

Pass Guaranteed Quiz Trustable SAP - C-ACDET-2506 Reliable Exam Book

P.S. Free 2026 SAP C-ACDET-2506 dumps are available on Google Drive shared by BraindumpsVCE:
https://drive.google.com/open?id=1J-tlQTeGtAtsNfCRn-3PDn9Lk_3fBTnl

We have chosen a large number of professionals to make C-ACDET-2506 learning question more professional, while allowing our study materials to keep up with the times. Of course, we do it all for you to get the information you want, and you can make faster progress. You can also get help from C-ACDET-2506 Exam Training professionals at any time. We can be sure that with the professional help of our C-ACDET-2506 test guide you will surely get a very good experience. Good materials and methods can help you to do more with less. Choose C-ACDET-2506 test guide to get you closer to success!

SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 2	<ul style="list-style-type: none"> Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

Topic 3	<ul style="list-style-type: none"> • Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

Reliable C-ACDET-2506 Test Cost & C-ACDET-2506 Valid Learning Materials

One more thing to give you an idea about the top features of SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C-ACDET-2506) exam questions before purchasing, the BraindumpsVCE are offering free SAP C-ACDET-2506 Exam Questions demo download facility. This facility is being offered in all three SAP C-ACDET-2506 exam practice question formats.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q11-Q16):

NEW QUESTION # 11

What should you do to proceed without errors? While migrating form templates, you successfully exported all templates from the Test site. However, when trying to import them into Production, you cannot.

- A. **Manually create the required folder in the Production site before importing.**
- B. Upload the templates to any existing folder regardless of its purpose.
- C. Modify the form template files locally to bypass folder restrictions.
- D. Skip the import and inform the team the templates cannot be migrated.

Answer: A

Explanation:

When migrating form templates between SAP Ariba environments, the folder structure in the target environment must exactly match the folder referenced in the template metadata. The export includes metadata about the folder path where the template resides. If the corresponding folder does not exist in the Production site, the import process will fail.

The correct procedure is to manually create the required folder in Production before importing the templates to ensure the folder metadata aligns perfectly.

Uploading templates to arbitrary folders or modifying template files locally to alter metadata is unsupported and can corrupt the package or cause errors.

Skipping the import unnecessarily halts progress and ignores SAP's structured migration approach.

SAP Ariba documentation on template migration and folder management strongly recommends maintaining folder parity between source and target systems to prevent import failures.

This practice helps maintain organized template management and ensures consistent deployment workflows.

NEW QUESTION # 12

A standard field is not available in reporting. A Greenfield customer needs to be able to report on the data captured in that standard field. How can this be achieved?

- A. The system makes all fields reportable after a system refresh.
- B. **Create a custom field that can be marked reportable, default the custom field to the standard field value, publish, and then pull the field into reporting.**
- C. Under Field Configurations, search for the field in the appropriate class, mark the field reportable, save and publish.
- D. All standard fields are reportable by default.

Answer: B

Explanation:

Some standard fields in SAP Ariba are not reportable by design and cannot be made reportable through configuration changes. The recommended workaround is to create a custom field that is marked as reportable, then set its default value to the standard field's value using an expression. Once published, this custom field can be included in reports, effectively surfacing the data previously inaccessible for reporting. System refreshes do not convert non-reportable standard fields to reportable. Marking the original standard field as reportable is not possible if the option is disabled by design.

NEW QUESTION # 13

A migration is performed for a Greenfield deployment to production, and the status of the Template configuration type indicates it failed. What actions do you take to make the failed template(s) available in production?

- A. Import the missing data in production and then import the template in production
- B. Request SAP intervention
- C. Import the template in production
- D. The template must always be rebuilt in production

Answer: A

Explanation:

When template migration fails in Greenfield deployment, it often means required master data like Flex Master Data or enumerations are missing in Production. The recommended resolution is to manually load the missing master data into Production first, then manually import the failed templates via the Production import tools. Requesting SAP intervention is unnecessary as this is a customer-side activity.

Importing templates without missing data causes repeated failures, and rebuilding templates is not always required if proper data exists.

NEW QUESTION # 14

Users are able to publish a contract workspace without populating the Supplier field. What action can be performed on the Supplier field to force population before publishing?

- A. Configure a visibility condition
- B. Enable Require value before publish
- C. Enable Required
- D. Configure a validity condition

Answer: B

Explanation:

SAP Ariba provides a specific property in the Advanced tab called "Require value before publish", which ensures that a field must be populated prior to the contract workspace being published. Enabling this option on the Supplier field enforces this mandatory behavior during the publish action. The standard "Required" checkbox only enforces field completion in the UI during data entry but does not prevent publishing if the field is empty. Visibility conditions control whether the field is displayed, not whether it is required at publish. Validity conditions enforce value correctness but not presence at publish time. This feature enhances data completeness at critical lifecycle points.

NEW QUESTION # 15

When performing migration to production for a Greenfield customer, which item needs to be made available in Production prior to creating the migration package in Intelligent Configuration Manager (ICM)?

- A. Approval Rules
- B. Translations
- C. Locations
- D. Users

Answer: B

Explanation:

Before creating and deploying migration packages with the Intelligent Configuration Manager (ICM), translation string resource files

(custom field labels, help tips, validation messages, etc.) must be uploaded into Production via AML & Translations Upload. This ensures that migration bundles referencing these translations do not cause missing label or localization issues post-migration. Locations, users, and approval rules are either migrated as part of configuration packages or managed separately, and do not require prior upload to Production before creating migration packages.

NEW QUESTION # 16

.....

BraindumpsVCE provides latest C-ACDET-2506 practice exam questions and C-ACDET-2506 certifications training material products for all those customers who are looking to pass C-ACDET-2506 exams. There is no doubt that the C-ACDET-2506 exams can be tough and challenging without valid C-ACDET-2506 brain dumps. We offer the guaranteed success with high marks in all C-ACDET-2506 exams. Our multiple C-ACDET-2506 certifications products let customers prepare and assess in the best way possible. We provide in-depth C-ACDET-2506 Study Material in the form of C-ACDET-2506 PDF dumps questions answers that will allow you to prepare yourself for the exam. C-ACDET-2506 exams PDF question answers also come with one year free update. We also provide live support chat to all our customers who have concerns about C-ACDET-2506 exams.
