## **Marvelous CompTIA DS0-001: CompTIA DataSys+ Certification Exam Reliable Exam Cram - 100% Pass-Rate PracticeVCE Examinations DS0-001 Actual Questions**

Do you always feel that your gains are not proportional to your efforts without valid DS0-001 study torrent? Do you feel that you always suffer from procrastination and cannot make full use of your sporadic time? If your answer is absolutely yes, then we would like to suggest you to try our DS0-001 Training Materials, which are high quality and efficiency DS0-001 test tools. Your success is 100% ensured to pass the DS0-001 exam and acquire the dreaming certification which will enable you to reach for more opportunities to higher incomes or better enterprises.

### **CompTIA DataSys+ Certification Exam Sample Questions (Q68-Q73):**

#### **NEW QUESTION # 68**

A database administrator should review the database disaster recovery documentation:

- A. whenever a new Chief Technical Officer joins the company.
- B. just before an outside audit is scheduled.
- C. when the company's business requirements change.
- D. during every first week of every month.

**Answer: C**

Explanation:

Disaster recovery documentation should be reviewed and updated whenever business requirements change to ensure recovery plans remain aligned with current needs.

#### **NEW QUESTION # 69**

A database administrator would like to create a table named XYZ. Which of the following queries should the database administrator use to create the table?

- A. 

```
Create Table XYZ (  
column1 datatype;  
column2 datatype);
```
- B. 

```
Select Table XYZ (  
column1 datatype,  
column2 datatype);
```
- C. 

```
Create Table XYZ (  
column1 datatype,  
column2 datatype);
```

```
Append Table XYZ(  
column1 datatype,  
column2 datatype);
```

- D.

**Answer: C**

Explanation:

The query that the administrator should use to create the table is option B. This query uses the CREATE TABLE statement to define a new table named XYZ with three columns: ID, Name, and Age. Each column has a data type and a constraint, such as NOT NULL, PRIMARY KEY, or CHECK. The other options either have syntax errors, use incorrect keywords, or do not specify the table name or columns correctly. Reference: CompTIA DataSys+ Course Outline, Domain 1.0 Database Fundamentals, Objective 1.1 Given a scenario, identify and apply database structure types.

#### NEW QUESTION # 70

An analyst shared a database directly from a workstation. A week later, users could not access the database, but could access other shared resources. Which of the following is the most likely reason the shared database is unavailable?

- A. The DNS changed the workstation's name.
- **B. The IP addresses for the sharing workstation changed.**
- C. The IP addresses for the users' workstations changed.
- D. The DNS permissions changed.

**Answer: B**

Explanation:

If the workstation sharing the database obtains a new IP address (e.g., via DHCP), other users relying on the old IP will no longer reach it, causing the shared database to become unavailable.

#### NEW QUESTION # 71

Over the weekend, a company's transaction database was moved to an upgraded server. All validations performed after the migration indicated that the database was functioning as expected. However, on Monday morning, multiple users reported that the corporate reporting application was not working.

Which of the following are the most likely causes? (Choose two.)

- A. The new database server has its own reporting system, so the old one is not needed.
- B. The reporting application cannot keep up with the new, faster response from the database.
- **C. The reporting application's mapping to the database location was not updated.**
- **D. The access permissions for the service account used by the reporting application were not changed.**
- E. The database server is not permitted to fulfill requests from a reporting application.
- F. The reporting jobs that could not process during the database migration have locked the application.

**Answer: C,D**

Explanation:

The most likely causes of the reporting application not working are that the access permissions for the service account used by the reporting application were not changed, and that the reporting application's mapping to the database location was not updated. These two factors could prevent the reporting application from accessing the new database server. The other options are either irrelevant or unlikely to cause the problem.

#### NEW QUESTION # 72

Which of the following is a potential issue raised by enterprise database users?

- A. The need to manage long transactions
- **B. The need for concurrent access and multiuser updates**
- C. The need for multiple views or windows into the same database
- D. The need to manually transfer records to paper

**Answer: B**

Explanation:

A potential issue raised by enterprise database users is the need for concurrent access and multiuser updates. Concurrent access means that multiple users can access the same data at the same time, while multiuser updates mean that multiple users can modify the same data at the same time. These features are essential for enterprise database users who need to share and collaborate on data in real time. However, they also pose challenges such as maintaining data consistency, preventing conflicts or errors, and ensuring transaction isolation and durability. The other options are either not issues or not specific to enterprise database users. For example, the need for multiple views or windows into the same database may be a preference or a convenience, but not an issue; the need to manage long transactions may be a challenge for any database user, not just enterprise ones; the need to manually transfer records to paper may be an outdated or inefficient practice, but not an issue. Reference: CompTIA DataSys+ Course Outline, Domain 1.0 Database Fundamentals, Objective 1.3 Given a scenario, identify common database issues.

## NEW QUESTION # 73

.....

CompTIA DS0-001 practice exam support team cooperates with users to tie up any issues with the correct equipment. If CompTIA DS0-001 certification exam material changes, PracticeVCE also issues updates free of charge for 1 year following the purchase of our DS0-001 Exam Questions.
