220-1102 Exam Simulations - 220-1102 Dump

One of the major features provided by CompTIA is that it will provide you with free CompTIA 220-1102 actual questions updates for 365 days after the purchase of our product. If you work hard with our CompTIA 220-1102 Exam Practice material, nothing can stop you from cracking the test on the first endeavor.

CompTIA 220-1102 exam is a computer-based test that consists of multiple-choice questions. 220-1102 exam is 90 minutes long and contains 90 questions. The passing score for 220-1102 exam is 700 on a scale of 900. 220-1102 exam is available in several languages, including English, German, Japanese, Portuguese, and Spanish. 220-1102 exam is designed for candidates who have already passed the CompTIA 220-1001 exam.

The CompTIA 220-1102 Exam is intended for IT professionals with 6-12 months of experience in the field. It is also recommended for individuals who have completed the CompTIA 220-1001 exam. By passing the CompTIA 220-1102 exam, candidates will earn the CompTIA A+ certification, which is recognized by employers worldwide as a standard for entry-level IT positions.

CompTIA A+ Certification Exam: Core 2 Sample Questions (Q56-Q61):

NEW QUESTION # 56
Which of the following is the most secure screen lock?

- A. Swipe
- B. Fingerprint
- C. Face
- D. Password

Answer: D

Explanation:
Comprehensive and Detailed In-Depth Explanation:Passwords provide the highest level of security because they cannot be bypassed using biometric spoofing techniques.
* A. Face - Can be fooled with 2D images (on some devices).
* B. Swipe - Very weak security.
* D. Fingerprint - More secure than face/swipe but can still be faked.

NEW QUESTION # 57
A systems administrator is tasked with configuring desktop systems to use a new proxy server that the organization has added to provide content filtering. Which of the following Windows utilities is the best choice for accessing the necessary configuration to complete this goal?

- A. Security and Maintenance
- B. Network and Sharing Center
- C. Windows Defender Firewall
- D. Internet Options

Answer: D

Explanation:
Explanation

Proxy server
Explore
The correct answer is D. Internet Options. The Internet Options utility in Windows allows you to configure various settings related to your internet connection, including the proxy server settings. To access the Internet Options utility, you can either open the Control Panel and click on Internet Options, or open any web browser and click on the Tools menu and then on Internet Options. In the Internet Options window, go to the Connections tab and click on the LAN settings button. Here, you can enable or disable the use of a proxy server, as well as enter the address and port number of the proxy server you want to use12.
Security and Maintenance is a utility in Windows that allows you to view and manage the security and maintenance status of your

computer, such as firewall, antivirus, backup, troubleshooting, and recovery settings. It does not have any option to configure proxy server settings.
Network and Sharing Center is a utility in Windows that allows you to view and manage your network connections, such as Wi-Fi, Ethernet, VPN, or dial-up. It also allows you to change network settings, such as network discovery, file and printer sharing, homegroup, and adapter settings. It does not have any option to configure proxy server settings.
Windows Defender Firewall is a utility in Windows that allows you to enable or disable the firewall protection for your computer, as well as configure firewall rules for inbound and outbound traffic. It does not have any option to configure proxy server settings.

NEW QUESTION # 58
Which of the following macOS features can help a user close an application that has stopped responding?

- A. System Preferences
- B. Force Quit
- C. Finder
- D. Mission Control

Answer: B

Explanation:
The correct answer is D. Force Quit. Force Quit is a macOS feature that allows users to close an application that has stopped responding. To use Force Quit, users can press and hold Option (or Alt), Command, and Esc (Escape) keys together, or choose Force Quit from the Apple menu in the corner of the screen. A Force Quit window will open, where users can select the application that they want to close and click Force Quit123.
Reference and
The web search results provide information about how to force an app to quit on Mac using different methods, such as keyboard shortcuts, mouse clicks, or menu options. The results also explain what to do if the app cannot be forced to quit or if the Mac does not respond.
The first result1 is from the official Apple Support website and provides detailed instructions and screenshots on how to force an app to quit on Mac using the keyboard shortcut or the Apple menu. It also explains how to force quit the Finder app and how to restart or turn off the Mac if needed.
The second result2 is from the same website but for a different region (UK). It has the same content as the first result but with some minor differences in spelling and wording.
The third result4 is from a website called Lifehacker that provides tips and tricks for various topics, including technology. It compares how to close a program that is not responding on different operating systems, such as Windows, Mac, and Linux. It briefly mentions how to force quit an app on Mac using the keyboard shortcut or the mouse click.
The fourth result3 is from a website called Parallels that provides software solutions for running Windows on Mac. It focuses on how to force quit an app on Mac using the keyboard shortcut and provides a video tutorial and a screenshot on how to do it. It also suggests some alternative ways to close an app that is not responding, such as using Activity Monitor or Terminal commands.

NEW QUESTION # 59
A user's workstation was infected with a newly discovered virus that the AV system detected. After a full virus scan and a workstation reboot, the virus is still present in the OS. Which of the following actions should the user take to remove the virus?

- A. Use bootable antivirus media to scan the system.
- B. Enable the system firewall.
- C. Run the operating system update process.
- D. Download software designed to specifically target the virus.

Answer: A

Explanation:
Using bootable antivirus media to scan the system is an effective method for removing a persistent virus. Booting from external antivirus media allows the system to scan for and remove malware without the infected operating system running, which can prevent the virus from hiding or resisting removal efforts that might occur within the active OS environment.

NEW QUESTION # 60
A business lost all data and equipment after a disaster. Due to the disaster, the business no longer maintains system backups. Which

of the following should the business implement to prevent future losses?

- A. Test environment
- B. Cold site
- C. Local backups
- D. Cloud storage

Answer: D

Explanation:
Comprehensive and Detailed In-Depth Explanation:
Cloud storage ensures that data is backed up off-site, protecting against physical disasters like fires or floods.
* A. Test environment - Incorrect. This is for software testing, not data recovery.
* B. Local backups - Incorrect. These could also be destroyed in a disaster.
* C. Cold site - Useful for disaster recovery but does not automatically back up data.
