## ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q85-Q90):

### NEW QUESTION # 85

The project property to update actual effort from time card is controlled at what level?

- **A. Project Level.**
- B. Application Level (Global).
- C. Portfolio Level.
- D. Program Level.

**Answer: A**

Explanation:

According to the ServiceNow documentation<sup>1</sup>, the project property to update actual effort from time card is controlled at the project level. This property is called Update actual effort from time card and it determines if the Actual effort field on the Dates tab should be updated based on the hours entered from time cards for the project. If set to Yes, the Actual effort field is read-only on the Project and Project Task forms. If set to No, the Actual effort field is editable on the Project and Project Task forms.

### NEW QUESTION # 86

If a project manager is responsible for approving time sheets or submitting time cards on behalf of team members, they should be given what role?

- A. activity\_admin.
- B. approval\_admin.
- C. form\_admin.
- **D. timecard\_admin.**

**Answer: D**

Explanation:

According to the ServiceNow documentation<sup>1</sup>, the timecard\_admin role can approve time sheets or submit time cards on behalf of team members. This role also has the ability to create and modify time sheet policies, time sheet groups, and time sheet periods. The other options are incorrect because:

A . activity\_admin: The activity\_admin role can create and modify activities, activity sets, and activity plans<sup>2</sup>.

C . form\_admin: The form\_admin role can create and modify forms, form sections, and form layouts<sup>3</sup>.

D . approval\_admin: The approval\_admin role can create and modify approval rules, approval groups, and approval stages<sup>4</sup>.

### NEW QUESTION # 87

As a demand manager, you can view an artifact from a demand. What artifacts are part of a demand?

- A. Incidents, Problems, Change.
- **B. Decision, Risk, Requirements.**
- C. Project, Defect, Requests.
- D. Stories, Vulnerability Tasks, Enhancements.

**Answer: B**

Explanation:

According to the ServiceNow documentation<sup>1</sup>, a demand manager can view and edit the following artifacts from a demand:

Decision: A decision that affects the demand or its outcome<sup>2</sup>.

Risk: A risk that could impact the demand or its outcome<sup>3</sup>.

Requirement: A requirement that defines the scope or functionality of the demand<sup>4</sup>.

The other options are not artifacts of a demand, but rather related entities that can be created from a demand or linked to a demand.

### NEW QUESTION # 88

The Project management application supports two types of external dependencies. What are they?

Choose 2 answers

- A. Task Dependency.
- B. Change Dependency.
- **C. Hard Dependency.**
- D. Milestone Dependency.
- **E. Soft Dependency.**

**Answer: C,E**

Explanation:

The Project Management application supports two types of external dependencies: hard dependency and soft dependency. A hard dependency is a dependency that must be met before a task can start or finish. A soft dependency is a dependency that is preferred but not mandatory for a task to start or finish. You can find more information about these dependency types in the Product Documentation for ServiceNow.

### NEW QUESTION # 89

Which of these items should implementers create/configure first during an SPM implementation?
