NS0-185 Reliable Test Vce | Test NS0-185 Questions Pdf

The TestPassKing wants to become the first choice of Network Appliance NS0-185 certification exam candidates. To achieve this objective the top-notch and real Network Appliance NS0-185 exam questions are being offered in three easy-to-use and compatible formats. These TestPassKing NS0-185 Exam Questions formats are PDF dumps files, desktop practice test software, and web-based practice test software.

Network Appliance NetApp Storage Installation Engineer, ONTAP Professional Exam Sample Questions (Q103-Q108):

NEW QUESTION # 103

After installation, the customer requests training on system administration.
Which two responses are appropriate? (Choose two.)

- A. Use the Knowledge Base for specific issues.
- B. Open a support case for training questions.
- C. Visit the NetApp MySupport site and use Express Guides.
- D. Use NetApp SmartSolve for all questions.

Answer: A,C

NEW QUESTION # 104

After updating BES-53248 cluster switches, which two commands verify a healthy cluster? (Choose two.)

- A. network interface show -vserver Cluster -fields auto-revert
- B. network port show -ipSpace Cluster
- C. network device-discovery show -protocol cdp
- D. network interface show -vserver Cluster

Answer: B,D

NEW QUESTION # 105

You want to add an AFF A400 HA pair to an existing cluster.

In this scenario, which LIF type is required?

- A. node-mgmt
- B. data
- C. cluster-mgmt
- D. intercluster

Answer: D

Explanation:

When expanding an ONTAP cluster by adding new nodes or HA pairs, intercluster LIFs are required to enable secure communication between clusters or nodes during join and expansion workflows. Intercluster LIFs provide IP-based connectivity used for cluster peering, node addition, and replication setup.

Cluster management LIFs are used for administrative access, node management LIFs provide per-node management access, and data LIFs are used for client I/O. None of these LIF types support the inter-node communication required during cluster expansion. Therefore, an intercluster LIF is required.

NEW QUESTION # 106

You completed a 2-node AFF A700 installation according to the poster. You run the disk show -fields owner command and notice that all drives are assigned to node 1.

In this scenario, which tool would you use to access documentation and guidelines to solve the issue?

- A. NetAppDocs
- B. NET2
- C. Active IQ One Collect
- D. Active IQ Unified Manager

Answer: A

Explanation:

NetAppDocs provides official installation documentation, posters, and step-by-step guidelines. It is the correct resource for resolving disk ownership and installation workflow issues.

NEW QUESTION # 107

A customer is asked to install a new AFF ASA A700 system. During the installation, the customer asks if ONTAP 9.8 is supported with their host's OS version running Windows 2016.

In this scenario, which NetApp tool would verify supportability?

- A. ONTAP System Manager
- B. Active IQ Unified Manager
- C. Interoperability Matrix Tool

- D. Active IQ OneCollect

Answer: C

Explanation:

Verifying interoperability between ONTAP versions, storage platforms, host operating systems, protocols, and host utilities is a mandatory step in NetApp solution assessment and installation planning. The Interoperability Matrix Tool (IMT) is the authoritative NetApp resource used to confirm whether a specific combination of components is supported.

In this scenario, the customer needs to verify that ONTAP 9.8 is supported with Windows Server 2016 on an AFF A700 system. IMT allows administrators to search by storage OS version, platform model, host OS, protocol (iSCSI, FC, NVMe), and host utilities to ensure the configuration is supported.

ONTAP System Manager is used for system administration, not supportability validation. Active IQ Unified Manager focuses on monitoring and performance. Active IQ OneCollect is used for data collection, not compatibility verification.

Therefore, the correct tool is the Interoperability Matrix Tool.

NEW QUESTION # 108

.....

If your answer is yes then you need to start Channel Partner Program NS0-185 test preparation with Network Appliance NS0-185 PDF Questions and practice tests. With the TestPassKing Channel Partner Program NetApp Storage Installation Engineer, ONTAP Professional Exam NS0-185 Practice Test questions you can prepare yourself shortly for the final NetApp Storage Installation Engineer, ONTAP Professional Exam NS0-185 exam.
