Salesforce Certification Preparation for Advanced Administrator Sample Questions (Q84-Q89):

NEW QUESTION # 84
At Cloud Kicks, users are able to run reports. However, when users try to export a report, they are taken to a login screen and prompted for additional verification.
What is causing this issue?

- A. The users' profile is missing the Export Reports permission.
- B. The users are logged Into an Insecure network.
- C. Exporting Is configured to require a high assurance session.
- D. Users need to update their browser to the latest version.

Answer: C

NEW QUESTION # 85
A user at Cloud Kicks has informed the administrator that they are unable to log in to Salesforce via multi-factor authentication.
Which two area should the administrator review to understand potential root causes?
Choose 2 answers

- A. Setup Audit Trail
- B. Login History
- C. Identity Verification History
- D. Debug Logs

Answer: B,C

Explanation:
Identity verification history and login history are two areas that the administrator can review to understand potential root causes of multi-factor authentication issues. Identity verification history shows the methods and results of identity verification attempts for a user, such as email verification, SMS verification, or app verification. Login history shows the status, source, and location of login

attempts for a user, as well as any login errors or challenges that occurred. These two areas can help the administrator identify if the user entered the correct verification code, if the user's device or app is compatible with multi-factor authentication, or if there are any network or security issues that prevent successful verification. Reference: https://help.salesforce.com/s/articleView?id=sf.identity_verification_history.htm&type=5 https://help.salesforce.com/s/articleView?id=sf.monitoring_login_history.htm&type=5

NEW QUESTION # 86

A sales manager at AW Computing has created a contact record but is missing some of the information to complete the record. The organization-wide default for Accounts is set to Public Read Only, and Contacts are controlled by parent.

- A. Sales manager and system administrator
- B. All users in the organization
- C. Who will be able to edit this new contact record?
- D. Users above the sales manager in the role hierarchy
- E. The owner and users below the owner in the role hierarchy

Answer: A

Explanation:
The sales manager and system administrator will be able to edit this new contact record because they are either the owner or have Modify All Data permission respectively. Users above or below the sales manager in the role hierarchy will not be able to edit this contact record because contacts are controlled by parent and accounts are set to Public Read Only. All users in the organization will be able to view but not edit this contact record because accounts are set to Public Read Only. References:

NEW QUESTION # 87

Cloud Kicks maintains Inventory in a legacy application. Management wants the information to also be available to view and report on in Saiesforce.
Which action should the administrator take to achieve this goal?

- A. Import the data into a custom object when needed; delete after it is used.
- B. Create an external object that maps to the inventory application.
- C. Build a Lightning component and use SFDX to connect to the inventory app.
- D. Upload an Excel spreadsheet with the data into the Files tab.

Answer: B

Explanation:
To make inventory data from a legacy application available in Salesforce, the administrator can create an external object that maps to the inventory application. An external object is similar to a custom object, except that it maps to data that's stored outside your Salesforce organization. External objects enable users to view and report on external data in Salesforce. Reference:
https://help.salesforce.com/s/articleView?id=sf.external_object_overview.htm&type=5

NEW QUESTION # 88

The sales operations team had requested a new custom object with the following requirements: 1 - The Sales Managers should have full access to all records created. 2 - The object's sharing default should be set to private. 3 - No new sharing rules should be created How can the system administrator set up the security of this Object? Choose 2 answers

- A. Create a role for all Sales Manager users with "modify all" checked for the Object
- B. Add the "Modify all" permission to the Sales Manager Profile for the new Object
- C. Create a permission set for all Sales Manager users with "Modify all" checked for the Object
- D. Create a Record Type with "Modify all" Checked and assign this record type to the Sales Manager Profile

Answer: B,C

NEW QUESTION # 89
