# **DevOps-Foundation Test Online & High DevOps-Foundation Quality**

P.S. Free 2025 Peoplecert DevOps-Foundation dumps are available on Google Drive shared by Exams-boost: https://drive.google.com/open?id=1T1uWHIVA7WENv0BeeHt5bAuA5RIHRE6

Our DevOps-Foundation Study Materials include 3 versions: the PDF, PC and APP online. You can understand each version's merits and using method in detail before you decide to buy our DevOps-Foundation study materials. For instance, PC version of our DevOps-Foundation training quiz is suitable for the computers with the Windows system. It is a software application which can be installed and it stimulates the real exam's environment and atmosphere. It builds the users' confidence and can be practiced and learned at any time.

## **Peoplecert DevOps-Foundation Exam Syllabus Topics:**

Topic	Details
Торіс 1	Key DevOps Practices: This section of the exam measures the skills of DevOps engineers and covers core DevOps practices including Continuous Integration, Continuous Testing, Continuous Delivery, and Continuous Deployment. It explores concepts such as Site Reliability Engineering, DevSecOps, Value Stream Management, Platform Engineering, and modern practices like ChatOps and observability.
Торіс 2	Business and Technology Frameworks: This section of the exam measures the skills of IT operations specialists and covers various supporting frameworks that intersect with DevOps. These include Agile and Lean, IT Service Management, Value Stream Management, Site Reliability Engineering, Safety Culture, Learning Organisations, and Continuous Funding models that enable long-term adaptability.
Торіс 3	Sharing, Shadowing and Evolving: This section of the exam measures the skills of IT operations specialists and covers the collaborative and adaptive elements of DevOps in enterprise settings. It explores leadership, typical barriers and risks, and outlines how organisations can evolve their DevOps practices through continuous learning, peer shadowing, and experience-based transformation.
Торіс 4	Exploring DevOps: This section of the exam measures the skills of DevOps engineers and covers the foundations of DevOps, including its emergence as a critical discipline in the digital era. It introduces learners to the basic purpose, evolution, and significance of DevOps in modern software and infrastructure environments.
Topic 5	<ul> <li>Automation, Architecting DevOps Toolchains: This section of the exam measures the skills of IT operations specialists and covers key automation principles within the DevOps toolchain. It focuses on CI</li> <li>CD pipelines, Infrastructure as Code, containerisation, cloud-native architecture, platform engineering, and emerging technologies like Machine Learning and Generative AI in DevOps contexts.</li> </ul>

Topic 6

Measurement, Metrics, and Reporting: This section of the exam measures the skills of DevOps engineers
and covers metrics that help monitor and evaluate the performance of DevOps practices. Topics include
speed, quality, culture, change lead time, cycle time, and the use of dashboards, value-driven metrics, and
AIOps in reporting and decision-making.

### High DevOps-Foundation Quality - New DevOps-Foundation Exam Test

If you are a workman and you want to pass DevOps-Foundation exam quickly, Exams-boost will be your best choice. DevOps-Foundation dumps and answers from our Exams-boost site are all created by the IT talents with more than 10-year experience in IT certification. It can not only save your time, but also help you pass the DevOps-Foundation Exam easily.

# Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q68-Q73):

#### **NEW QUESTION #68**

Which statement is NOT TRUE?

- A. Continuous Deployment requires a manual push button
- B. Continuous Integration requires developers commit code to trunk at least daily
- C. Waterfall approaches can take advantage of continuous integration and test-driven development practices
- D. Continuous Delivery ensures software is always in a releasable state

#### Answer: A

#### Explanation:

Let's clarify what these terms mean in DevOps:

- \* Continuous Integration (CI):Developers integrate code into a shared repository frequently (ideally daily), with each integration automatically verified by tests.
- \* Continuous Delivery (CD):Ensures software is always in a releasable state. Every change can be deployed to production, but the deployment itself may be a manual decision.
- \* Continuous Deployment:Every change that passes automated tests is automatically deployed to production, without manual intervention.

Why is D ("Continuous Deployment requires a manual push button") NOT TRUE?

Because Continuous Deploymentis aboutno manual intervention-once code passes all tests, it's automatically pushed live. Manual deployment is a feature of Continuous Delivery, not Continuous Deployment.

Extract-style reference:

"Continuous Deployment means that every change goes through the pipeline and is automatically put into production, resulting in many production deployments every day."

