote authentication providers, and implementing group-based access control.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Identify and report current device status: This domain covers monitoring BIG-IP operational status through LCD panels, dashboards, Network Map, GUI</li><li>TMSH commands, and checking high availability states.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Explain config sync: This section focuses on configuration synchronization procedures, identifying sync errors, determining sync necessity, checking sync status, and comparing configuration timestamps.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>List which log files could be used to find events and</li><li>or hardware issues: This section teaches identification of key log files (<ul style="list-style-type: none"><li>var</li><li>log</li><li>ltm, secure, audit), understanding event severity levels, and interpreting log messages.</li></ul></li></ul>

**Free PDF Quiz F5 - F5CAB4 - The Best Exam BIG-IP Administration Control Plane Administration Answers**

If you require any further information about either our F5CAB4 preparation exam or our corporation, please do not hesitate to let us know. High quality F5CAB4 practice materials leave a good impression on the exam candidates and bring more business opportunities in the future. And many of our customers use our F5CAB4 Exam Questions as their exam assistant and establish a long cooperation with us.

## F5 BIG-IP Administration Control Plane Administration Sample Questions (Q47-Q52):

### NEW QUESTION # 47

A BIG-IP Administrator is setting up a new BIG-IP device. The network administrator reports that the interface has an incompatible media speed. The BIG-IP Administrator needs to change this setting manually. From which location should the BIG-IP Administrator perform this task?14

- A. In the Configuration Utility, Network > Interface17
- B. On the Front Console15
- C. In the Configuration Utility, System > Configuration18
- D. In the TMOS Shell Command line16

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration20 Control Plane Administration documents: Connectivity management involves ensuring that the physical layer matches the networking environment. Interface properties, including media speed, duplex settings, and MTU, are managed at the Control Plane level under the Network menu. To resolve a mismatch with an upstream switch, the administrator must navigate to Network > Interfaces to manually override auto-negotiation settings.

### NEW QUESTION # 48

A BIG-IP Administrator receives an RMA replacement for a failed F5 device. The Administrator tries to restore a UCS taken from the previous device, but the restore fails. The following error appears in the /var/log /ltm:

insufficient pool members. 01070608:3: License is not operational (expired, digital signature does not match contents)

What should the BIG-IP Administrator do to avoid this error? (Choose one answer)

- A. Remove the license information from the UCS archive
- B. Reactivate the license on the new device using the manual activation method
- C. Revoke the license prior to restoring
- D. Use the appropriate tmsh command with the no-license option

**Answer: D**

Explanation:

When restoring a UCS file to replacement hardware (RMA device), the license from the original device is not valid on the new system. If the UCS restore attempts to load the old license, BIG-IP reports license errors such as "License is not operational", which can prevent traffic objects (including pools and virtual servers) from loading correctly.

To avoid this issue, F5 documentation recommends restoring the UCS without the license, using the following command:

```
tmsh load /sys ucs <ucs filename> no-license
```

This approach:

\* Restores all configuration objects (LTM, networking, certificates, keys, etc.)

\* Excludes the invalid license tied to the old hardware

\* Allows the administrator to activate a new license separately on the replacement device Why the other options are incorrect:

\* A. Remove the license information from the UCS archive Not supported or recommended; UCS files should not be manually modified.

\* B. Revoke the license prior to restoring License revocation does not prevent the UCS from attempting to load license data.

\* D. Reactivate the license on the new device using the manual activation method This must be done after restoring the UCS and does not prevent the restore failure itself.

Therefore, the correct and supported method to avoid this error is C.

### NEW QUESTION # 49

A BIG-IP Administrator needs to fail over the active device. The administrator logs into the Configuration Utility and navigates to Device Management > Traffic Group. However, "Force to Standby" is greyed out. What is causing this issue?

- A. The BIG-IP Administrator is on the Standby Device
- B. The BIG-IP Administrator is logged in as root
- C. The BIG-IP Administrator is logged in as administrator
- D. The BIG-IP Administrator is NOT logged into command line to tail over

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: In a High Availability pair, the "Force to Standby" action is a Control Plane command used to trigger a manual failover. This option is only logical and available on the device that is currently in the Active state. If the button is greyed out, it indicates that the administrator is already logged into the Standby unit, which has no active traffic groups to relinquish.

### NEW QUESTION # 50

A BIG-IP device sends out the following SNMP trap: big-ipo.f5.com - bigipExternalLinkChange Link: 1.0 is DOWN. Where in the BIG-IP Configuration utility should the BIG-IP Administrator verify the current status of Link 1.0?

- A. Network > Trunks > Trunk List
- B. Statistics > Performance > System
- C. Network > Interfaces > Interface List
- D. System > Platform

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: Monitoring the physical status of the device is critical for reporting device health. In F5 nomenclature, "1.0", "1.1", etc., represent physical hardware interfaces. To verify if a physical link is up or down as reported by the Control Plane's SNMP agent, the administrator must check the Interface List located under Network > Interfaces

### NEW QUESTION # 51

A user needs to generate a QKView to upload to iHealth to determine any issues with upgrading TMOS. Where can the user generate the QKView in the Configuration Utility?

- A. System > Support
- B. System > Configuration
- C. System > Software Management
- D. System > Archives

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: Generating a QKView is a standard procedure for identifying device health and upgrade readiness<sup>42</sup>. Within the Configuration Utility, this Control Plane diagnostic tool is located under System > Support<sup>43</sup>. This utility collects configuration and state data into a single file used by the iHealth 'Upgrade Advisor' to report on known bugs or compatibility issues prior to a version change.

### NEW QUESTION # 52

.....

Nowadays the competition in the job market is fiercer than any time in the past. If you want to find a good job, you must own good competences and skillful major knowledge. So owning the F5CAB4 certification is necessary for you because we will provide the best study materials to you. Our F5CAB4 Exam Torrent is of high quality and efficient, and it can help you pass the test successfully.
