

# Das neueste CloudSec-Pro, nützliche und praktische CloudSec-Pro pass4sure Trainingsmaterial

Übrigens, Sie können die vollständige Version der DeutschPrüfung CloudSec-Pro Prüfungsfragen aus dem Cloud-Speicher herunterladen: <https://drive.google.com/open?id=11fzQgAAqOhP0Xy5rU-Wt8NHj6OedEDKg>

Nach der Schulzeit haben wir mehr Verantwortungen und die Zeit fürs Lernen vermindert sich. Wenn Sie sich im IT-Bereich besser entwickeln möchten, dann ist die internationale Zertifizierungsprüfung wie Palo Alto Networks CloudSec-Pro Prüfung zu bestehen sehr notwendig. Wir DeutschPrüfung bieten Sie mit alle Kräfte vieler IT-Profis die effektivste Hilfe bei der Palo Alto Networks CloudSec-Pro Prüfung. 3 Versionen (PDF, online sowie Software) von Palo Alto Networks CloudSec-Pro Prüfungsunterlagen haben Ihre besondere Überlegenheit. Dadurch, dass Sie die kostenlose Demos probieren, können Sie nach Ihre Gewohnheiten die geeignete Version wählen.

## Palo Alto Networks CloudSec-Pro Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none"> <li>Cloud Posture Security: This domain examines the tools and practices used to assess and manage cloud security posture, spanning CSPM, KSPM, AI-SPM, and DSPM. It also covers agentless scanning, identity security, vulnerability management, unified compliance, and the role of Posture Security Management Modules.</li> </ul>
Thema 2	<ul style="list-style-type: none"> <li>Cortex Fundamentals: This domain focuses on the core features of the Cortex Cloud platform, including indicator types, log management, asset inventory, compliance, and data protection. It also covers how to create reports and dashboards and how data sources are ingested into the platform.</li> </ul>
Thema 3	<ul style="list-style-type: none"> <li>Cloud Runtime Security: This domain addresses the protection of cloud workloads during active operation, covering cloud workload protection, detection and response, web application and API security, and vulnerability management. It also includes the processes involved in deploying and managing security agents.</li> </ul>
Thema 4	<ul style="list-style-type: none"> <li>Application Security: This domain covers security practices integrated throughout the software development lifecycle, including application security posture management, CI</li> <li>CD pipeline security, software composition analysis, IaC security, and secrets scanning. It also explores real-world application security use cases and scan management.</li> </ul>
Thema 5	<ul style="list-style-type: none"> <li>Security Operations Center (SOC) Fundamentals: This domain covers the foundational components of a SOC, including team roles, tools, and technologies used in day-to-day security operations. It also addresses how AI</li> <li>ML and threat intelligence support incident response, categorization, and prioritization.</li> </ul>

Wenn Sie die Schulungsunterlagen zur Palo Alto Networks CloudSec-Pro Zertifizierungsprüfung aus DeutschPrüfung haben, können Durcheinander entwirren und nervöse Stimmung vertreiben. Die Schulungsunterlagen zur Palo Alto Networks CloudSec-Pro Zertifizierungsprüfung von DeutschPrüfung sind die genaueste Lehrbücher auf dem aktuellen Markt, mit denen die Bestehensrate für die Palo Alto Networks CloudSec-Pro Zertifizierungsprüfung fast 100% betragen kann. Wenn Sie DeutschPrüfung wählen, gehen Sie dann auf dem Weg zum Erfolg.

### Palo Alto Networks Cloud Security Professional CloudSec-Pro Prüfungsfragen mit Lösungen (Q253-Q258):

#### 253. Frage

A customer has a development environment with 50 connected Defenders. A maintenance window is set for Monday to upgrade 30 stand-alone Defenders in the development environment, but there is no maintenance window available until Sunday to upgrade the remaining 20 stand-alone Defenders.

Which recommended action manages this situation?

- A. Open a support case with Palo Alto Networks to arrange an automatic upgrade.
- B. Go to Manage > Defender > Manage, then click Defenders, and use the Scheduler to choose which Defenders will be automatically upgraded during the maintenance window.
- C. Upgrade a subset of the Defenders by clicking the individual Actions > Upgrade button in the row that corresponds to the Defender that should be upgraded during the maintenance window.
- D. Find a maintenance window that is suitable to upgrade all stand-alone Defenders in the development environment.

**Antwort: C**

Begründung:

Managing Defender upgrades in a Prisma Cloud environment requires careful planning, especially in scenarios where not all Defenders can be upgraded simultaneously due to maintenance window constraints.

\* Option C: Upgrade a subset of the Defenders by clicking the individual Actions > Upgrade button in the row that corresponds to the Defender that should be upgraded during the maintenance window is the recommended approach in this situation. This option allows administrators to manually select specific Defenders for upgrade within the available maintenance window, providing control over the upgrade process and ensuring that upgrades are aligned with operational requirements and maintenance schedules.

