CPC-CDE-RECERT Cert | CPC-CDE-RECERT Valid Braindumps Sheet

Our CPC-CDE-RECERT learning prep boosts the self-learning, self-evaluation, statistics report, timing and test stimulation functions and each function plays their own roles to help the clients learn comprehensively. The self-learning and self-evaluation functions of our CPC-CDE-RECERT guide materials help the clients check the results of their learning of the CPC-CDE-RECERT Study Materials. The timing function of our CPC-CDE-RECERT training quiz helps the learners to adjust their speed to answer the questions and keep alert and our study materials have set the timer.

CyberArk CDE-CPC Recertification Sample Questions (Q31-Q36):

NEW QUESTION # 31

How should you configure PSM for SSH to support load balancing?

- A. in PVWA > Options > PSM for SSH Proxy > Servers
- B. by editing sshd.config on the all the PSM for SSH servers
- C. in PVWA > Options > PSM for SSH Proxy > Servers > VIP
- D. by using a network load balancer

Answer: C

NEW QUESTION # 32

To use SAML authentication in Privilege Cloud Standard Services, users must first be defined in Privilege Cloud. What are correct methods for defining users? (Choose two.)

- A. Create users in the CyberArk Privilege Cloud database using the CAVaultManager createuser command.
- B. Integrate Privilege Cloud with your LDAP server.
- C. Create users in Privilege Cloud with details identical to those who access Privilege Cloud through SAML authentication.
- D. Integrate Privilege Cloud with Email System.
- E. Integrate Privilege Cloud with SIEM.

Answer: B,C

Explanation:

CyberArk's Privilege Cloud Standard SAML configuration documentation states that, before using SAML, users must already be defined in Privilege Cloud and provides two supported methods:

* Integrate with your LDAP server (recommended) # this provisions users into Privilege Cloud.

(Answer A)

* Create CyberArk users in Privilege Cloud with identical details as the users who will access via SAML. (Answer D) The other options are not valid "user definition" methods for this requirement:

* SIEM and Email system integrations don't define users in Privilege Cloud.

* E is not a supported/customer method in Privilege Cloud Standard documentation (and Privilege Cloud is a managed service; you don't create users by directly manipulating the service database).

NEW QUESTION # 33

What is the recommended method to enable load balancing and failover of the CyberArk Identity Connector?

- A. Set up a Microsoft Failover Cluster on two or more CyberArk Identity Connector servers.
- B. Set up two or more CyberArk Identity Connector servers only.
- C. Set up a network load balancer between two or more CyberArk Identity Connector servers.
- D. Setup IIS based Application Request Routing on two or more CyberArk Identity Connector servers.

Answer: B

Explanation:

<https://docs.cyberark.com/identity/latest/en/content/coreservices/connector/connector-install.htm>

NEW QUESTION # 34

You want to improve performance on the CPM by restricting accounts for the CYBRWINDAD platform to only the WINDEMEA and WINDEMEA_ADMIN Safes. How do you set this in CyberArk?

- A. Modify cpm.ini on the relevant CPM(s) and add AllowedSafesCYBRWINDAD and set it to (WINDEMEA)|(WINDEMEAADMIN).
- **B. In the CYBRWINDAD platform, under Automatic Password Management > General, configure AllowedSafes and set it to (WINDEMEA)|(WINDEMEA_ADMIN).**
- C. In the settings for Configuration/CPM assigned to the WINDEMEA and WINDEMEAADMIN Safes, configure AllowedSafes and set it to (WINDEMEA)|(WINDEMEAADMIN).
- D. In the CYBRWINDAD platform, under UI & Workflows > Properties > Optional, configure AllowedSafes and set it to (WINDEMEA)|(WINDEMEA_ADMIN).

Answer: B

Explanation:

CyberArk's official guidance for restricting a platform to specific Safes is to set the AllowedSafes platform parameter in the General section of the platform under Automatic Password Management.

AllowedSafes uses a regular expression to match Safe names, which is why a pattern such as (WINDEMEA)|(WINDEMEA_ADMIN) is used to allow exactly those two Safe names.

NEW QUESTION # 35

What must be done before configuring directory mappings in the CyberArk Privilege Cloud Standard Portal for LDAP integration?

- A. Ensure the user connecting to the domain has administrative privileges.
- **B. Retrieve the LDAPS certificate and deliver it to CyberArk.**
- C. Create a new domain in the Privilege Cloud Portal.
- D. Make sure HTTPS (443/tcp) is reachable over the Secure Tunnel.

Answer: B

NEW QUESTION # 36

.....

Some people are inclined to read paper materials. Do not worry. Our company has already taken your thoughts into consideration. Our PDF version of the CPC-CDE-RECERT practice materials support printing on papers. All contents of our CPC-CDE-RECERT Exam Questions are arranged reasonably and logically. In addition, the word size of the CPC-CDE-RECERT study guide is suitable for you to read. And you can take it conveniently.
