

# F5CAB4 Valid Exam Tips, F5CAB4 Actual Questions

## CCBA Exam Actual Questions

1. You are the business analyst for your organization and you're performing the solution assessment process. When you assess a solution, what are you actually looking for?
  - A. To determine the value of the proposed solution to the stakeholder requirements
  - B. To determine the quality of the proposed solution to the stakeholder requirements
  - C. To determine the cost of the proposed solution to the stakeholder requirements
  - D. To determine the accuracy of the proposed solution to the stakeholder requirements
2. Beth is the business analyst for her organization and she's creating a data dictionary for her organization. All of the following information should be included in the data dictionary for an endeavor Beth is leading except for which one?
  - A. Description
  - B. Aliases
  - C. Name
  - D. Code of account identifier
3. You are a business analyst for your organization. Your current business analysis endeavor includes working with stakeholders who are located in offices around the world. Because these stakeholders are dispersed, what are likely to increase in this endeavor as opposed to a collocated group of stakeholders?
  - A. Face-to-face meetings
  - B. Communication needs
  - C. Risks
  - D. Costs
4. What's the difference between a desired outcome and a solution? Choose the best answer.
  - A. The desired outcome is how the organization will operate in the future; the solution is the method to reach the desired outcome.
  - B. They are synonymous.
  - C. The solution is the ideal fulfillment of the business goals; the desired outcome is the financial gain created by the implementation of the solution.
  - D. The desired outcome is what the solution will remove.
5. In order to plan the business analysis approach, the business analyst must understand the organizational process needs and what other thing?
  - A. Objectives that apply to the initiative
  - B. Stakeholders' threats and perceived threats
  - C. Consideration of risk and reward
  - D. Purpose of the proposed solution
6. You are the business analyst for your organization. Management has asked you to define and document the requirements of an endeavor so that the requirements may be reused again in the organization. Why would an organization want to re-use requirements?
  - A. Re-using requirements is useful if the organization wants to sell the set of requirements to its customers.

Whatever exam you choose to take, ActualVCE training dumps will be very helpful to you. Because all questions in the Actual F5CAB4 Test are included in ActualVCE practice test dumps which provide you with the adequate explanation that let you understand these questions well. As long as you master these questions and answers, you will sail through the exam you want to attend.

ActualVCE has created a real BIG-IP Administration Control Plane Administration, F5CAB4 exam questions in three forms: F5 F5CAB4 pdf questions file is the first form. The second and third formats are Web-based and desktop F5 F5CAB4 practice test software. F5CAB4 pdf dumps file will help you to immediately prepare well for the actual F5 BIG-IP Administration Control Plane Administration. You can download and open the F5 PDF Questions file anywhere or at any time. F5CAB4 Dumps will work on your laptop, tablet, smartphone, or any other device. You will get a list of actual F5 F5CAB4 test questions in F5 F5CAB4 pdf dumps file. Practicing with Web-based and desktop F5CAB4 practice test software you will find your knowledge gap.

## F5 F5CAB4 Actual Questions & F5CAB4 Test Quiz

After studying with our F5CAB4 practice engine, as our loyal customers wrote to us that they are now more efficient than their colleagues, so they have received more attention from their leaders and got the promotion on both incomes and positions. We are all ordinary professional people. We must show our strength to show that we are worth the opportunity. And with the help of our F5CAB4 Exam Braindumps, they all proved themselves and got their success. Just buy our F5CAB4 learning guide, you will be one of them too!

## F5 BIG-IP Administration Control Plane Administration Sample Questions (Q23-Q28):

### NEW QUESTION # 23

New Syslog servers have been deployed in an organization. The BIG-IP Administrator must reconfigure the BIG-IP system to send log messages to these servers.

In which location in the Configuration Utility can the BIG-IP Administrator make the needed configuration changes to accomplish this? (Choose one answer)

- A. System > Logs > Audit
- **B. System > Logs > Configuration**
- C. System > Configuration > Device
- D. System > Configuration > Local Traffic

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents:

On a BIG-IP system, remote syslog server configuration is managed through the logging configuration framework. In the Configuration Utility, this is accessed via:

System > Logs > Configuration

This section allows the administrator to:

Define remote syslog destinations

Configure log publishers

Control which log types (system, audit, LTM, ASM, etc.) are forwarded to external syslog servers Why the other options are incorrect:

A . System > Configuration > Local Traffic

Used for traffic management settings, not logging.

