

300-445 training materials & 300-445 exam torrent & 300-445 dumps torrent

300-445 ENNA Exam Details	
Vendor	Cisco
Exam Code	300-445 ENNA
Full Exam Name	Cisco Designing and Implementing Enterprise Network Assurance
Number of Questions	55-65
Sample Questions	Cisco 300-445 Sample Questions
Practice Exams	Cisco Certified Specialist Enterprise Network Assurance Practice Test
Passing Score	Variable (750-850 / 1000 Approx.)
Time Limit	90 minutes
Languages	English

100% Guaranteed Success with NWExam.com

DOWNLOAD the newest ITCertMagic 300-445 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1qLcwKnDbLoj_kBplr4GqyM_LOZh2d5Pr

Many people now want to obtain the 300-445 certificate. Because getting a certification can really help you prove your strength, especially in today's competitive pressure. The science and technology are very developed now. If you don't improve your soft power, you are really likely to be replaced. Our 300-445 Exam Preparation can help you improve your uniqueness. And our 300-445 study materials contain the most latest information not only on the content but also on the displays.

IT exam become more important than ever in today's highly competitive world, these things mean a different future. Cisco 300-445 exam will be a milestone in your career, and may dig into new opportunities, but how do you pass Cisco 300-445 Exam? Do not worry, help is at hand, with ITCertMagic you no longer need to be afraid. ITCertMagic Cisco 300-445 exam questions and answers is the pioneer in exam preparation.

>> Pass 300-445 Guarantee <<

300-445 Valid Exam Fee, Testing 300-445 Center

The Designing and Implementing Enterprise Network Assurance (300-445) practice questions (desktop and web-based) are customizable, meaning users can set the questions and time according to their needs to improve their discipline and feel the real-based exam scenario to pass the Cisco 300-445 Certification. Customizable mock tests comprehensively and accurately represent the actual Designing and Implementing Enterprise Network Assurance (300-445) certification exam scenario.

Cisco Designing and Implementing Enterprise Network Assurance Sample Questions (Q125-Q130):

NEW QUESTION # 125

When designing a high-density wireless network for a large auditorium in an enterprise environment, which of the following strategies is most effective in managing co-channel interference (CCI)?

- **A. Utilizing a high-density deployment with microcell architecture**
- B. Deploying omnidirectional antennas at maximum power settings
- C. Increasing the minimum data rate for the wireless LAN
- D. Spreading the access points evenly across the available spectrum without considering user density

Answer: A

Explanation:

In a high-density environment such as a large auditorium, managing co-channel interference (CCI) is crucial for maintaining optimal wireless performance. Utilizing a high-density deployment with microcell architecture involves deploying a larger number of access points with lower transmit powers and smaller coverage areas. This approach allows for a more granular control of the RF

environment, reducing the overlap between coverage cells and thereby minimizing CCI. It contrasts with deploying omnidirectional antennas at maximum power settings, which can exacerbate CCI by extending the range of each access point's signal and increasing the likelihood of overlap. Increasing the minimum data rate does not directly address CCI, although it can improve overall network efficiency. Lastly, simply spreading access points evenly without considering user density fails to account for the variable demand within the auditorium, potentially leading to areas of high CCI and poor performance.

NEW QUESTION # 126

Which network issue can be diagnosed using collected data related to routing protocols?

- A. Route leaking
- B. Packet loss
- C. DHCP server outage
- D. DNS resolution failure

Answer: A

Explanation:

Route leaking is a network issue that can be diagnosed using collected data related to routing protocols, enabling efficient troubleshooting and resolution.

NEW QUESTION # 127

According to RFC 7276, which monitoring approach is more likely to be used for compliance auditing in real-time environments?

- A. Neither, as RFC 7276 does not discuss compliance auditing
- B. Both active and passive monitoring
- C. Passive monitoring
- D. Active monitoring

Answer: D

NEW QUESTION # 128

Which authentication method is commonly used in synthetic web tests to ensure secure access to web applications?

- A. SAML
- B. Basic authentication
- C. OAuth
- D. Digest authentication

Answer: A

Explanation:

Security Assertion Markup Language (SAML) is commonly used in synthetic web tests to ensure secure access to web applications, providing authentication and authorization capabilities in network assurance.

NEW QUESTION # 129

What is the primary benefit of integrating Cisco technologies in network management?

- A. Limited scalability options
- B. Centralized management tasks
- C. Reduced software compatibility
- D. Increased hardware complexity

Answer: B

Explanation:

Integration of Cisco technologies centralizes management tasks, streamlining network operations and improving efficiency.
