SAP Certified Associate - Implementation Consultant - Managed gateway for spend management and SAP Business Network Sample Questions (Q66-Q71):

NEW QUESTION # 66

What is the purpose of the "Migrate transaction configurations" automated report when migrating from Ariba CI to the Managed Gateway for Spend & Network solutions? Note: There are 2 correct answers to this question.

- A. Send SAP system information to the Managed Gateway for Spend & Network.
- B. Send client certificate information to the Managed Gateway for Spend & Network.
- C. Migrate parameters of the designated transactions.
- D. Migrate database tables of the designated transactions.

Answer: D

NEW QUESTION # 67

Which of the following release versions are supported when migrating to the SAP Ariba Cloud Integration Gateway solution? Note: There are 2 correct answers to this question

- A. Ariba Network adapter for SAP NetWeaver 7.0
- B. Ariba Network adapter for SAP NetWeaver 9.0
- C. Ariba Network adapter for SAP NetWeaver 6.0
- D. Ariba Network adapter for SAP NetWeaver 8.0

Answer: B,D

NEW QUESTION # 68

When does the value of a logical system created during the Global settings activities get used?

- A. while creating a connection in the Managed Gateway for Spend&Network project
- B. While creating a Logical port in SOAMANAGER

- C. While maintaining Cross-references for inbound IDoc transactions in the Managed Gateway for Spend&Network project
- **D. While executing the Setup the Interface program in the Managed Gateway-AddOn**

Answer: D

Explanation:

Solution:

From learning.sap.com, in the lesson "Creating Logical System" under Configuring Global Settings in the Administering SAP Integration Suite, Managed Gateway for Spend Management and SAP Business Network learning journey, the purpose and use of the logical system created during the global settings activity is explained:

"The logical system value you add in this configuration step ... will be used by the Interface Setup Integration program for automatically creating outbound parameters for outbound IDocs in the Partner profile (WE20) settings for Partner Type LS (Logical System)." SAP Learning This is also reiterated in the "Analyzing Required Configurations" lesson, stating that:

"The value created here will be used in Interface Setup program for generating outbound parameters of Partner Profile under TCode WE20." SAP Learning Based on these sources, the correct answer to your question "When does the value of a logical system created during the Global settings activities get used?" is:

*C. While executing the Setup the Interface program in the Managed Gateway-AddOn It is not used in the other options listed (creating a connection, maintaining cross-references, or creating logical ports in SOAMANAGER) according to the learning.sap.com documentation.

NEW QUESTION # 69

In the custom mapping tool, which of the following node functions can be used to create a target node set by looping over a source element?

- **A. Add For-Each**
- B. Add Target Condition
- C. Add Constant Value
- D. Add Target Value Variable

Answer: A

Explanation:

Solution:

The correct answer from learning.sap.com, as described in the "Defining the Node Functions of the Mapping Tool" lesson, is:

*A. Add For-Each - This function "can be used to create a target node set by looping over a source element." learning.sap.com So the correct choice for your question is: A.Add For-Each

NEW QUESTION # 70

Which parameters are associated with purchase order configuration in SAP Business Network integration via Managed Gateway for Spend&Network? Note: There are 3 correct answers to this question.