References:

Prisma Cloud Defender Management Documentation: Details the procedures for managing and upgrading Prisma Cloud Defenders, including manual upgrade processes for individual Defenders.

Best Practices for Managing Defender Upgrades: Offers guidelines on effectively planning and executing Defender upgrades, emphasizing the importance of aligning upgrade activities with maintenance windows to minimize disruption to the development environment.

#### 254. Frage

Taking which action will automatically enable all severity levels?

- A. Navigate to Settings > Enterprise Settings and enable all severity levels in the alarm center.
- B. Navigate to Policies > Settings and enable all severity levels in the alarm center.
- C. Navigate to Policies > Settings and ensure all severity levels are checked under "auto-enable default policies."
- D. Navigate to Settings > Enterprise Settings and ensure all severity levels are checked under "auto-enable default policies."

**Antwort: C**

Begründung:

In Prisma Cloud, to automatically enable all severity levels for alerts, a user would need to navigate to the Policies section, then to Settings. Within this area, there is an option for "auto-enable default policies," which, when checked for all severity levels, ensures that any default policies related to those severities are automatically activated. This is a configuration setting that streamlines the alerting process by ensuring that all relevant severity levels are covered by the default policies without the need for manual intervention.

<https://docs.paloaltonetworks.com/prisma/prisma-cloud/prisma-cloud-admin/prisma-cloud-policies/manage-prisma-cloud-policies>  
Step 1- To enable global settings for Prisma Cloud default policies click "Settings" and select "Enterprise Settings" Step 2- To enable policies based on severity, select Auto enable new default policies of the type- Critical, High, Medium, Low or Informational.

### 255. Frage

Which policy type provides information about connections from suspicious IPs in a customer database?

- A. AutoFocus
- B. Network
- C. Threat detection
- **D. Anomaly**

**Antwort: D**

Begründung:

<https://docs.paloaltonetworks.com/prisma/prisma-cloud/prisma-cloud-admin/prisma-cloud-policies/anomaly-policies> An Anomaly policy in Prisma Cloud is designed to provide information about connections from suspicious IPs in a customer database. Anomaly policies are used to detect and alert on unusual activities that deviate from the norm, which can include traffic from known malicious or suspicious IP addresses. These policies help in identifying potential security threats by monitoring for activities that are out of the ordinary, such as unexpected access to a database from an IP address that has not been seen before or is known to be associated with malicious activities.

The documentation link you provided offers detailed guidance on how to configure and manage anomaly policies in Prisma Cloud, ensuring that users can effectively monitor their environments for potential security incidents.

### 256. Frage

Which ban for DoS protection will enforce a rate limit for users who are unable to post five (5) ".tar.gz" files within five (5) seconds?

- A. One with an average rate of 5 and file extensions match on ".tar.gz" on Cloud Native Network Firewall (CNNF)
- **B. One with an average rate of 5 and file extensions match on ".tar.gz" on Web Application and API Security (WAAS)**
- C. One with a burst rate of 5 and file extensions match on ".tar.gz" on Web Application and API Security (WAAS) \*
- D. One with a burst rate of 5 and file extensions match on ".tar.gz" on Cloud Native Network Firewall (CNNF)

**Antwort: B**

Begründung:

In the context of DoS protection, enforcing a rate limit is a common strategy to prevent abuse and ensure service availability. The scenario described involves limiting the rate at which users can post ".tar.gz" files to five within five seconds. The correct ban configuration for this requirement would be one that specifies an average rate of 5 with a file extension match on ".tar.gz" within the Web Application and API Security (WAAS) component of a security solution like Prisma Cloud. WAAS is designed to protect web applications and APIs from various threats, including DoS attacks, by applying policies that can limit actions based on specific criteria, such as file types and request rates. This configuration ensures that any attempt to upload more than five ".tar.gz" files within a five-second window would be detected and blocked, mitigating the risk of DoS attacks targeting this particular file upload functionality.

### 257. Frage

Order the steps involved in onboarding an AWS Account for use with Data Security feature.

**Antwort:**

Begründung:

Explanation:

- 1 - Create Stack
- 2 - Enter SNS Topic in Cloudtrail
- 3 - Create Cloudtrail with S3 as Storage
- 4 - Enter RoleARN and SNSARN

<https://docs.prismacloud.io/en/classic/cspm-admin-guide/prisma-cloud-data-security/enable-data-security-module/enable-data-security-for-aws-org-account>

## 258. Frage

.....

Mit einem Palo Alto Networks CloudSec-Pro Zertifikat kann der Berufstätige in der IT-Branche bessere berufliche Aufstiegschancen haben. Das Palo Alto Networks CloudSec-Pro Zertifikat ebnet den Berufstätigen in der IT-Branche den Weg zur erfolgreichen Karriere!
