Our C-S4CPR-2502 Research materials design three different versions for all customers. These three different versions include PDF version, software version and online version, they can help customers solve any problems in use, meet all their needs. Although the three major versions of our C-S4CPR-2502 learning materials provide a demo of the same content for all customers, they will meet different unique requirements from a variety of users based on specific functionality. The most important feature of the online version of our C-S4CPR-2502 Learning Materials are practicality. The online version is open to all electronic devices, which will allow your device to have common browser functionality so that you can open our products. At the same time, our online version of the C-S4CPR-2502 learning materials can also be implemented offline, which is a big advantage that many of the same educational products are not able to do on the market at present.

SAP C-S4CPR-2502 Exam Syllabus Topics:

Topic	Details
Topic 1	• Implementing with a Cloud Mindset, Building the Team, and Conducting Fit-to-Standard Workshops: This section of the exam measures skills of a SAP Project Manager and covers the methodology for successful cloud implementation projects. It includes adopting a cloud mindset, assembling the right project team, and conducting fit-to-standard workshops to ensure efficient and value-driven implementations.
Topic 2	• Extensibility and Integration: This section of the exam measures skills of a SAP Integration Consultant and covers the basic principles of system extensibility and integration in SAP S • 4HANA Cloud. It touches upon in-app and side-by-side extensions as well as integrating with external systems through APIs and standard tools.
Topic 3	• Configuration and the SAP Fiori Launchpad: This section of the exam measures skills of a SAP Implementation Specialist and covers how to configure and personalize the SAP Fiori Launchpad. It includes understanding app management, tile groups, catalogs, and business roles to ensure a user-friendly and efficient experience for end users.

Topic 4	• Implementation and Configuration for Sourcing and Procurement: This section of the exam measures skills of a SAP Sourcing and Procurement Consultant and covers the core configuration tasks required to set up sourcing and procurement processes in SAP S • 4HANA Cloud. It includes implementing purchase requisitions, purchase orders, approvals, sourcing, and invoice management while ensuring alignment with organizational procurement needs.
Topic 5	• System Landscapes and Identity Access Management: This section of the exam measures skills of a SAP System Administrator and covers basic understanding of the SAP S • 4HANA Cloud system architecture, including identity and access management concepts. It focuses on setting up user roles, managing authorizations, and maintaining secure system access within the SAP landscape.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement Sample Questions (Q46-Q51):

NEW QUESTION # 46
Which of the following data are master data in SAP S14HANA Cloud Public Edition? Note: There are 2 correct answers to this question.

- A. Material/Product
- B. Supplier
- C. Supplier Invoice
- D. Purchase Order

Answer: A,B

NEW QUESTION # 47
Which of the following data are master data in SAP S14HANA Cloud Public Edition? Note: There are 2 correct answers to this question.

- A. Material/Product
- B. Supplier
- C. Supplier Invoice
- D. Purchase Order

Answer: A,B

Explanation:
InSAP S/4HANA Cloud Public Edition,master datarefers to the core data that is used across multiple business processes and transactions. Below are the two correct examples of master data:
* Material/Product (Option C):Materials (or products) are a key type of master data in SAP S/4HANA Cloud. They represent goods or services that are procured, produced, stored, or sold. Material master data includes details such as descriptions, units of measure, and procurement types. TheSAP Master Data Management Guideconfirms this.

* Supplier (Option D):Suppliers are another critical type of master data. They represent vendors from whom goods or services are procured. Supplier master data includes information such as addresses, payment terms, and tax details. The sameSAP Master Data Management Guidelists suppliers as master data.
* A. Supplier Invoice:Supplier invoices are transactional data, not master data. They represent financial postings related to supplier payments.
* B. Purchase Order:Purchase orders are also transactional data, not master data. They are created during the procurement process and are not reused across multiple transactions.
* SAP Master Data Management Guide:Explains the types of master data in SAP S/4HANA Cloud, including materials and suppliers.https://help.sap.com
* SAP S/4HANA Cloud Procurement Guide:Provides details on how master data is used in procurement processes.
Why the Other Options Are Incorrect:Key References:

NEW QUESTION # 48
You are recording actions for a custom process step in a test automate. When do you press the "Read" button on the recording panel? Note: There are 2 correct answers to this question.

