Trend Deep-Security-Professional Questions Can Help you Pass Exam [2026]

Currently more and more IT companies think highly of Trend certifications, IT workers are willing to clear exams (Deep-Security-Professional valid practice exam online) and get certifications in order to improve their competitive power and obtain better opportunities. If you are ready to prepare for test questions and answers by PDF file or soft test engine in order to master better

knowledge and skills, Deep-Security-Professional valid practice exam online will be a nice choice.

Trend Micro Certified Professional for Deep Security exam is designed to test the skills and knowledge of IT professionals in deploying and managing Trend Micro's Deep Security solution. Trend Micro Certified Professional for Deep Security certification is ideal for individuals who are responsible for securing their organization's virtualized and cloud environments. Deep-Security-Professional Exam covers a range of topics, including the installation and configuration of Deep Security, virtual patching, intrusion prevention, and security policy management.

Trend Micro Certified Professional for Deep Security Sample Questions (Q38-Q43):
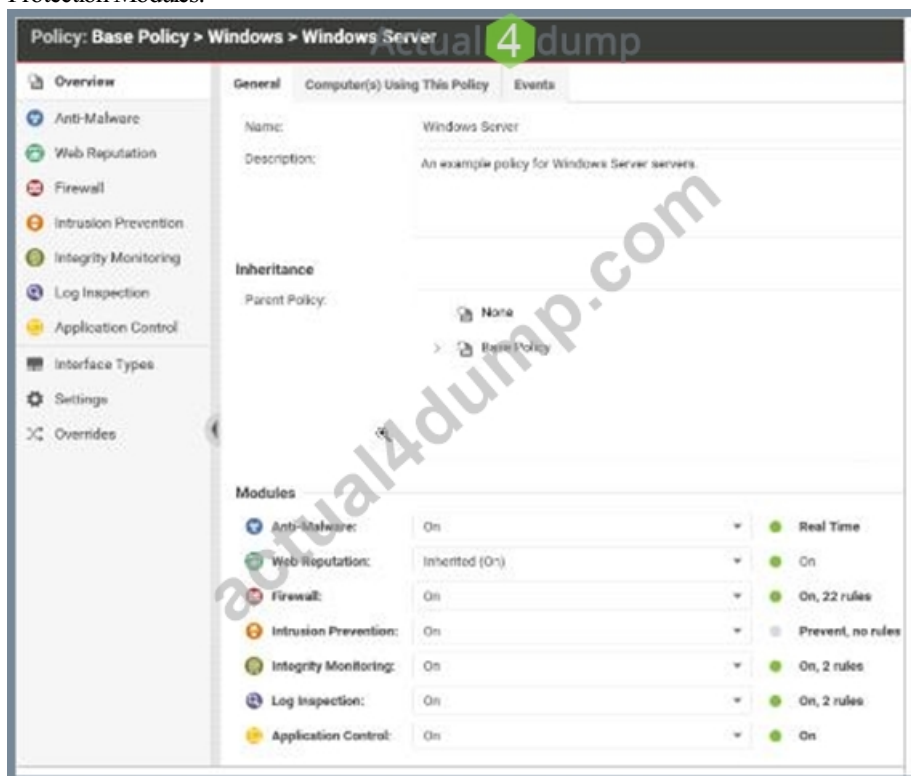

NEW QUESTION # 38
Which of the following Firewall rule actions will allow data packets to pass through the Firewall Protection Module without being subjected to analysis by the Intrusion Prevention Protection Module?

- A. Allow
- B. Deny
- C. Force Allow
- D. Bypass

Answer: D

NEW QUESTION # 39
In the policy displayed in the exhibit, the state of the Web Reputation Protection Module is set to "Inherited (On)", while the state for the other Protection Module is set to "On". Why is the Web Reputation Protection Module displayed differently than the other Protection Modules.

