During recent 10 years, our 712-50 Exam Questions have met with warm reception and quick sale in the international market. Our 712-50 study materials are not only as reasonable priced as other makers, but also they are distinctly superior in the following respects.

## What Are Program Details?

With 712-50 exam, the EC-Council CCISO (Certified Chief Information Security Officer) certification is associated. This one is the gold-standard of IT executive management certifications and is famed to infuse core knowledge related to IS control, human capital management, program development, financial expertise, and the like. Because of this high-end learning, the CCISO designation is the key to get placed in pivotal information security management job roles. Using the professionally designed exam domains, such a certification fills the gap that exists between real-time work expertise that a CISO aspirant needs at the job and what an emerging CISO already has.

The EC-Council Certified CISO (CCISO) certification is a globally recognized certification program that validates the knowledge, skills, and abilities of professionals in the field of information security. The EC-Council 712-50 Exam is a critical step towards becoming a certified CISO. 712-50 exam covers five critical domains, and candidates must have at least five years of experience in three or more of these domains to be eligible to take the exam. The CCISO certification is highly respected by employers and is a testament to the skills and expertise of an individual in the field of information security.

### EC-COUNCIL EC-Council Certified CISO (CCISO) Sample Questions (Q135-Q140):

#### NEW QUESTION # 135

Your IT auditor is reviewing significant events from the previous year and has identified some procedural oversights. Which of the following would be the MOST concerning?

- A. Lack of reporting of a successful denial of service attack on the network.
- B. Lack of notification to the public of disclosure of confidential information
- C. Failure to notify police of an attempted intrusion
- D. Lack of notification to the public of disclosure of confidential information

**Answer: D**

#### NEW QUESTION # 136

Which of the following best describes an access control process that confirms the identity of the entity seeking access to a logical or physical area?

- A. Identification
- B. Authentication
- C. Accountability
- D. Authorization

**Answer: D**

#### NEW QUESTION # 137

You have a system with 2 identified risks. You determine the probability of one risk occurring is higher than the

- A. Risk impact comparison
- B. Controlled mitigation effort
- C. Relative likelihood of event
- D. Comparative threat analysis

**Answer: C**

Explanation:

Relative Likelihood of Event in Risk Assessment: When assessing risks, understanding the relative likelihood of events helps prioritize which risks require immediate attention and mitigation.

\* Risk with higher probability should be addressed first, especially if its impact is significant.

Why This Option Is Correct: It emphasizes the importance of assessing the comparative probability of risks occurring to guide mitigation efforts effectively.

Why Other Options Are Incorrect:

\* A. Controlled Mitigation Effort: Refers to managing mitigation, not comparing probabilities.

\* B. Risk Impact Comparison: Focuses on impact, not probability.

\* D. Comparative Threat Analysis: Examines threats broadly, not specific event likelihoods.

References: EC-Council emphasizes the use of probability and impact matrices in risk assessments to prioritize actions.

### NEW QUESTION # 138

A customer of a bank has placed a dispute on a payment for a credit card account. The banking system uses digital signatures to safeguard the integrity of their transactions. The bank claims that the system shows proof that the customer in fact made the payment. What is this system capability commonly known as?

- A. strong authentication
- **B. non-repudiation**
- C. digital rights management
- D. conflict resolution

**Answer: B**

Explanation:

\* Non-repudiation ensures that a party cannot deny the authenticity of their digital signature or transaction.

\* Digital signatures provide this assurance by cryptographically linking the signer to the transaction, safeguarding transaction integrity and authenticity.

Why Other Options Are Incorrect:

\* B. Conflict resolution: Refers to resolving disputes but does not describe the capability of proving a transaction.

\* C. Strong authentication: Relates to verifying identity but not to preventing denial of actions.

\* D. Digital rights management: Concerns content protection, not transaction integrity.

EC-Council CISO Reference:

Emphasizes the role of non-repudiation in maintaining trust and integrity in digital transactions.

### NEW QUESTION # 139

Which of the following activities results in change requests?

- A. Preventive actions
- B. Defect repair
- **C. Corrective actions**
- D. Inspection

**Answer: C**

Explanation:

Change Requests in Risk Management: Corrective actions are steps taken to address and rectify existing deviations or issues. These actions often lead to change requests to ensure systems align with organizational policies or frameworks.

Why This is Correct:

\* Corrective actions inherently involve changes to existing processes, configurations, or systems to address gaps or issues.

Why Other Options Are Incorrect:

\* A. Preventive actions: Aim to avoid issues, not correct existing ones.

\* B. Inspection: Identifies issues but doesn't directly result in change requests.

\* C. Defect repair: May lead to changes but is typically specific to fixing defects, not broad corrective actions.

References: EC-Council emphasizes the importance of corrective actions in managing deviations, aligning them with the need for formal change management processes.

### NEW QUESTION # 140

.....

As is known to us, different people different understanding of learning, and also use different methods in different periods, and different learning activities suit different people, at different times of the day.