- A. To capture an error message on the screen that can be used later.
- B. To capture a value in a text field that should be stored as a variable.
- C. To capture text in a message screen that can be used for data binding later.
- D. To capture a static label on the screen that should be checked during test execution.

Answer: B,D

Explanation:
When recording actions for a custom process step in a test automation tool, pressing the "Read" button on the recording panel serves specific purposes. Below are the two correct answers:
* To capture a static label on the screen that should be checked during test execution (Option A):
Capturing static labels ensures that the test script can verify whether the correct screen or message is displayed during execution. This helps validate the user interface and ensures consistency. TheSAP Test Automation Guideconfirms this functionality.
* To capture a value in a text field that should be stored as a variable (Option D):Capturing values from text fields allows the test script to store them as variables for later use in the test case. This is particularly useful for dynamic data that needs to be validated or reused in subsequent steps. The same SAP Test Automation Guidedocuments this feature.
* B. To capture an error message on the screen that can be used later:Error messages are typically captured using specific error-handling mechanisms rather than the "Read" button.
* C. To capture text in a message screen that can be used for data binding later:Data binding is usually handled through predefined variables or parameters, not by capturing text directly with the
"Read" button.
* SAP Test Automation Guide:Explains the purpose of the "Read" button and how it is used in test automation.https://help.sap.com
* SAP Cloud ALM Testing Documentation:Provides details on recording and automating test cases.
Why the Other Options Are Incorrect:Key References:

NEW QUESTION # 49
Which of the following are captured in a completed Digital Discovery Assessment?Note: There are 2 correct answers to this question.

- A. Known integration requirements
- B. SAP Fiori application extensions
- C. Business role requirements
- D. Target customer go-live date

Answer: A,C

Explanation:
TheDigital Discovery Assessmentcaptures critical information about a customer's business needs and technical landscape to ensure successful implementation. Below is an explanation of the correct answers:
* Business role requirements (C):The assessment identifies the roles and responsibilities required for users in the system, ensuring proper assignment of business roles and permissions.
* Known integration requirements (D):The assessment documents existing and planned integrations with other systems, helping to define the integration strategy and scope.

* Target customer go-live date (A):While the go-live date is important, it is typically defined during project planning and is not captured in the Digital Discovery Assessment.
* SAP Fiori application extensions (B):Extensions to SAP Fiori apps are identified during the realization phase, not during the discovery phase.

NEW QUESTION # 50

Which of the following is a business partner category for Business Partner master data in SAP S/4HANA Cloud Public Edition?
Note: There are 2 correct answers to this question.

- A. Customer
- B. Person
- C. Supplier
- D. Organization

Answer: B,D

Explanation:
InSAP S/4HANA Cloud Public Edition, theBusiness Partner (BP)master data is used to manage relationships with entities such as customers, suppliers, and other stakeholders. Thebusiness partner category defines the type of business partner being created.
* Organization (Option C):The "Organization" category is used for legal entities such as companies, vendors, or customers. It represents a group or entity that can engage in business transactions. TheSAP Business Partner Master Data Guideconfirms that "Organization" is a valid business partner category.
* Person (Option D):The "Person" category is used for individuals, such as employees, contacts, or representatives of an organization. This category is essential for managing personal details and relationships. The sameSAP Business Partner Master Data Guidelists "Person" as a valid business partner category.
* A. Supplier:While suppliers are managed as business partners, "Supplier" is not a business partner category. Instead, it is a role assigned to a business partner within the system.
* B. Customer:Similarly, "Customer" is a role assigned to a business partner, not a business partner category.
* SAP Business Partner Master Data Guide:Explains the structure of business partner categories and roles in SAP S/4HANA Cloud Public Edition.https://help.sap.com
* SAP S/4HANA Cloud Master Data Management Guide:Provides details on configuring and managing business partner master data.