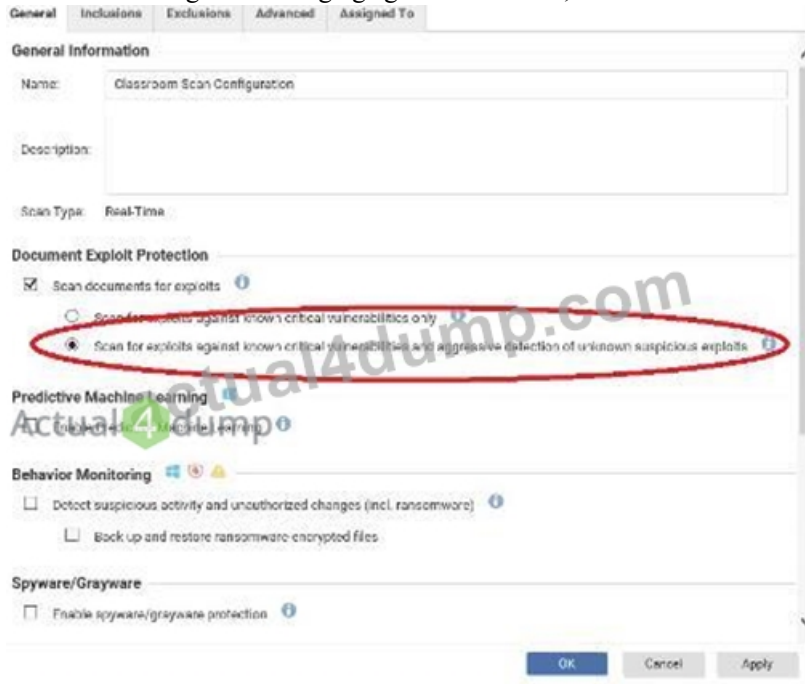

- A. In this example, the state for the Web Reputation Protection Module is inherited from the parent policy, while the other Protection Modules were turned on specifically in this child policy.
- B. In this example, the state for the Web Reputation Protection Module is inherited from the parent policy, while the other Protection Modules were turned on at the computer level.
- C. The state for a Protection Module is always displayed as "Inherited (On)" until the module components are installed on the Deep Security Agent.
- D. In this example, the state for the Web Reputation Protection Module is listed as "In-herited (On)" as it was inherited from the default setting in the Base Policy.

Answer: A

NEW QUESTION # 40

Based on the configuration setting highlighted in the exhibit, what behavior can be expected during a malware scan?

- A. With the highlighted setting enabled, Deep Security Agents will scan files for unknown malware using Predictive Machine Learning.
- B. With the highlighted setting enabled, Deep Security Agents will scan files for viruses and malware using supplementary aggressive detection pattern files.
- C. With the highlighted setting enabled, Deep Security Agents will scan files for known viruses and malware using patterns and any files deemed suspicious will be submitted to a configured Deep Discovery Analyzer for further analysis.
- D. With the highlighted setting enabled, Deep Security Agents will scan files for known malware as well as newly encounted malware by accessing the Suspicious Objects List.

Answer: B

Explanation:
The highlighted option specifies, "Scan for exploits against known critical vulnerabilities and aggressive detection of unknown suspicious exploits." This means the agent uses additional, more aggressive detection patterns to identify not just known exploits but also suspicious and unknown exploit techniques in document files. Predictive Machine Learning and Suspicious Objects List are separate features, and Deep Discovery Analyzer integration is not referenced by this setting.

NEW QUESTION # 41

Based on the script displayed in the exhibit, which of the following statements are correct? Select all that apply.

- A. Deep Security Agents deployed using this script will be activated against Tenant 0 in a multi-tenant environment.

- B. Deep Security Agents deployed using this script are activated against a specific tenant.
- C. Deep Security Agents deployed using this script will be assigned a specific policy when activated.
- D. This script will deploy the Deep Security Agent on a server, but will not automatically activate it.

Answer: B,C

NEW QUESTION # 42

How can you prevent a file from being scanned for malware?

- A. Add the file to the Exclusions list in the "Allowed Spyware/Grayware Configuration".
- B. Edit the "Scan Exclusions" section of the dsa.properties configuration file on the Deep Security Agent computer to include the file name. Save the configuration file and restart the Deep Security Agent service.
- C. Enable "File Types scanned by IntelliScan" in the Malware Scan Configuration prop-erties in the Deep Security Manager Web console. Click "Scan All Except" and type the filename to exclude from the scan.
- D. Add the file to the Exclusions list in the Malware Scan Configuration.

Answer: D

NEW QUESTION # 43

......