C . System > Logs > Audit

Displays audit log settings and content but does not configure remote syslog destinations.

D . System > Configuration > Device

Used for device-level settings such as hostname and platform configuration, not logging.

Therefore, the correct location to reconfigure BIG-IP to send logs to new syslog servers is System > Logs > Configuration.

### NEW QUESTION # 24

A BIG-IP Administrator discovers malicious brute-force attempts to access the BIG-IP device on the management interface via SSH. The BIG-IP Administrator needs to restrict SSH access to the management interface. Where should this be accomplished?

- A. System > Configuration
- **B. System > Platform**
- C. Network > Interfaces
- D. Network > Self IPs

**Answer: B**

Explanation:

The "Management Port" is distinct from TMM data ports. Configuration for global platform-level settings, including administrative access restrictions (IP Allow lists for SSH and HTTPS) for the management port, is found under System > Platform. This is a critical Control Plane hardening step to prevent unauthorized remote access Here is the next batch of 10 questions from your document that are 100% related to BIG-IP

### NEW QUESTION # 25

A configuration change is made on the standby member of a device group. What is displayed as "Recommended Action" on the Device Management Overview screen?

- A. Synchronize the active member configuration to the group.
- B. Force active member of device group to standby
- C. Activate device with the most recent configuration

- **D. Synchronize the standby member configuration to the group**

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: The BIG-IP Control Plane monitors the "Commit ID" of the configuration on all group members. When a change is made on the Standby unit, it becomes the member with the most recent configuration. The "Recommended Action" in the HA status dashboard will be to synchronize that specific device's configuration to the rest of the group to ensure consistency

#### NEW QUESTION # 26

The BIG-IP system is provisioned for LTM only. The BIG-IP Administrator is tasked with provisioning ASM. What process restarts when the BIG-IP Administrator changes the module provisioning? (Choose one answer)

- A. httpd
- B. bd
- **C. tmm**
- D. sshd

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents:

When a BIG-IP Administrator changes module provisioning (for example, enabling ASM on a system previously provisioned only for LTM), the BIG-IP system must restart the Traffic Management Microkernel (TMM) process.

The TMM process is responsible for:

Traffic handling

LTM, ASM, and other traffic-processing modules

Enforcing security and application policies

Provisioning changes affect how traffic modules are loaded and integrated into TMM. As a result, TMM is restarted, which causes a temporary interruption of traffic processing. This is expected behavior and is why module provisioning changes should be planned during a maintenance window.

Why the other options are incorrect:

A . bd is related to blade/platform management, not module provisioning.

C . sshd handles SSH access and is not affected by provisioning changes.

D . httpd supports the Configuration Utility (GUI) and does not restart due to module provisioning.

Therefore, the correct answer is B. tmm.

#### NEW QUESTION # 27

When looking at this BIG-IP prompt: root@virtual-bigip1] Peer Time Out of Sync What does the message indicate? (Choose one answer)

- A. That the peer BIG-IP is unreachable for the device group
- **B. That there was a time synchronization issue between the BIG-IP device and its peer**
- C. That the local time is correct, but the remote time is incorrect
- D. That one of the NTP sources has a skewed clock

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents:

On BIG-IP systems that participate in a Device Service Cluster (DSC), each device compares the remote device's system time to its own system time. If the difference is outside the ConfigSync time threshold (commonly referenced as 3 seconds by default), BIG-IP updates the shell prompt to show "Peer Time Out of Sync", and ConfigSync operations may fail until time is corrected (typically by fixing NTP reachability/configuration, or in some cases adjusting the threshold). (cdn.studio.f5.com) This message is specifically about time drift between peers in the trust domain/DSC-not basic reachability (so B is not what it means), and it does not prove which side is "correct" (so C is too specific). It also doesn't directly mean an NTP source is "skewed" (A can be a cause, but the prompt message itself indicates the peer-to-peer time mismatch condition). (cdn.studio.f5.com)

## NEW QUESTION # 28

.....

F5CAB4 latest torrents simulate the real exam environment and does not limit the number of computer installations, which can help you better understand the details of the exam. The online version of F5CAB4 test questions also support multiple devices and can be used offline permanently after being opened for the first time using the network. On buses or subways, you can use fractional time to test your learning outcomes with F5CAB4 Test Torrent, which will greatly increase your pro forma efficiency.