-Accelerate: The Science of Lean Software and DevOps, Jez Humble & Nicole Forsgren DevOps Foundation v3.6distinguishes between Continuous Delivery (manual trigger) and Continuous Deployment (fully automated).

#### **NEW QUESTION #69**

Which of the following is NOT a crucial ingredient when leading a digital transformation?

- A. Collaboration
- B. Curiosity
- C. Courage
- D. Command

#### Answer: D

#### Explanation:

Command(authoritarianism) is not a crucial ingredient for leading digital transformation.

The key ingredients:

- \* Collaboration
- \* Curiosity
- \* Courage

DevOps leadership is about empowering teams, experimenting, and driving change,notcommand-and-control.

Extract-style reference:

"Digital transformation leaders embrace collaboration, curiosity, and courage, fostering an environment where experimentation and learning drive change."

-Accelerate, DevOps Handbook

PeopleCert DevOps Foundation v3.6:Advocates servant and transformational leadership, not command /control

#### **NEW OUESTION #70**

How do shortened feedback loops PRIMARILY improve IT's performance?

- A. They ensure a faster flow between Dev and Ops
- B. They create a value stream map
- C. They help to create and share knowledge when needed
- D. They encourage learning and experimentation

#### Answer: A

#### Explanation:

According to PeopleCert DevOps Foundation v3.6, theSecond Wayof DevOps focuses on creating and amplifyingfeedback loops. The primary purpose of shortening these loops is toaccelerate the flow of work and information between all stages of the delivery pipeline, especially between Development and Operations.

When feedback loops are short, defects, performance issues, and risks can be identified and resolved earlier in the process, preventing costly delays and large-scale rework. This supports faster, safer releases and improves the organization's responsiveness to customer needs.

While A (learning) and D (knowledge sharing) are important benefits of feedback loops, they are secondary outcomes. The main, direct effect is improving flow efficiency-ensuring that handoffs between Dev and Ops happen smoothly, quickly, and with higher quality. Option C (value stream mapping) is a useful Lean practice to identify delays and bottlenecks, but it is a diagnostic tool, not the primary improvement gained from shortening feedback loops.

Thus, the correct answer isB-shortened feedback loops primarily improve IT performance by ensuringfaster flowbetween Development and Operations.

#### **NEW QUESTION #71**

Which of the following is NOT a metric for culture?

- A. Employee Net Promoter Score (eNPS)
- B. Engagement and morale
- C. Deployment frequency
- D. Retention

#### Answer: C

#### Explanation:

Deployment frequencyis not aculture metric.

- \* It's aprocessmetric, indicating how often code is released.
- \* Culture metricsfocus on engagement, morale, retention, psychological safety, and NPS.

Why not the others?

- \* Employee NPS:Measures employee satisfaction and willingness to recommend.
- \* Engagement/morale:Direct indicators of cultural health.
- \* Retention: How well an org keeps talented people, reflecting culture.

Extract-style reference:

"Measuring DevOps culture relies on employee engagement, morale, and retention, not on delivery metrics like deployment

frequency."

-State of DevOps Report

PeopleCert DevOps Foundation v3.6:Culture metrics focus on people, not just process.

#### **NEW QUESTION #72**

What are the CORRECT set of DevOps values?

- A. Culture, Automation, Lean, Metrics, Sharing
- B. Culture, Accountability, Lean, Metrics, Sharing
- C. Culture, Collaboration, Communication, Commitment
- D. Culture, Automation, Lean, Measurement, Sharing

#### Answer: D

#### Explanation:

According to PeopleCert DevOps Foundation v3.6, the five primary values that guide successful DevOps adoption are summarized in theCALMSframework:Culture, Automation, Lean, Measurement, and Sharing.

- \* Culturefocuses on breaking down silos, encouraging trust, and promoting collaboration between development, operations, security, QA, and business teams.
- \* Automationis essential for speeding up delivery, reducing manual errors, and ensuring repeatability across the software delivery lifecycle.
- \* Leanemphasizes the elimination of waste, limiting work in progress (WIP), and improving flow.
- \* Measurementmeans using metrics and data to inform decisions, identify bottlenecks, and drive continuous improvement.
- \* Sharingfosters transparency, knowledge transfer, and a unified approach to goals and problem-solving.

Option A replaces automation and lean principles with softer collaboration aspects, which are important but not recognized as the formal value set. Option C replaces "Measurement" with "Metrics," which is only a part of measurement. Option D substitutes "Accountability" for "Automation," which is not part of the CALMS model.

Therefore, the official correct set of values per the DevOps Foundation syllabus isB.
